Class summary

Expand your horizons and learn to develop in Microsoft Visual Studio and Microsoft .NET. Most of us know how to customize in LISP, so as a way to ease into .NET, this class will focus on developing .NET functions that are exposed to LISP. Even if you are a LISP programmer who has been scared to make the jump—come on in, the water's fine.

Key learning objectives

At the end of this class, you will be able to:

- Learn about the AUGI Bridging the Gap forum.
- Learn about typed values and result buffers
- Learn the libraries that need to be added to your project
- Learn by example and discussion

AC5437 - AUGI Bridging the Gap

Session Feedback

- Via the Survey Stations, email or mobile device
- AU 2015 passes given out each day!
- Best to do it right after the session
- Instructors see results in real-time

Students, educators, and schools now have

FREE access to Autodesk design software & apps.
