

# Mundane Civil 3D Tasks to Automate with Dynamo for Civil 3D

Stacey Morykin

Design Technology Manager – Pennoni

Dylan Kahle

Design Technology Specialist – Pennoni

# About the speakers

Stacey Morykin

- 20 years experience in AEC Industry
- Associate Degree in Computer Science
- Teaches Engineering Graphics at local college
- Autodesk Certified Professional in Civil 3D
- President of User Group in Philadelphia, PA

Dylan Kahle

- 8 years experience in AEC Industry
- Bachelor's Degree in Civil Engineering
- Autodesk Certified Professional in Civil 3D

Thank you,  
Lab Assistants!

# Key Learning Objectives

- Identify repetitive tasks in your daily workflow
- Learn how to import and manipulate AutoCAD Objects and/or Civil 3D data
- Produce Dynamo for Civil 3D scripts to automate repetitive tasks
- Discover ways that Dynamo for Civil 3D can elevate efficiency

## Class Agenda:

- What is Dynamo and Why would I use this?
- Lab Format / Structure
- Complete 3 Scripts in Dynamo
  - Changing a Layer
  - Combining an Alignment / Point table
  - Placing trees along an alignment
- Dynamo Community!

## Not Covering today:

- Custom nodes using Python, C#, etc.

# Intro to Dynamo

# What is Dynamo?

Dynamo is a visual programming environment that lets designers create visual logic to explore parametric conceptual designs and automate tasks.

- Visually write code!
- Easy for non-programmers!

# Dynamo

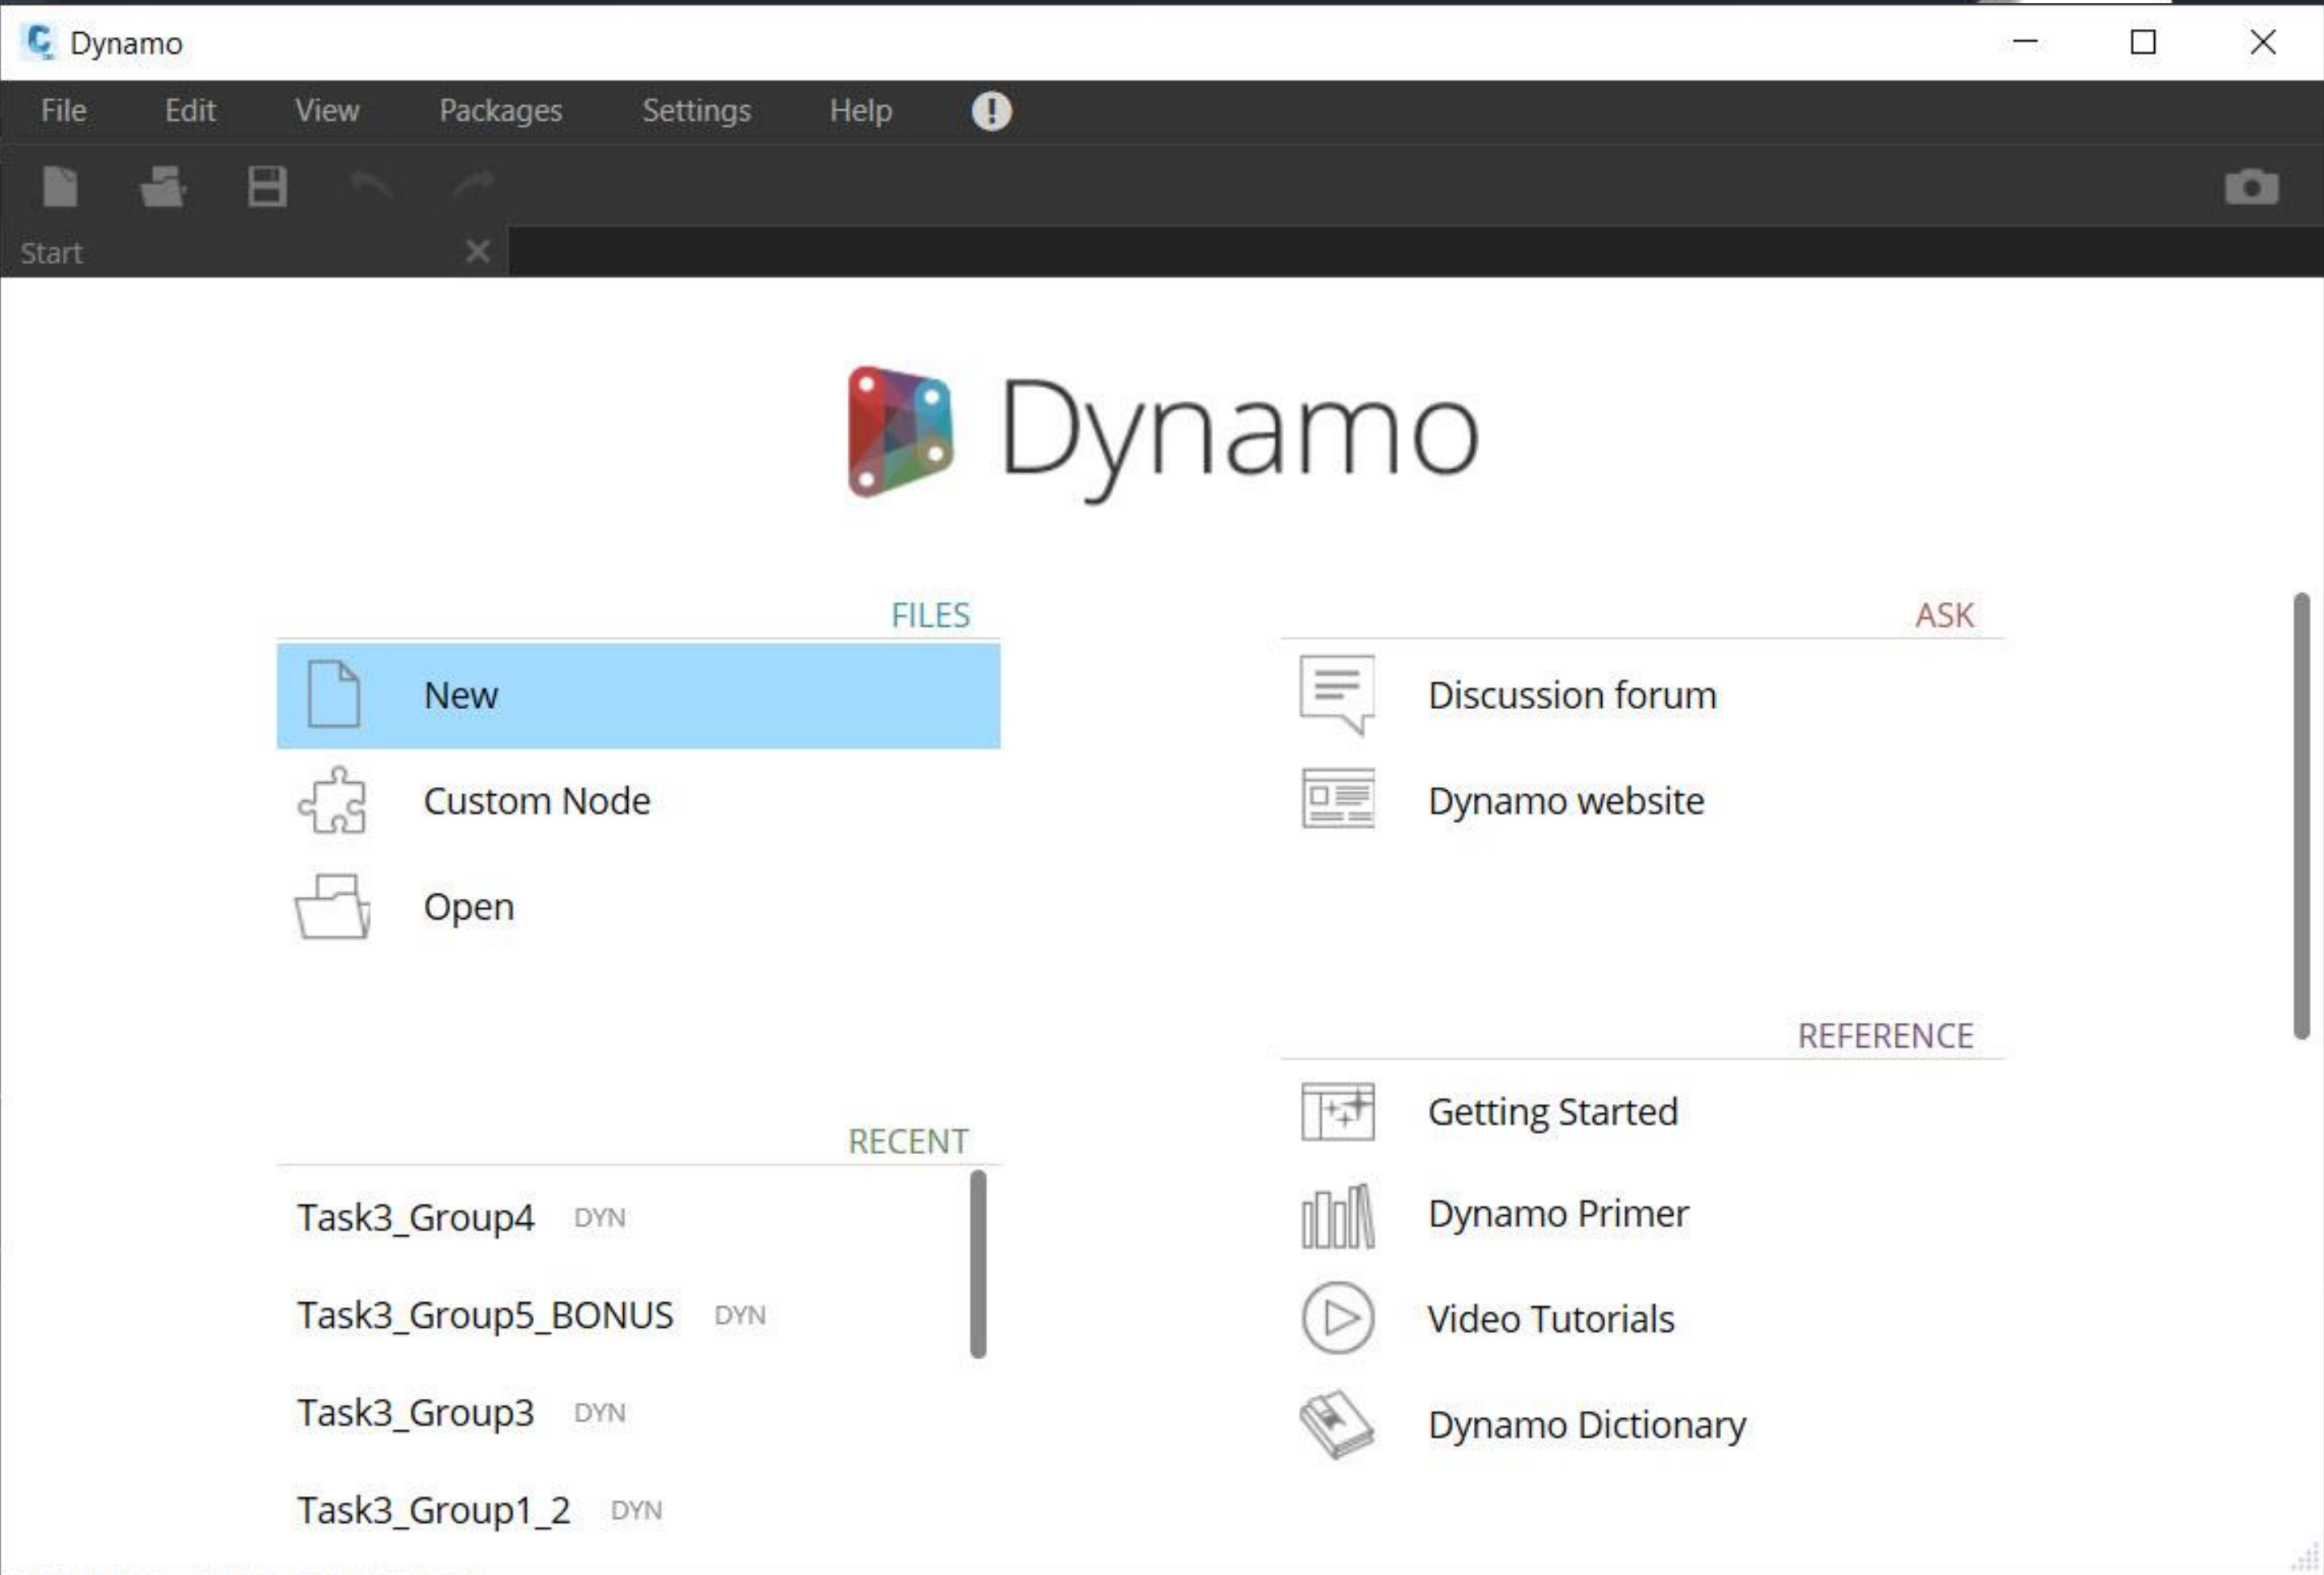

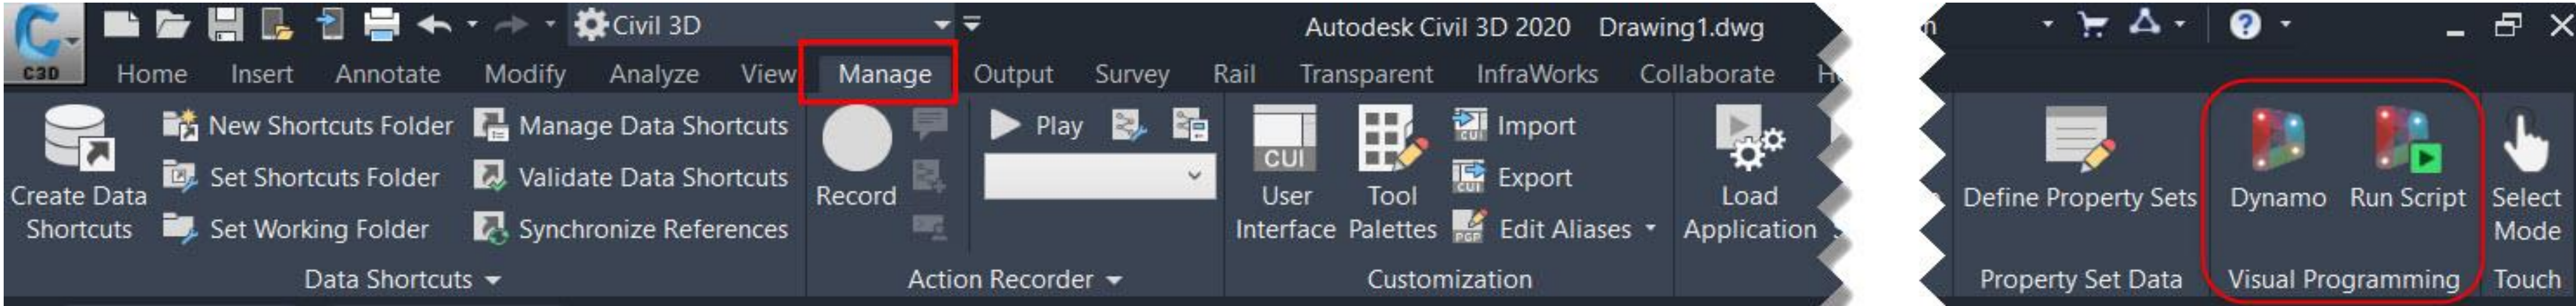

## Why should I use this?

- Automate repetitive tasks, reduce the number of clicks!
- Access the data within Civil 3D
- Easier to visualize, not just code (text)
- Improve efficiency and productivity

# Opening Dynamo for Civil 3D

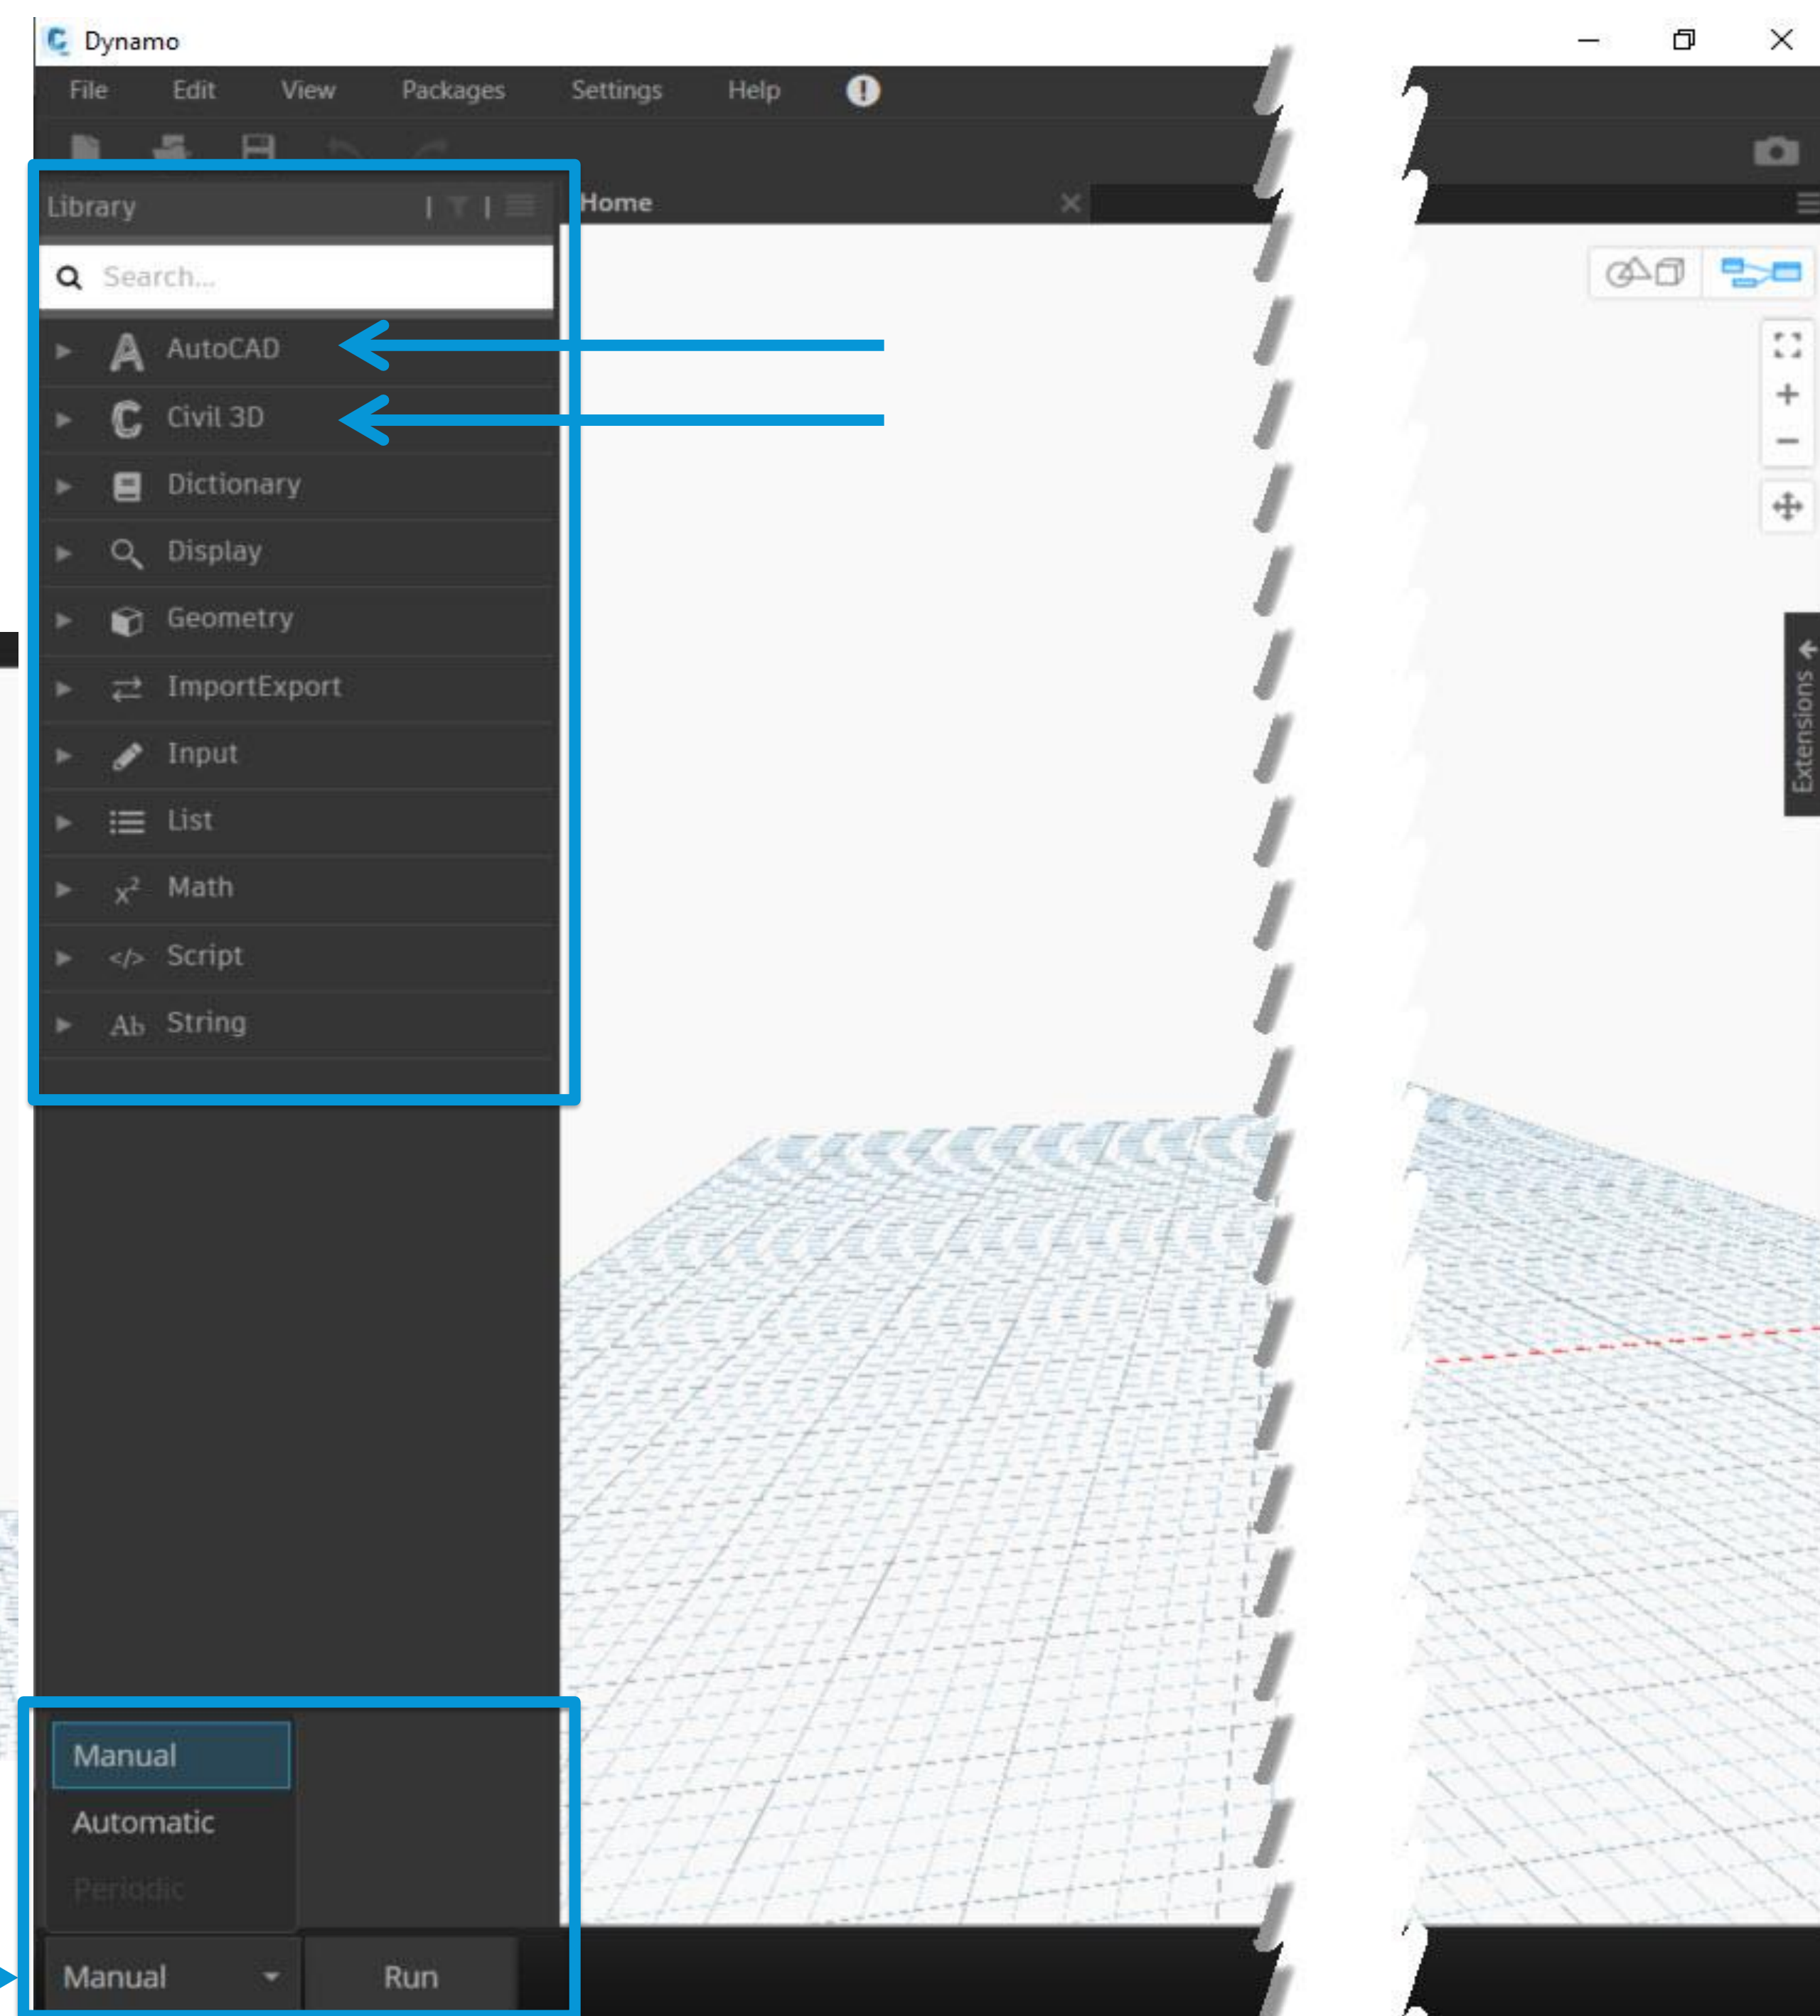

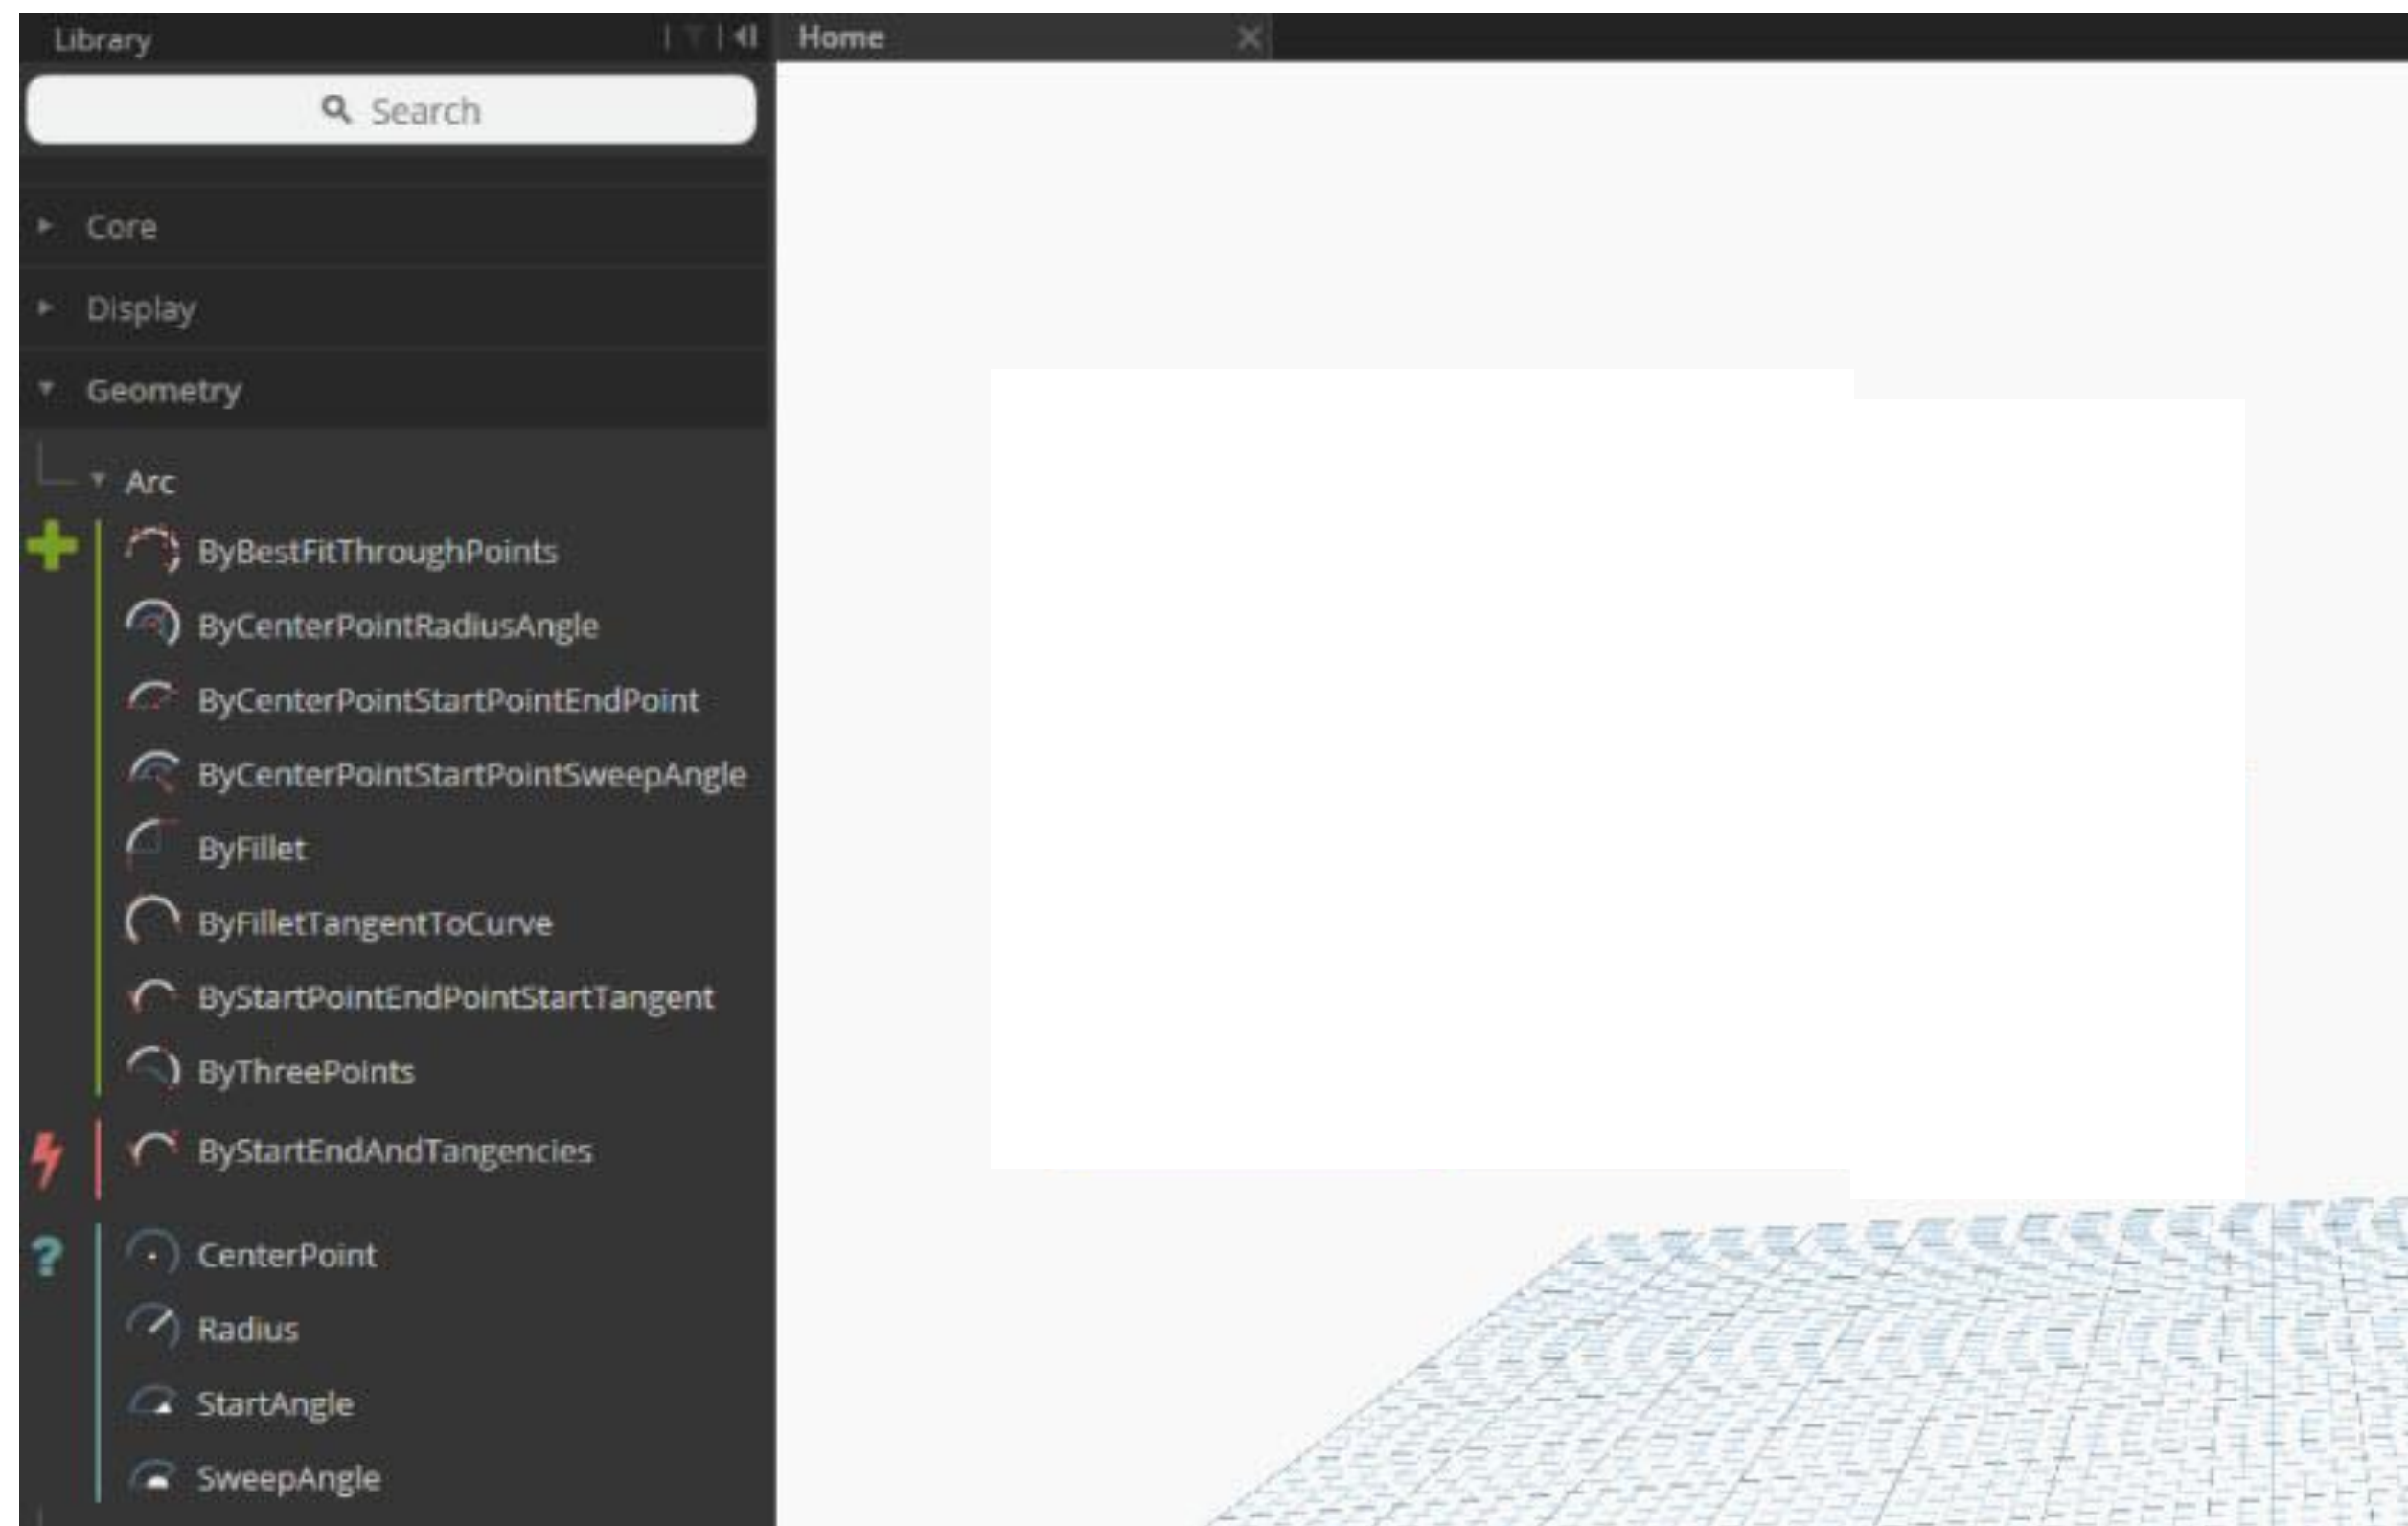

# Before we start...

## 1. Library

- All nodes organized in categories
- “Node” is an operation

## 2. All nodes perform an operation

## 3. Execution Bar

- Different options for running the program

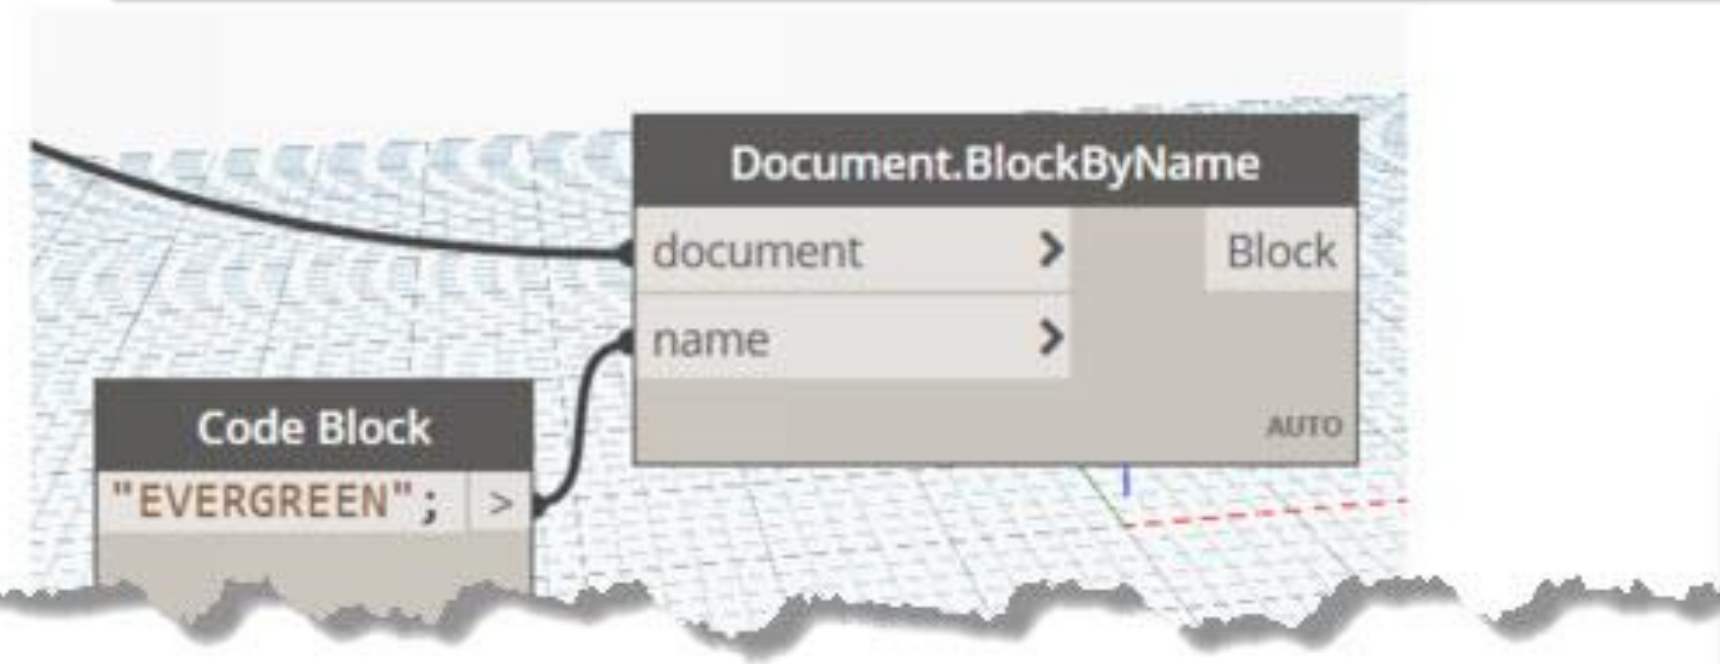

# Lab Format / Structure

1. Why we chose this task
2. Demo of individual steps to complete
3. Try the exercise on your own!

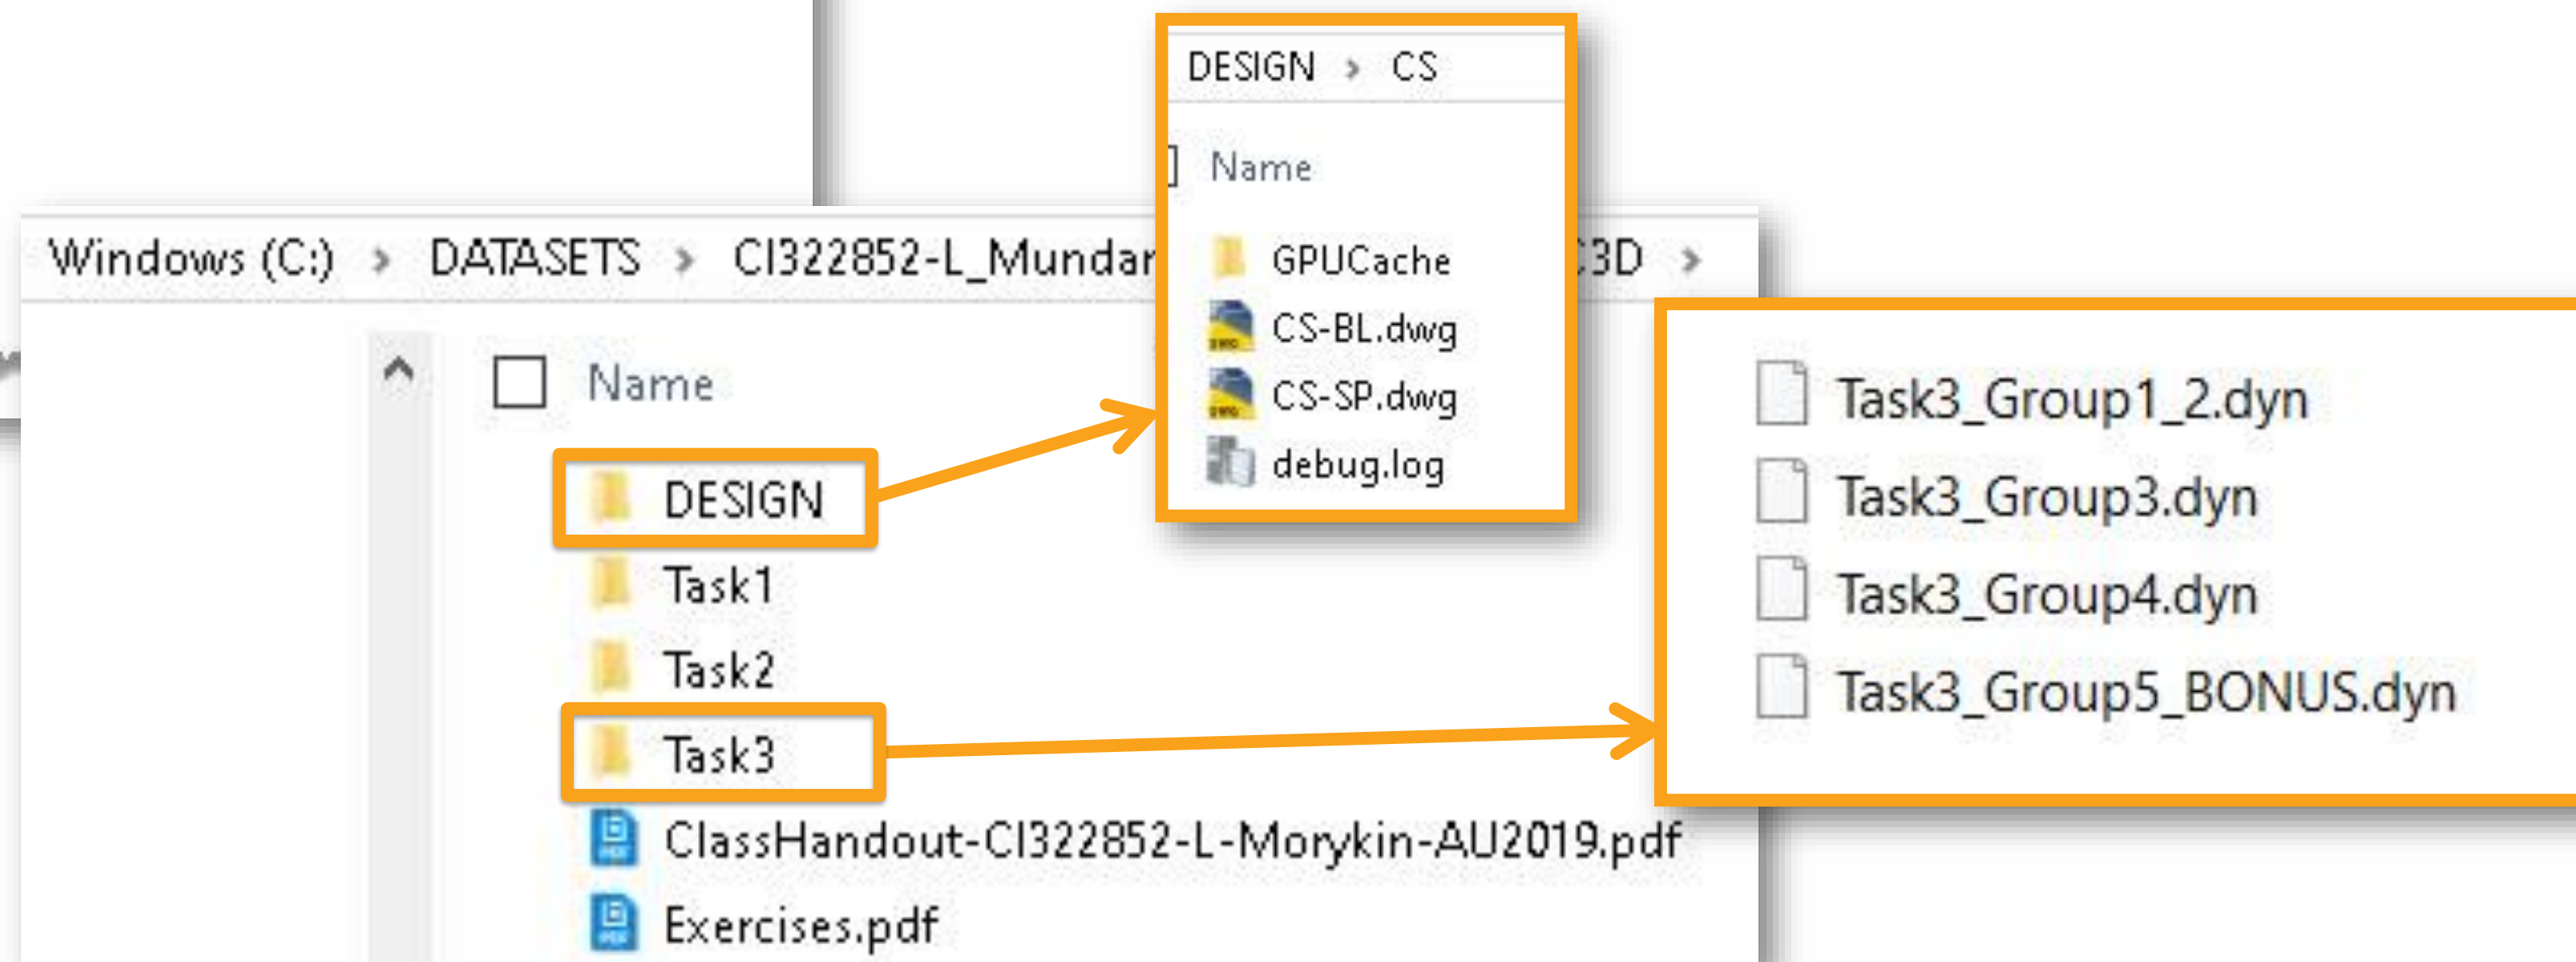

## Group 4

1. **AutoCAD > Document** and select the **"BlockByName"** node.
2. **Double-click** on the empty workspace to create an empty **"Code Block."**
3. Type (**"EVERGREEN";**) - *include everything in the parenthesis*
4. Connect the **"Code Block"** output to the **"Document.BlockByName"** name input.

- Category > Sub-Category
- Node name in **BOLD**
- Actions
- Use wires to connect outputs to inputs

## 4. Location of Data Set

**POWER CLAP!**

Image caption goes here

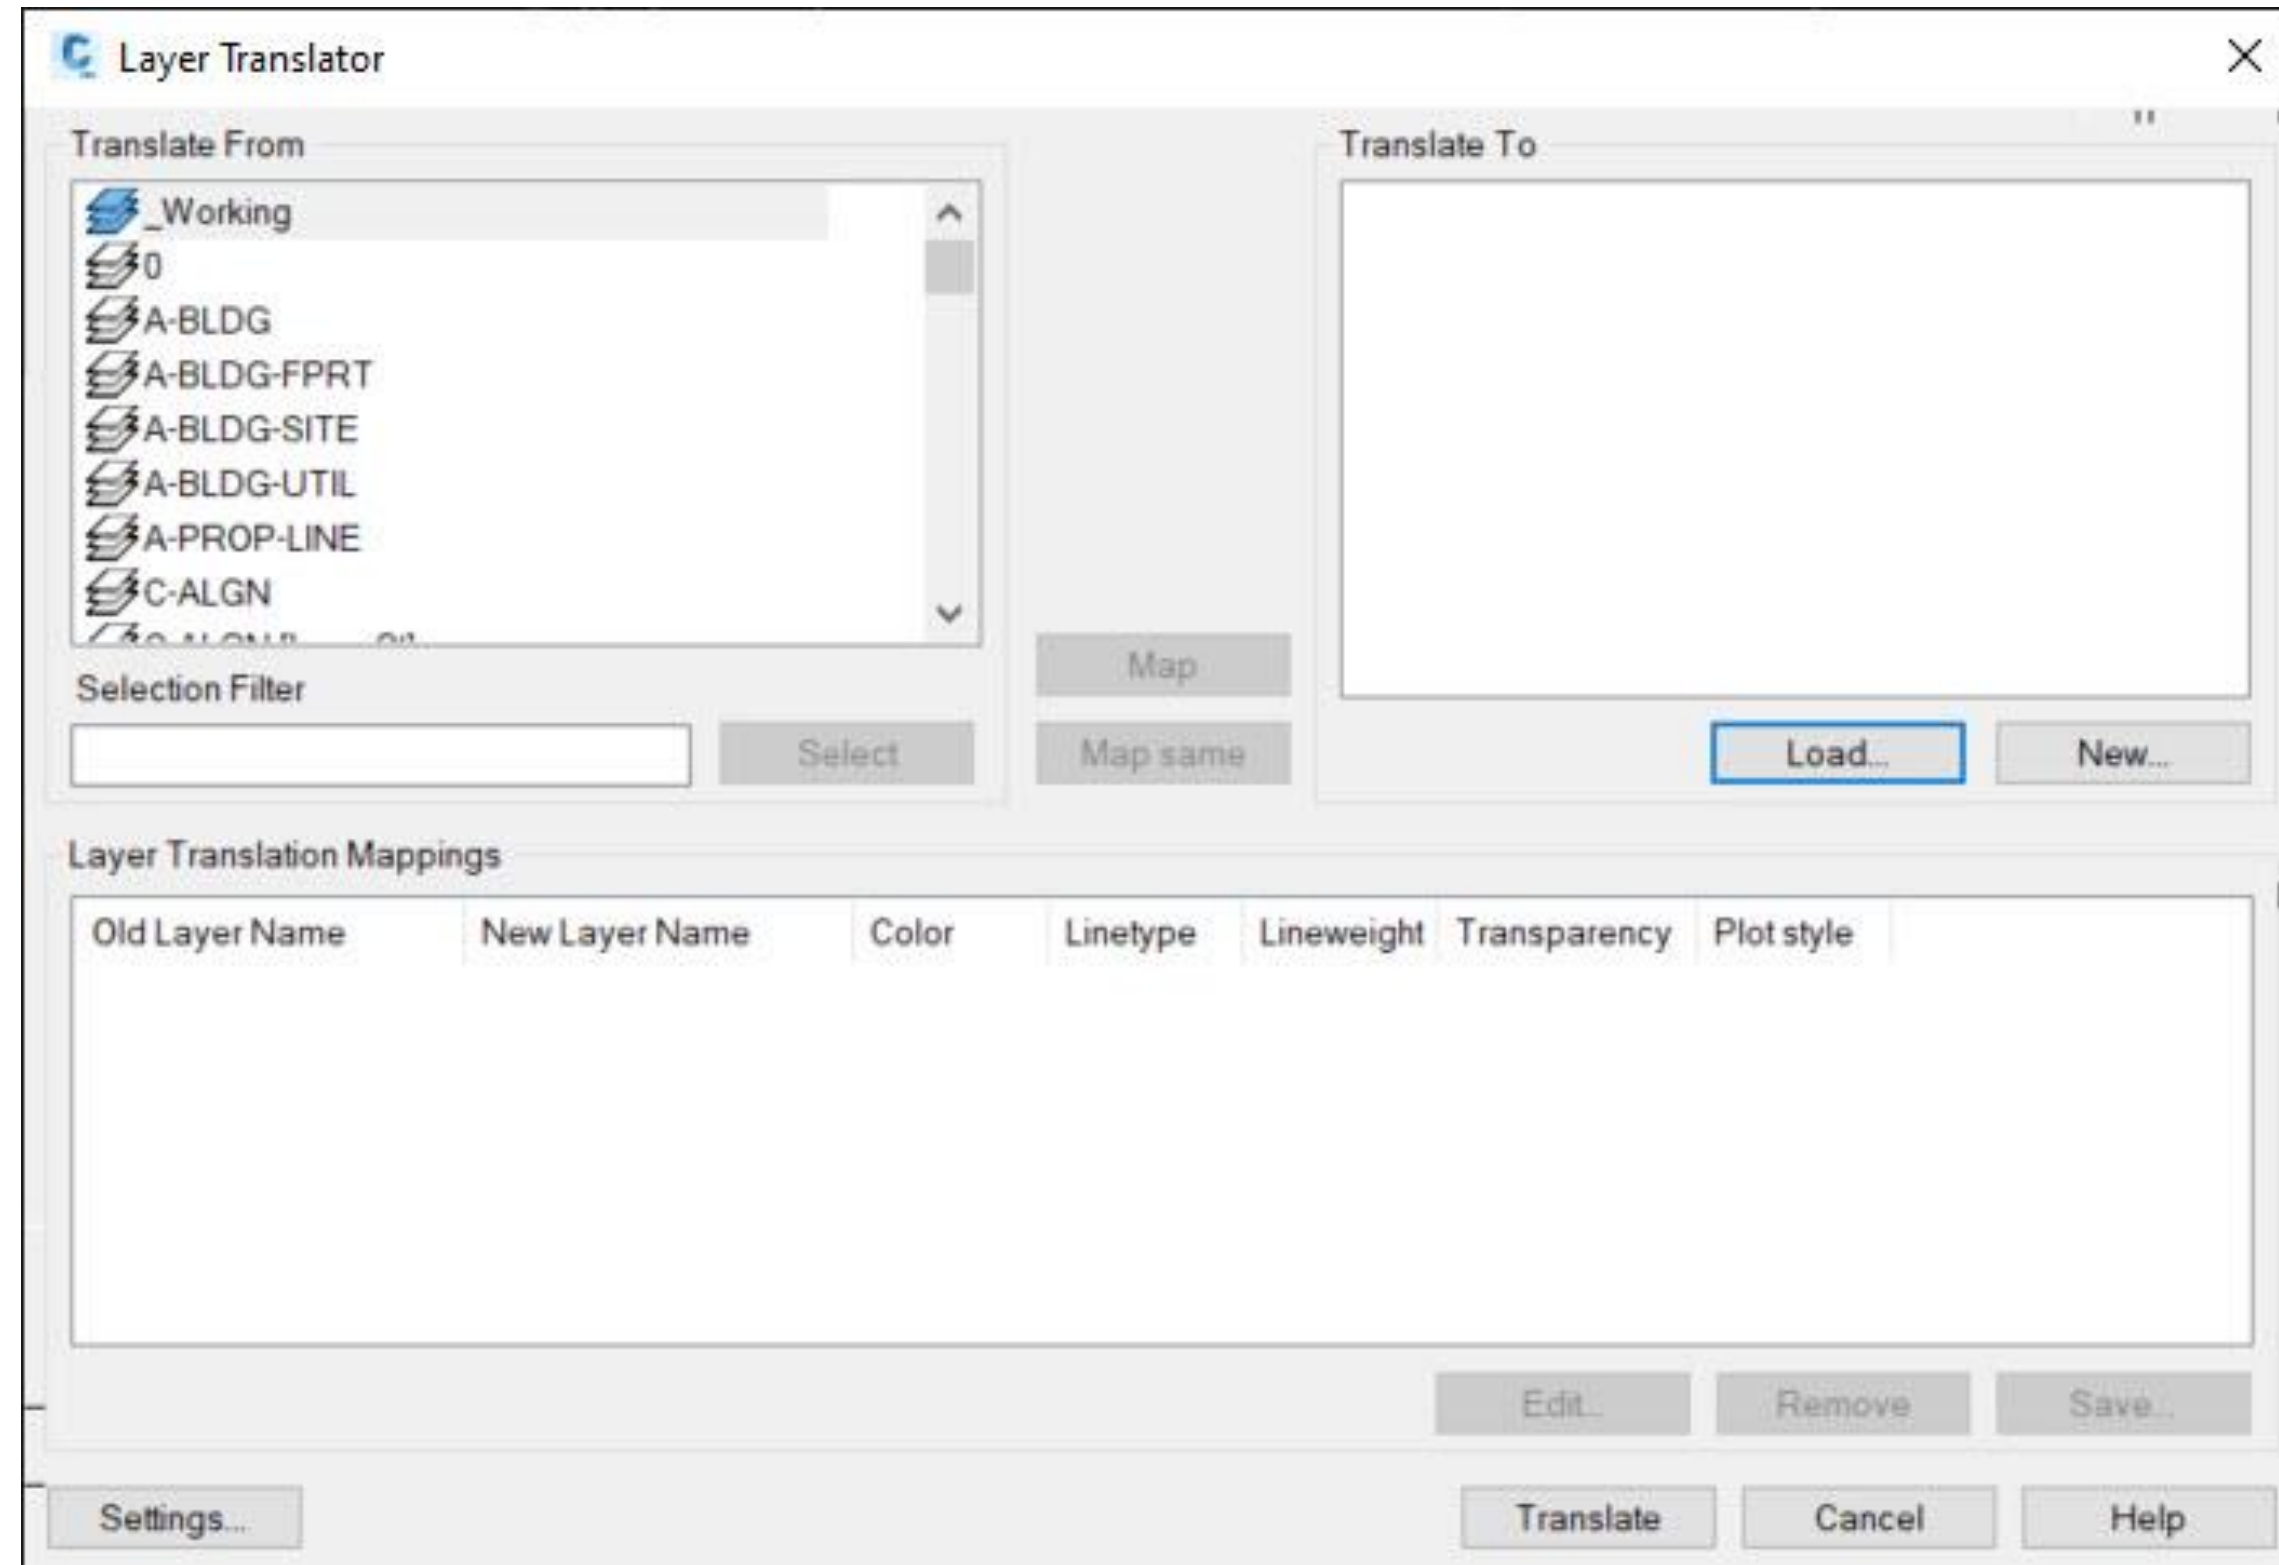

# Task 1 – Changing Layers

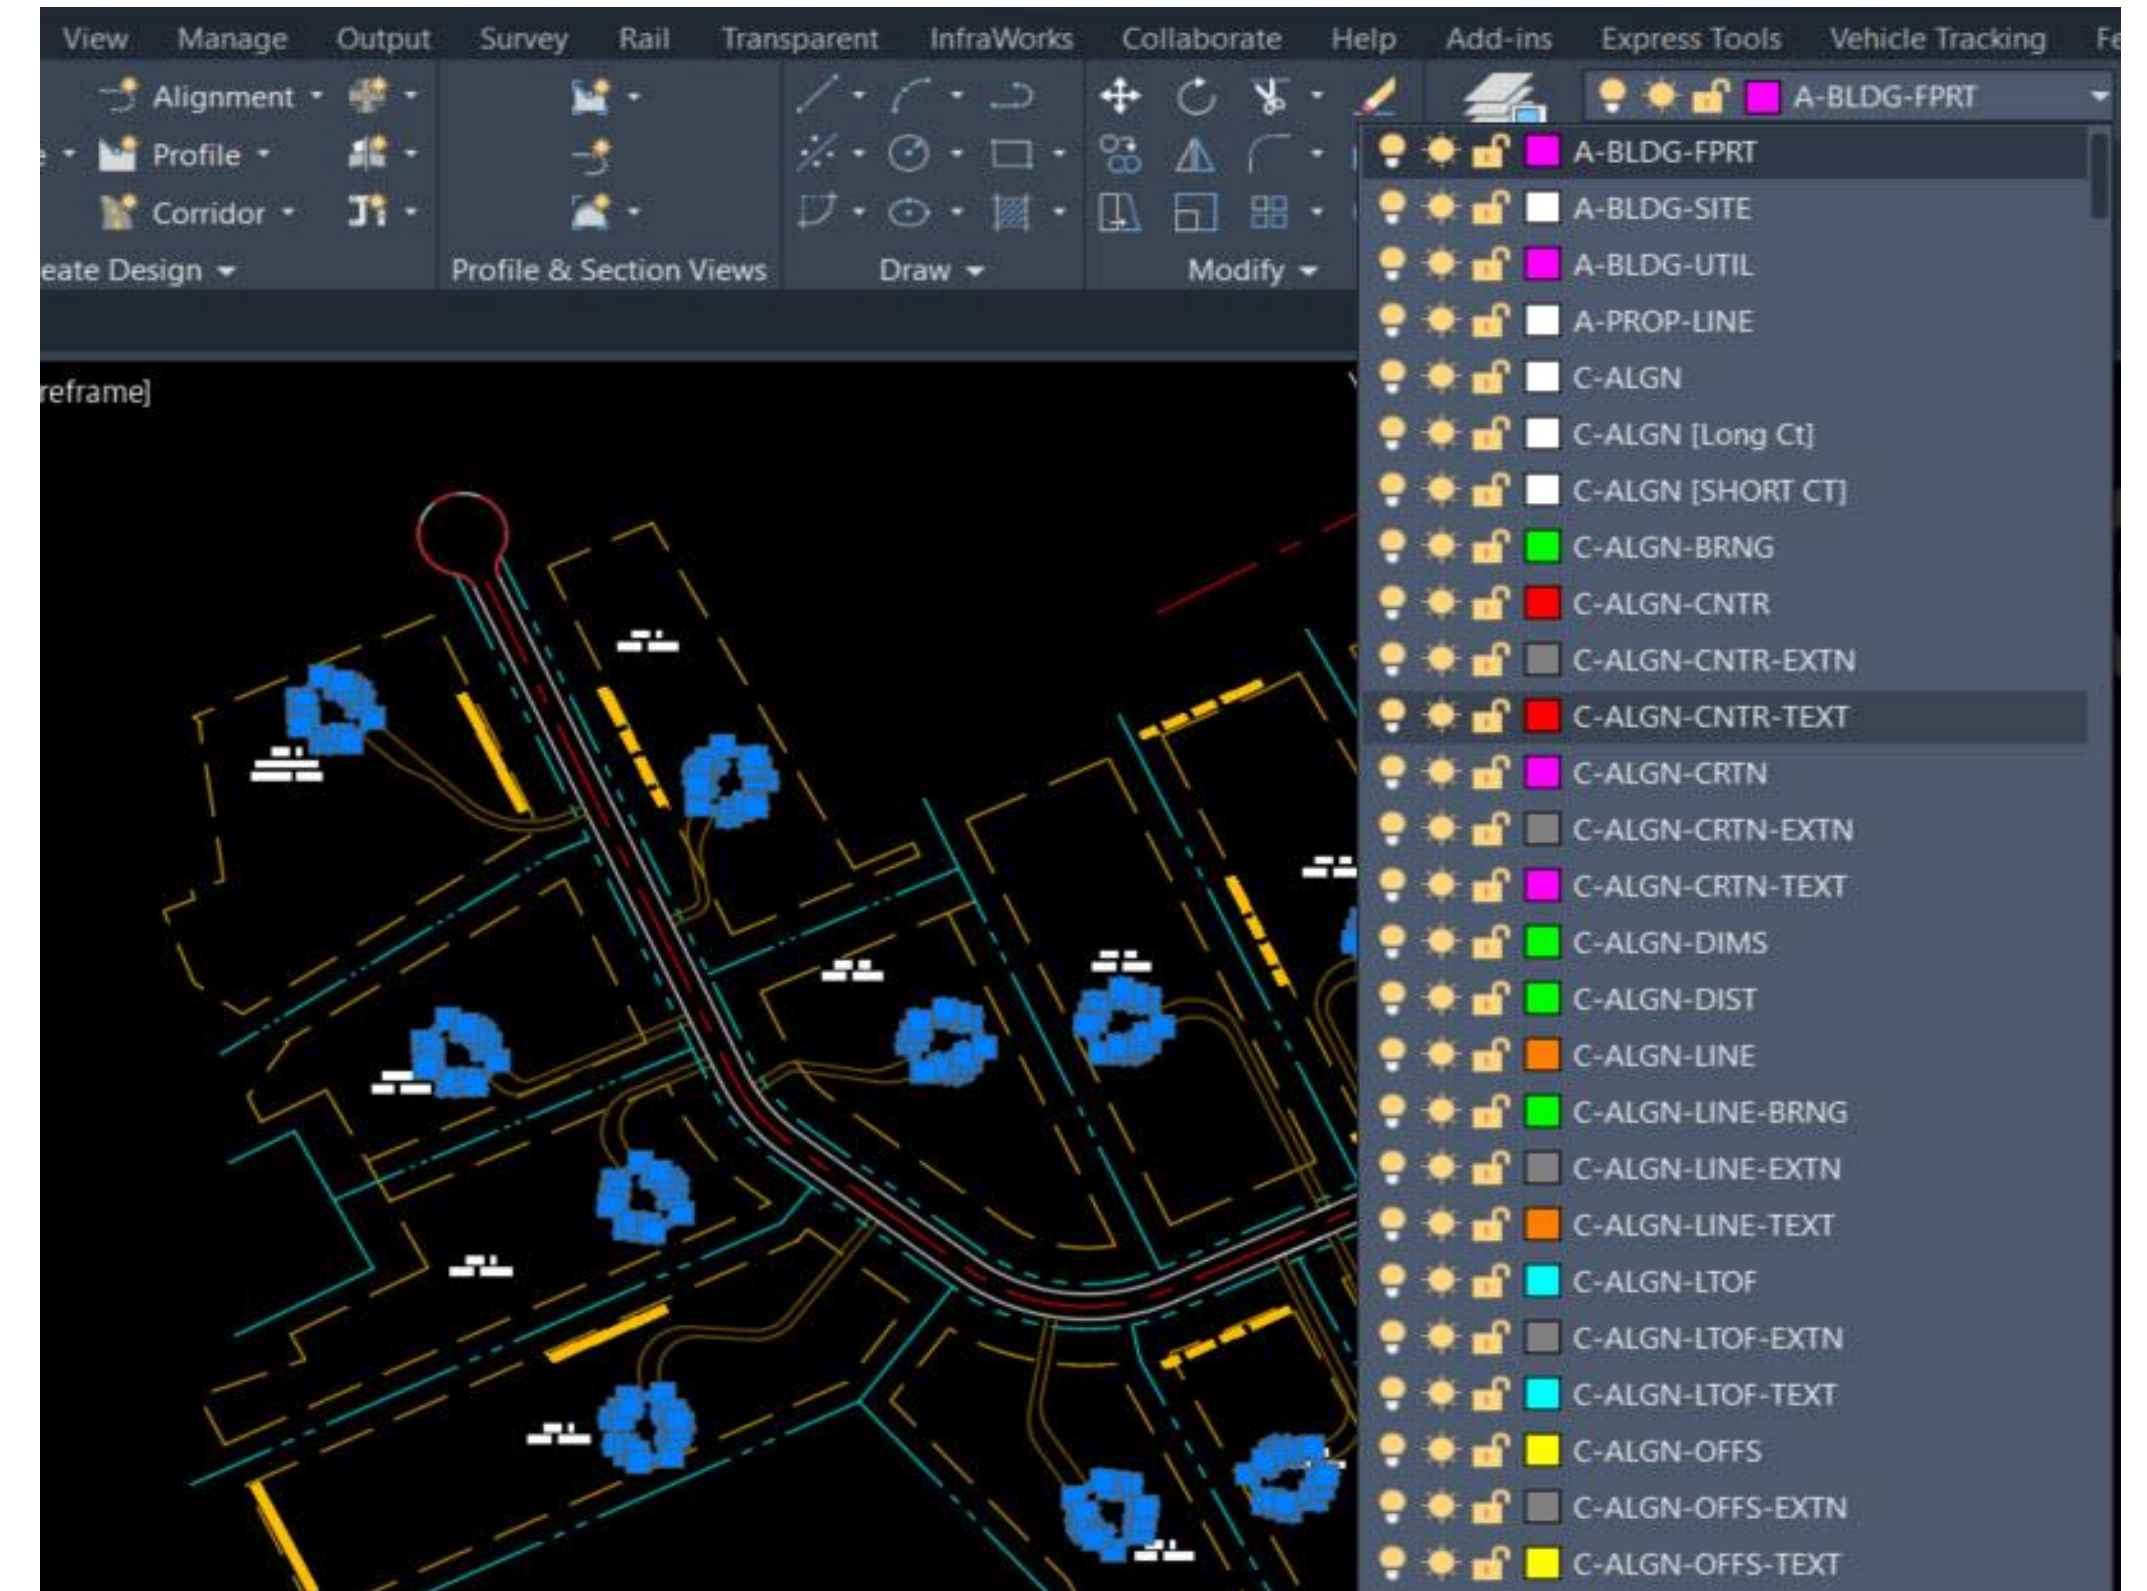

# Why a graph for this task?

## Method 1 – Layer Translator

Initiate Command, load the “translate to” side on the right, scroll on the left to click the layer, scroll on the right to click the layer, click map same, translate, accept;

7 Clicks

## Method 2 - Manually

Select an object, right-click to select similar, click layer drop down, scroll to select new layer;

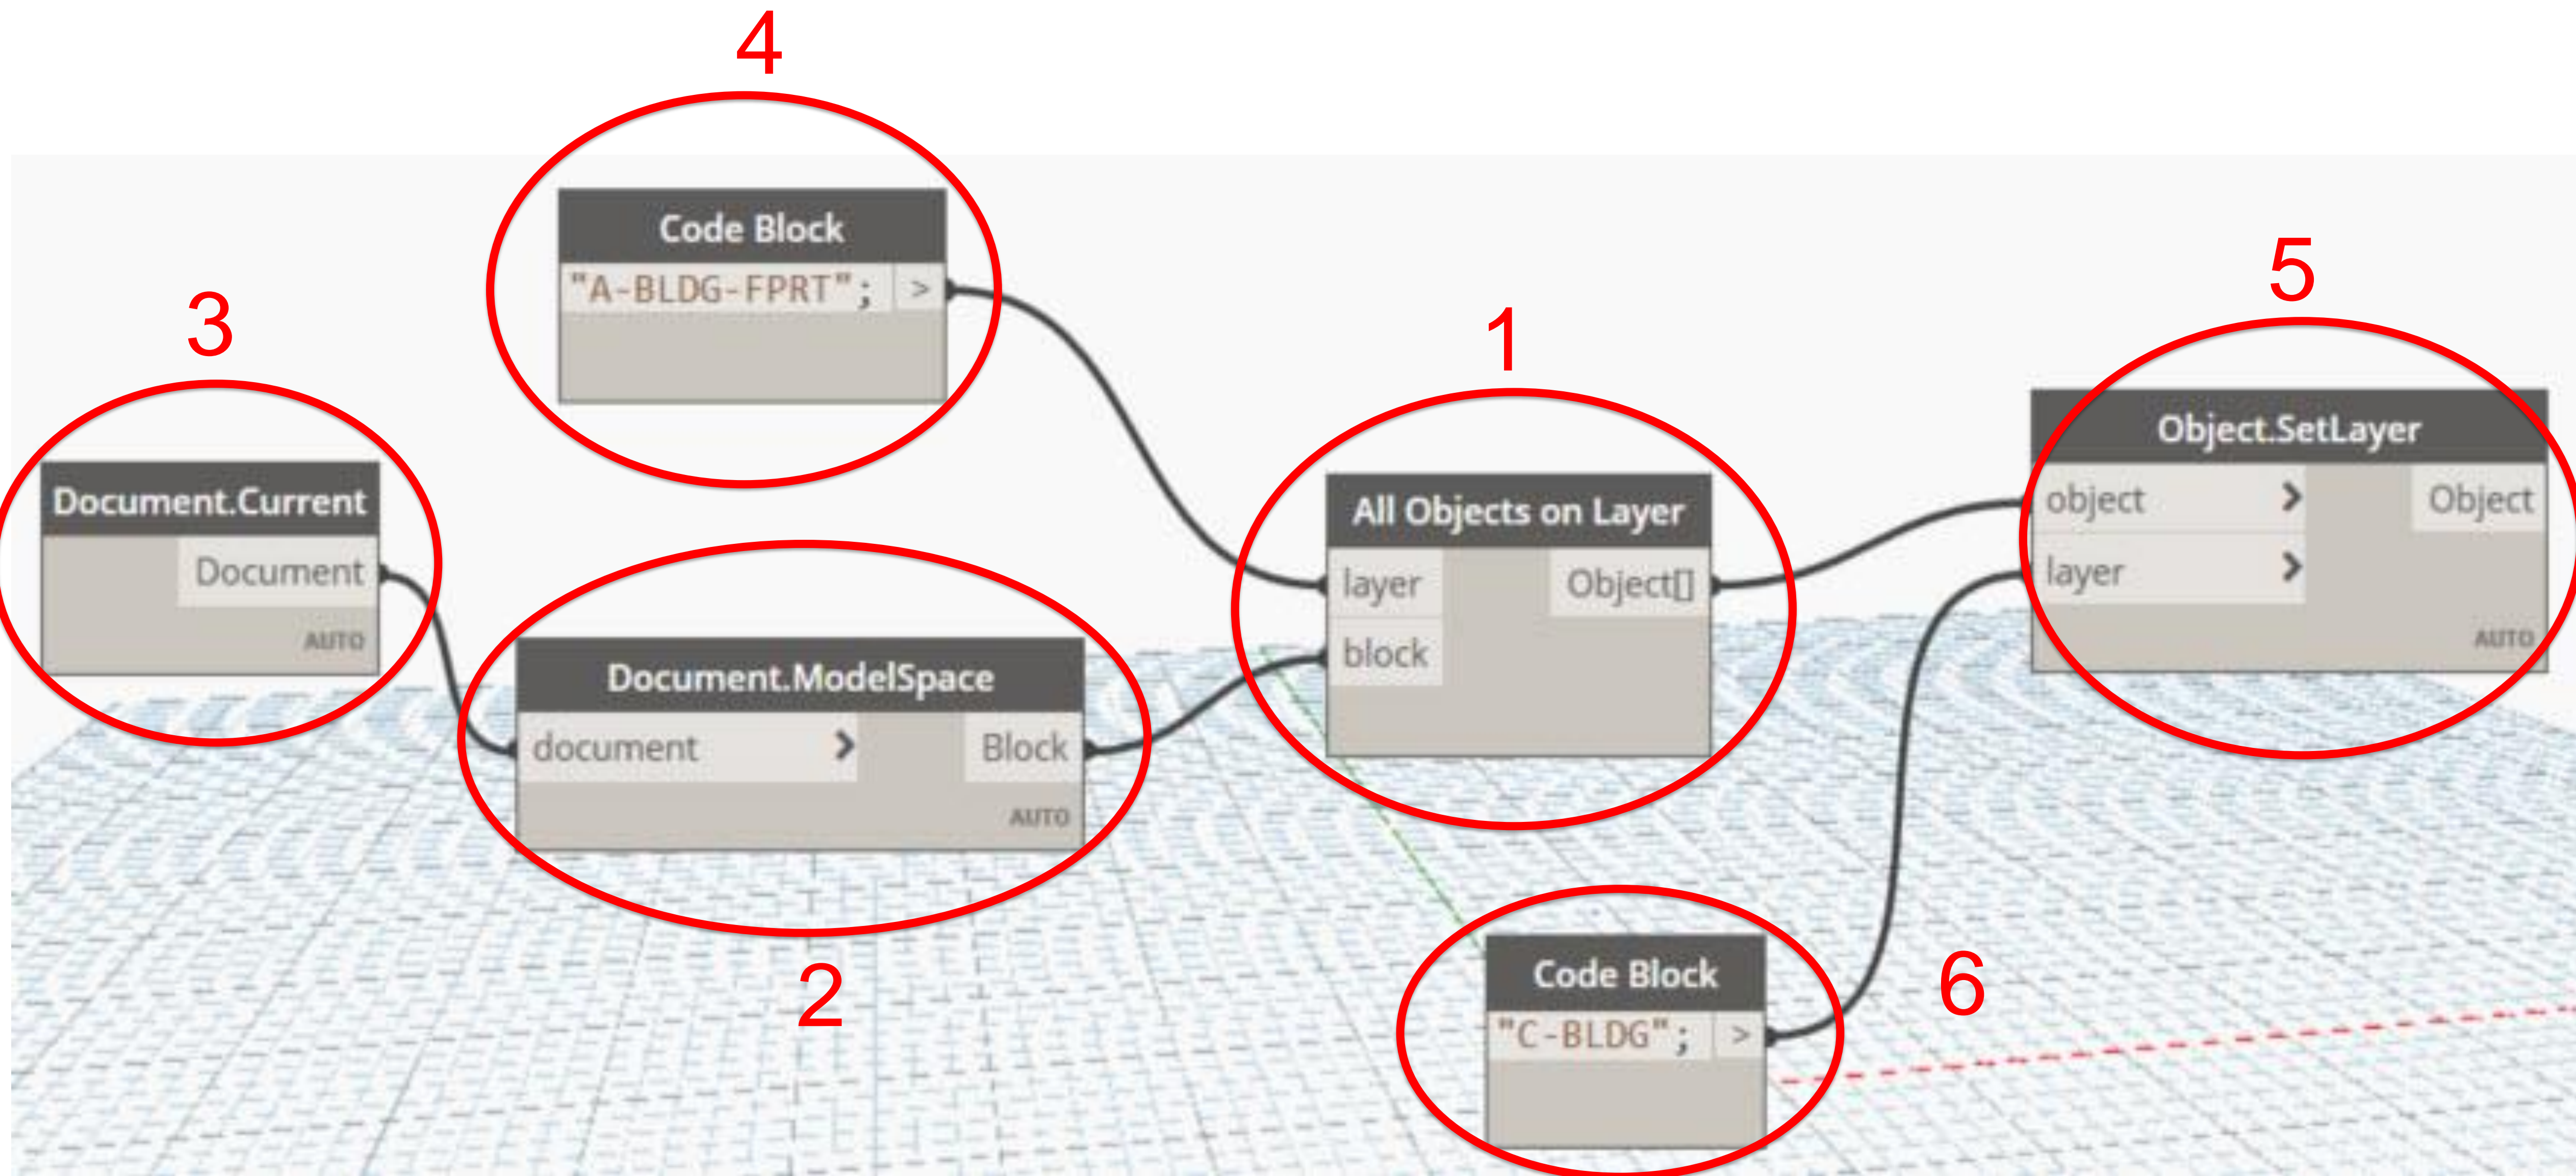

4 Clicks

Drawing with 200 layers, could take all day... Let's Automate!

# Where do I start?

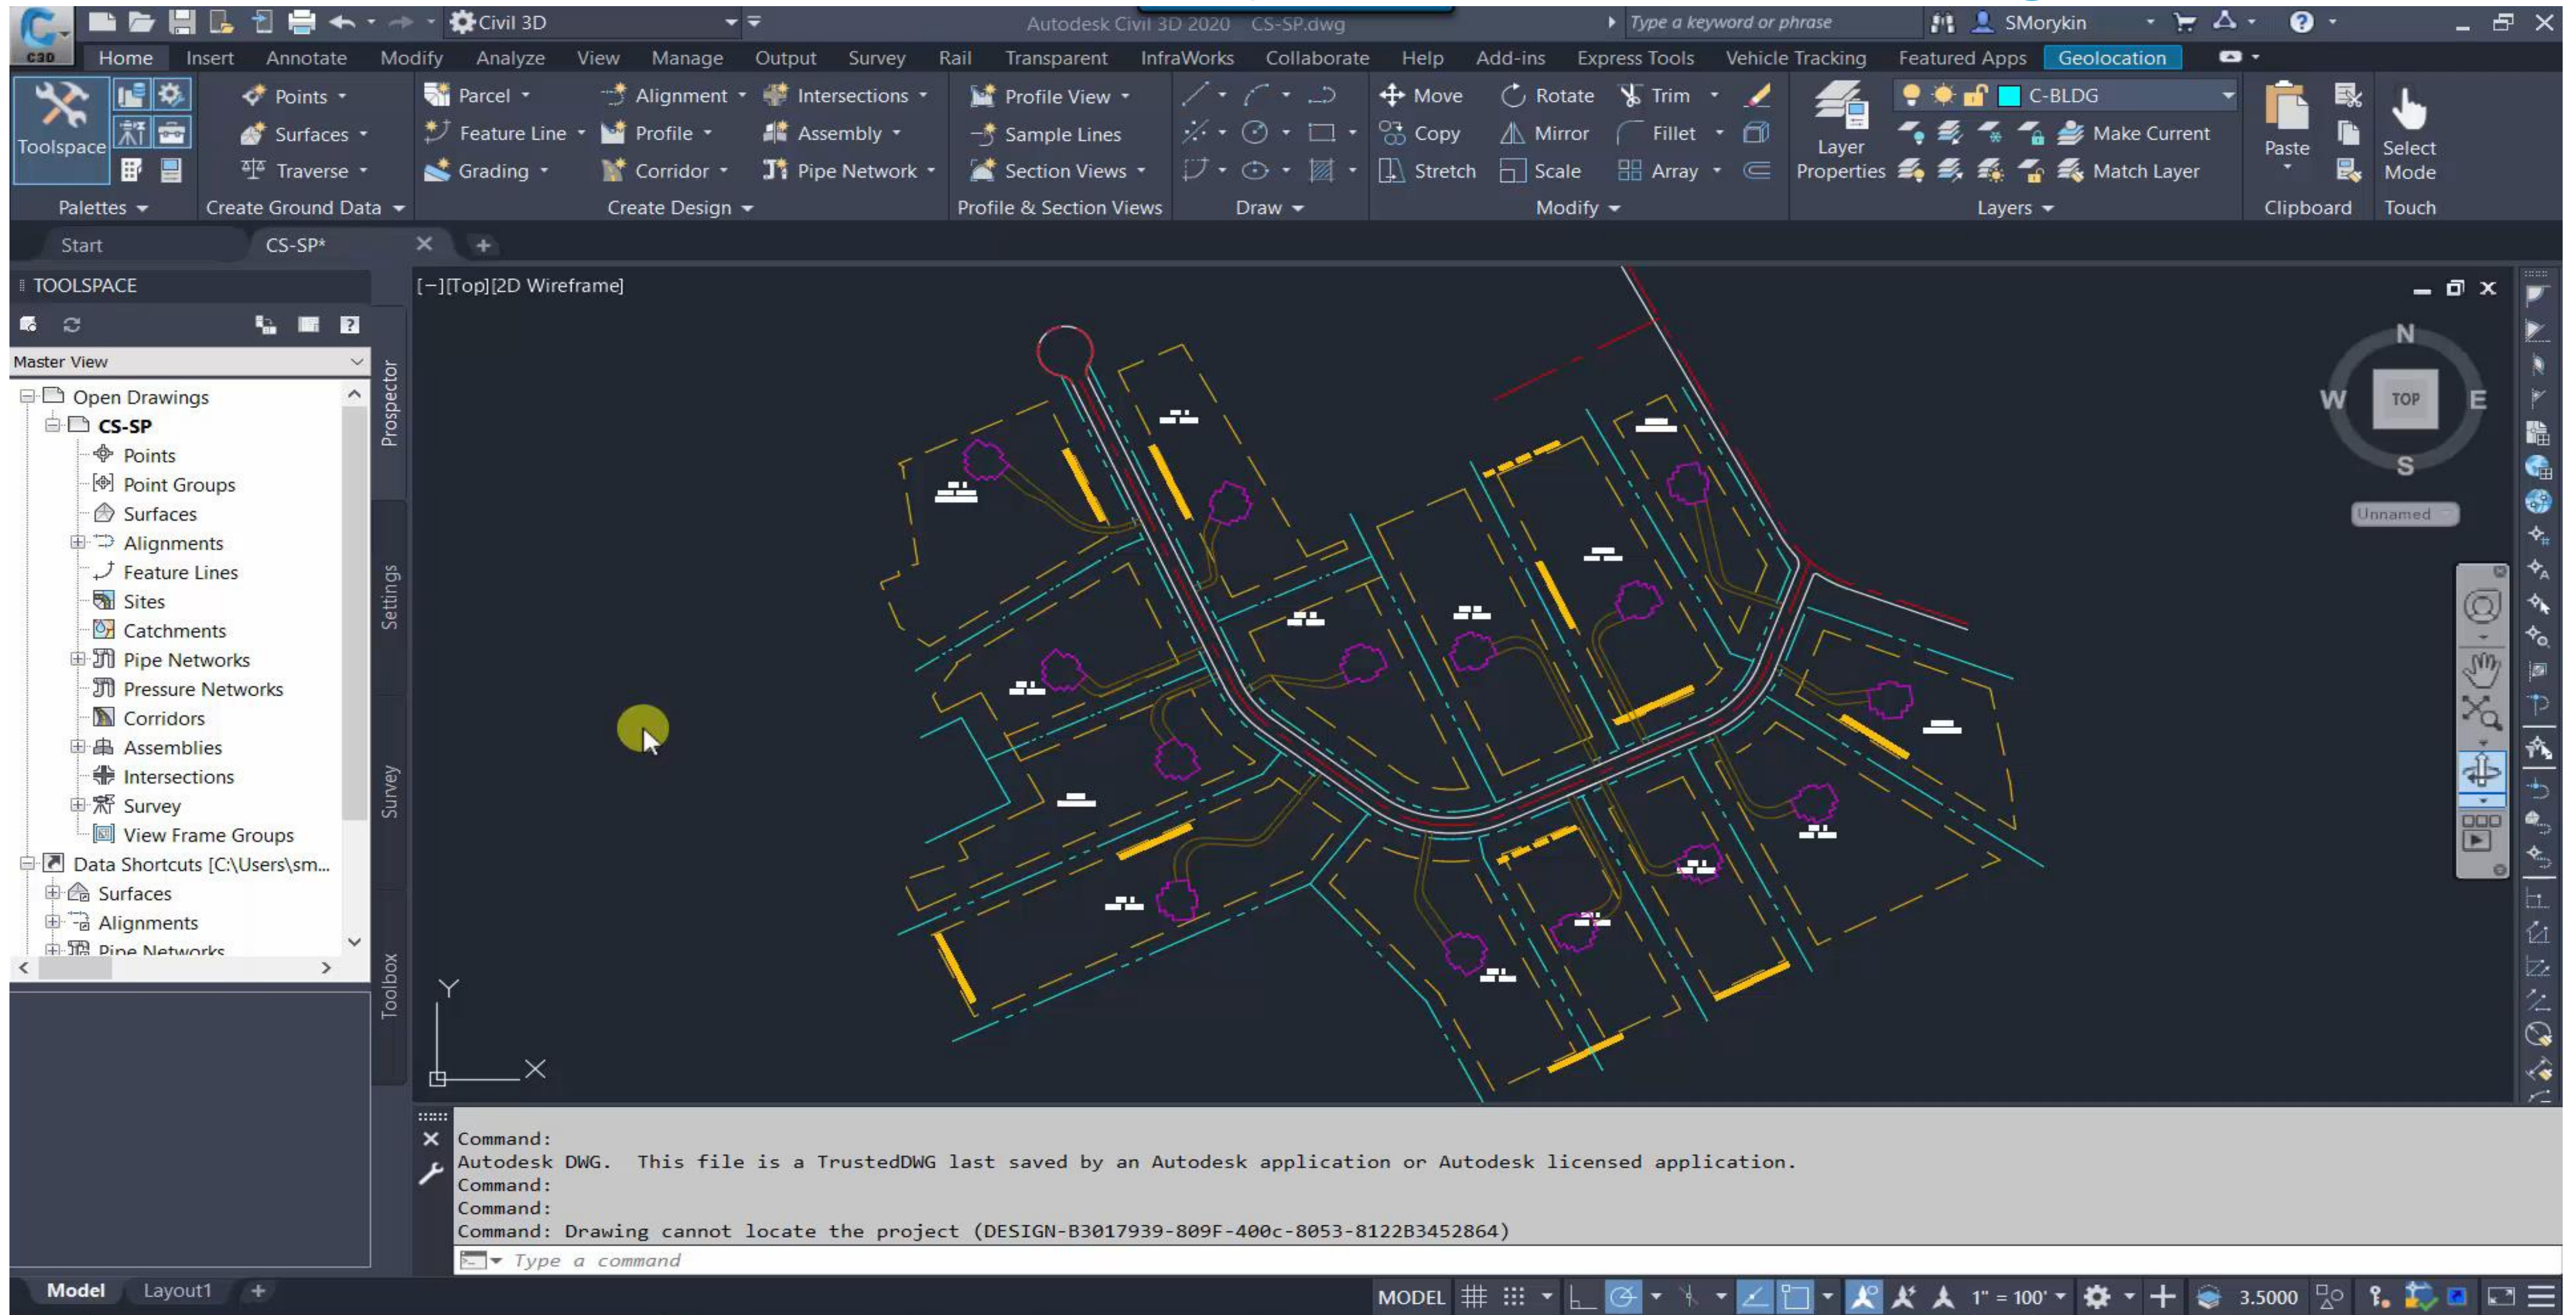

Commands = Nodes in Dynamo!

# Task 1

# Try the Exercise Page 19 Handout

View Video Online— <https://autode.sk/2pOAE Mn>

# POWER CLAP!

# Task 2 – Alignment Geometry

# Task 2: Introduction

## Alignment Table

- Rigid in displayed information
- Customization takes time
- Static once customized

## Needed Information

- Flexible in displayed information
- Easy to customize
- Maintain Dynamic nature

# Where do I start?

## Group 1

- List all alignments in current drawing

## Group 2

- Get Station, X, Y Values
- Convert coordinates to points

## Group 3

- Organize gathered info

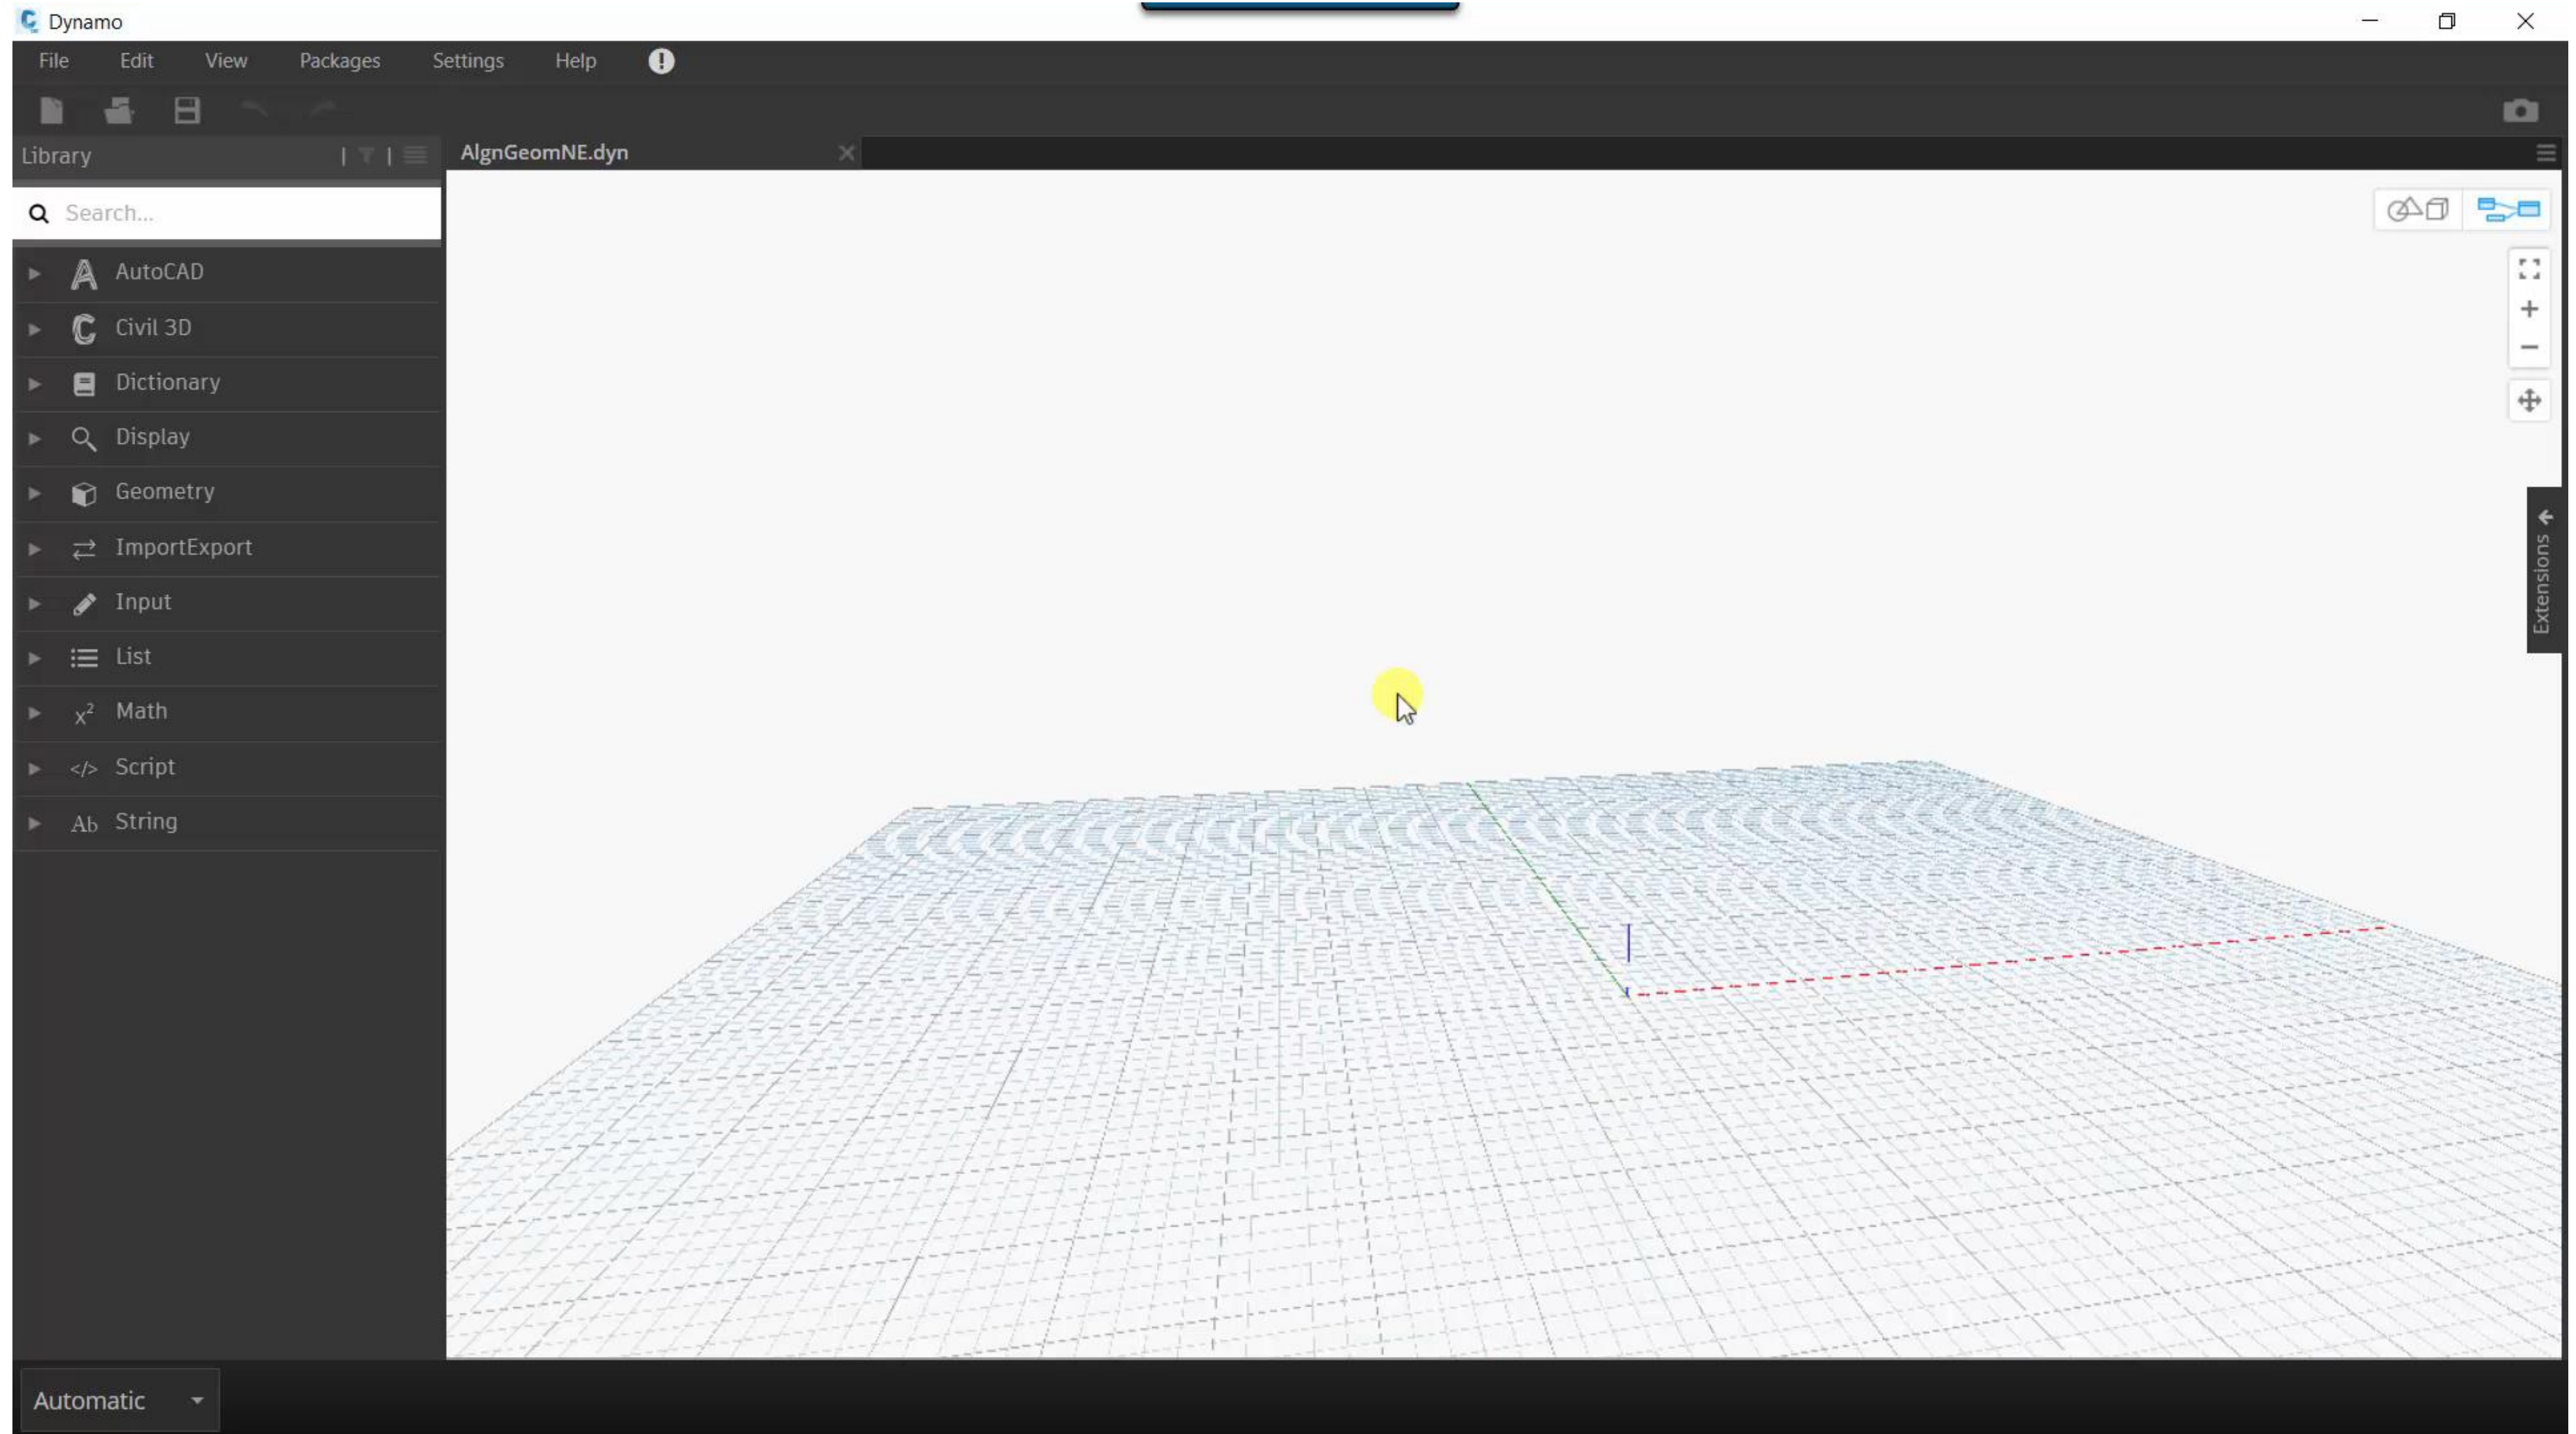

## Group 4

- Export to Excel

# Task 2: Groups 1 & 2

# Try the Exercise Page 32 Handout

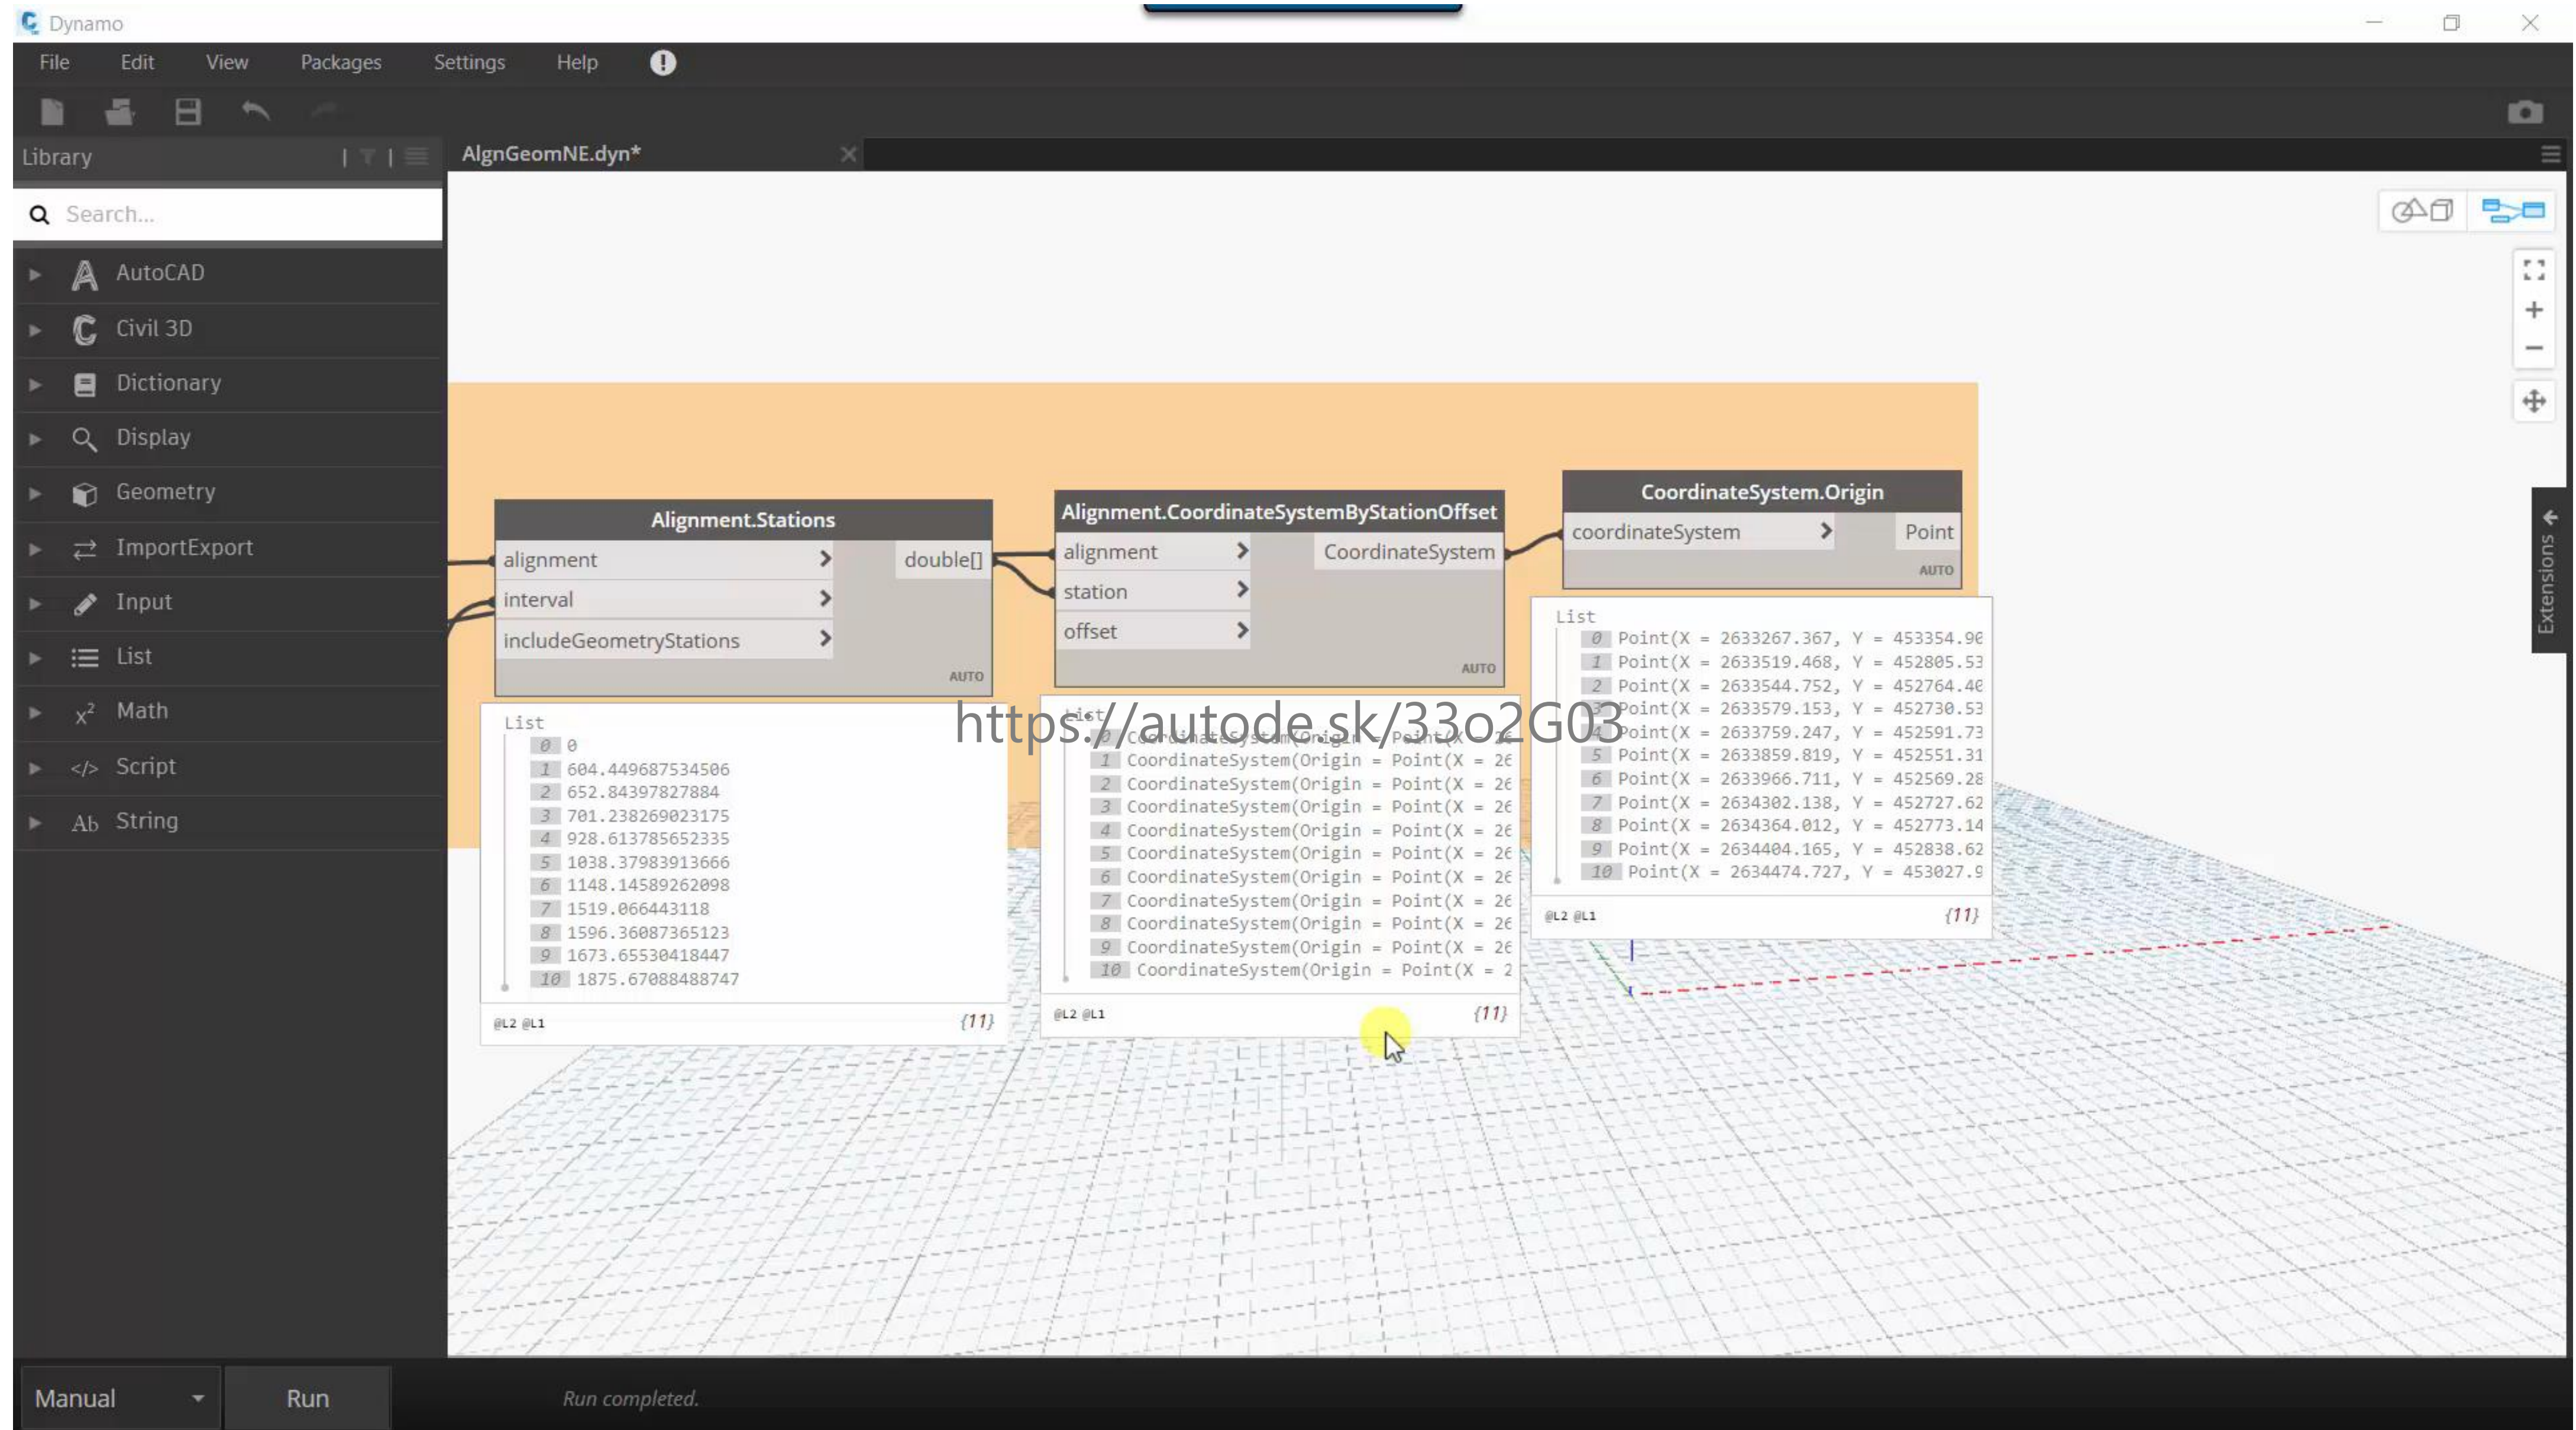

View Video Online— <https://autode.sk/33o2G03>

# Task 2: Group 3

# Try the Exercise Page 38 Handout

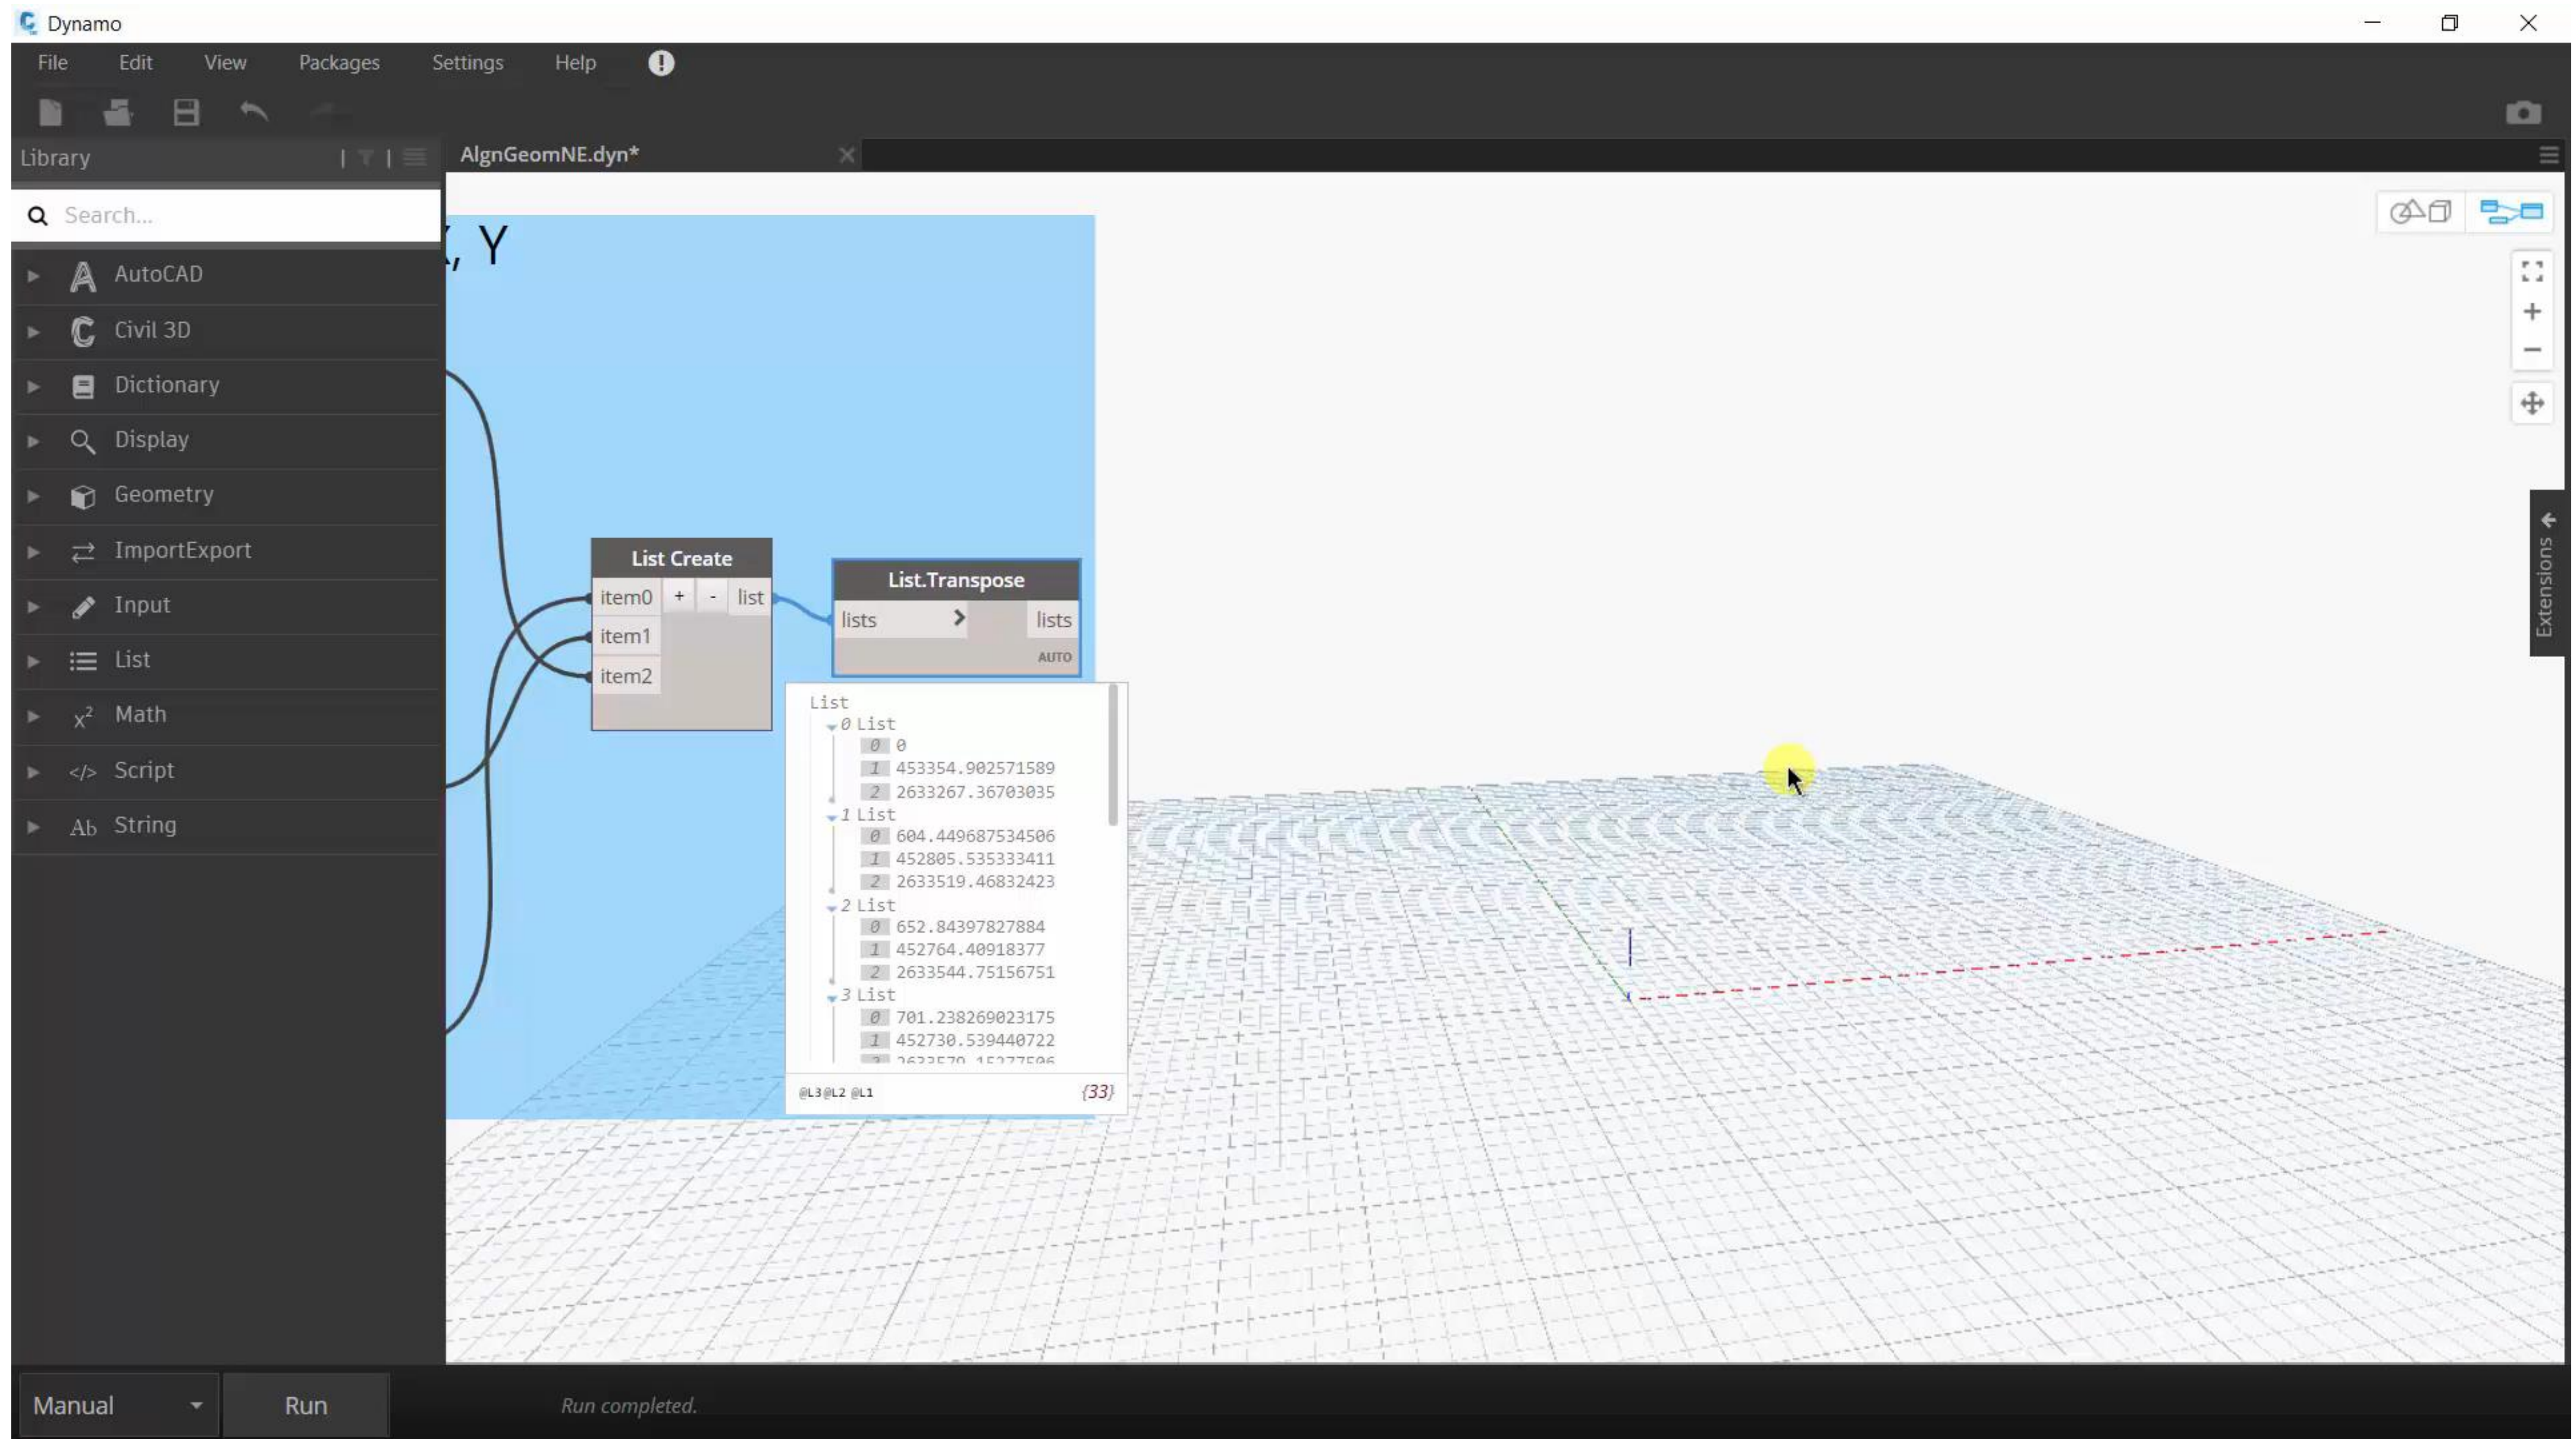

View Video Online - <https://autode.sk/2NmDcdQ>

# Task 2: Group 4

# Try the Exercise Page 42 Handout

View Video Online - <https://autode.sk/2NpT4vV>

# Task 2 Conclusion

- Capture data from within C3D
- Export to Excel
- Customized table in Civil 3D
- Dynamic

NO.	STATION	BASELINE	NORTHING	EASTING	REMARKS

# Task 3 – Create Block Along an Alignment

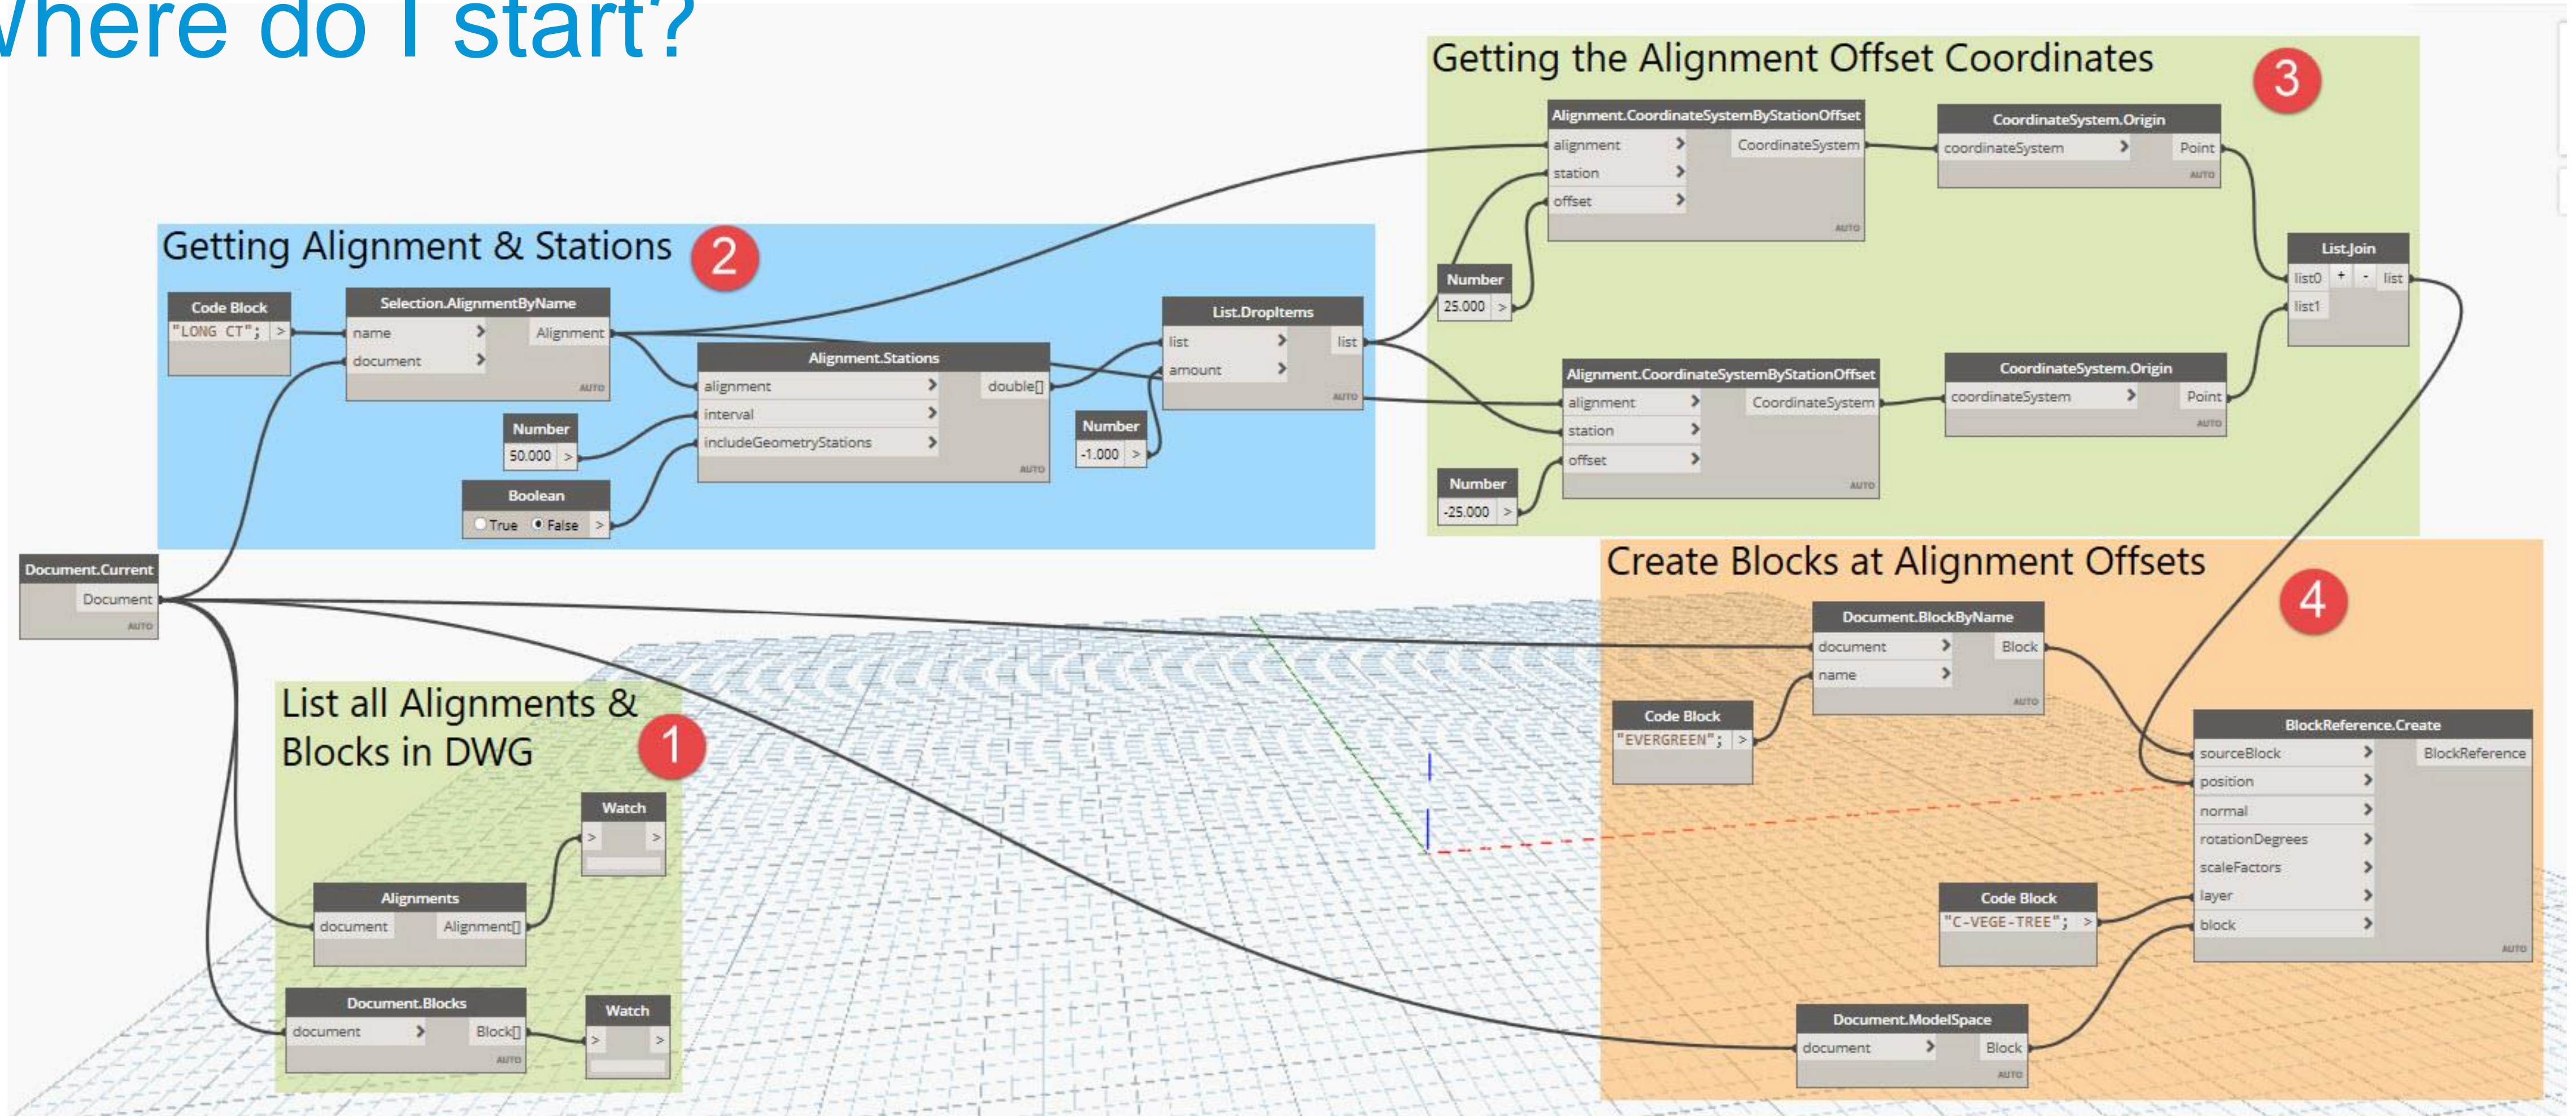

# Task 3: Introduction

- Place a tree block along an alignment
- Why Automate?
- Steps needed:
  - Establish the alignment and block
  - Stations and offsets
  - Insert block

# Where do I start?

## Group 1

- List all alignments
- List all blocks

## Group 2

- Get Alignment
- Get Stations

## Group 3

- Get Alignment offset coordinates

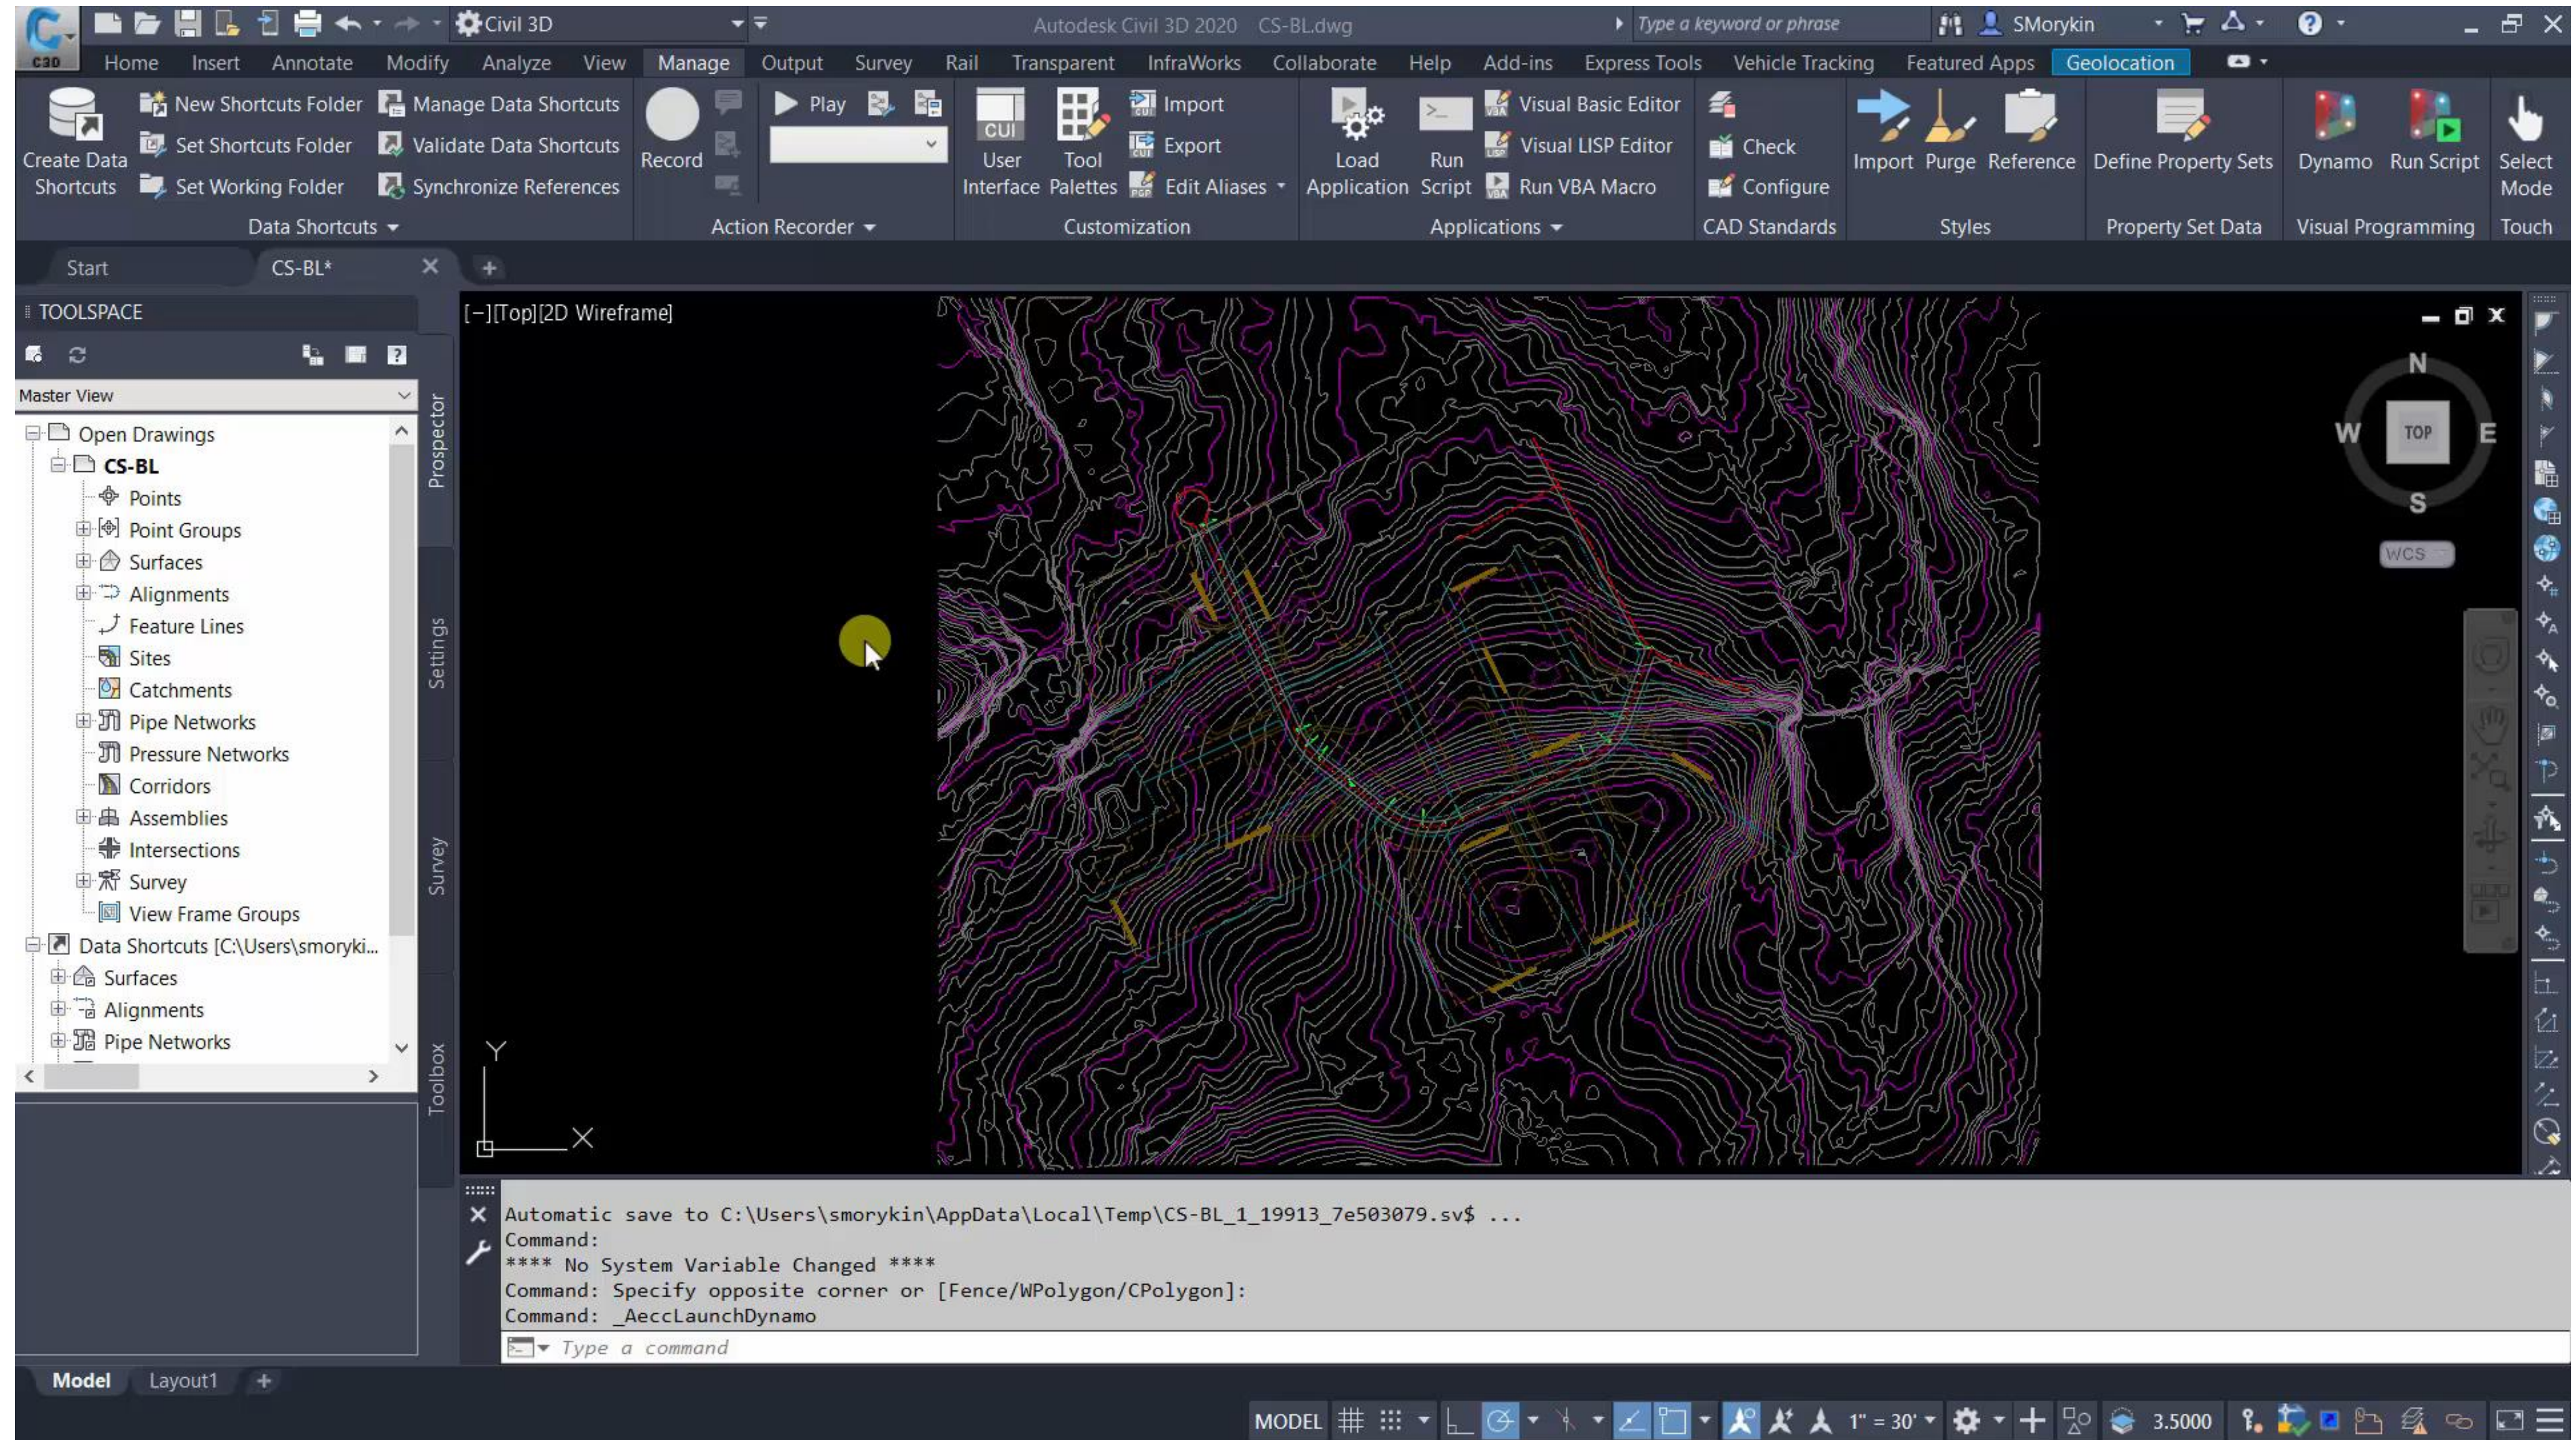

## Group 4

- Create blocks at alignment offsets

# Task 3: Groups 1 & 2

# Try the Exercise Page 57 Handout

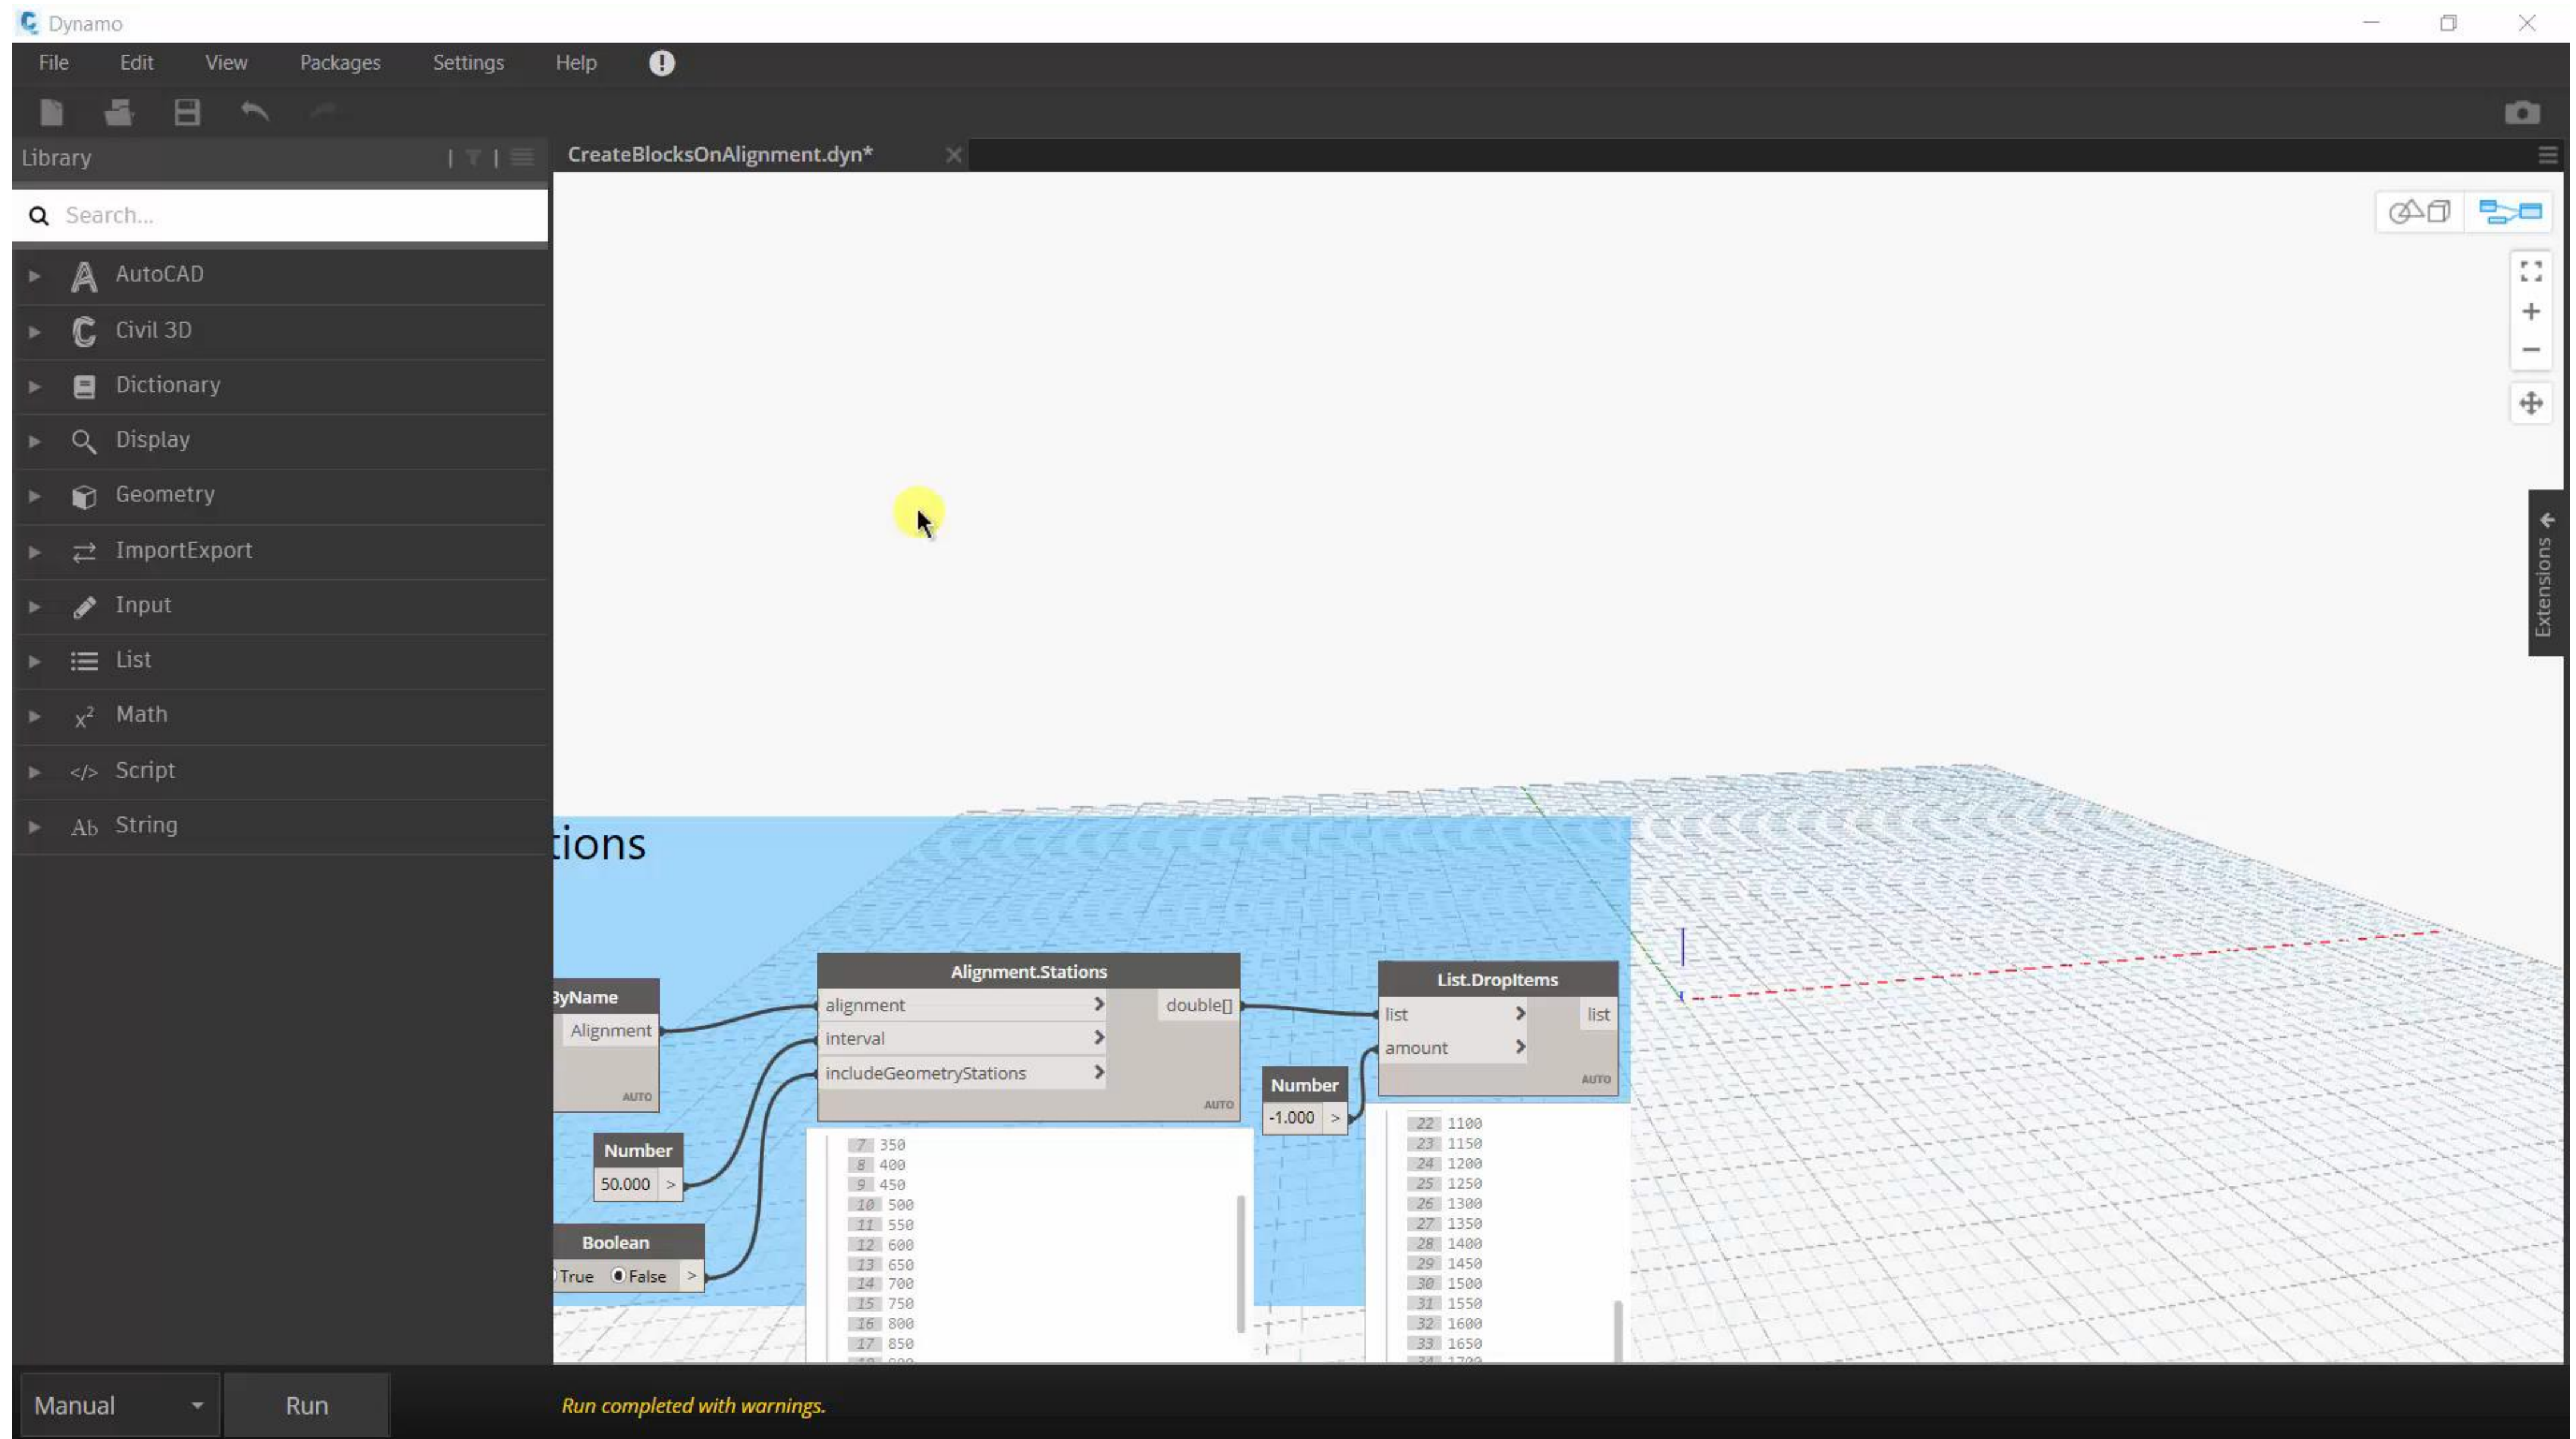

View Video Online - <https://autode.sk/2NoJWYw>

# Task 3: Group 3

# Try the Exercise Page 63 Handout

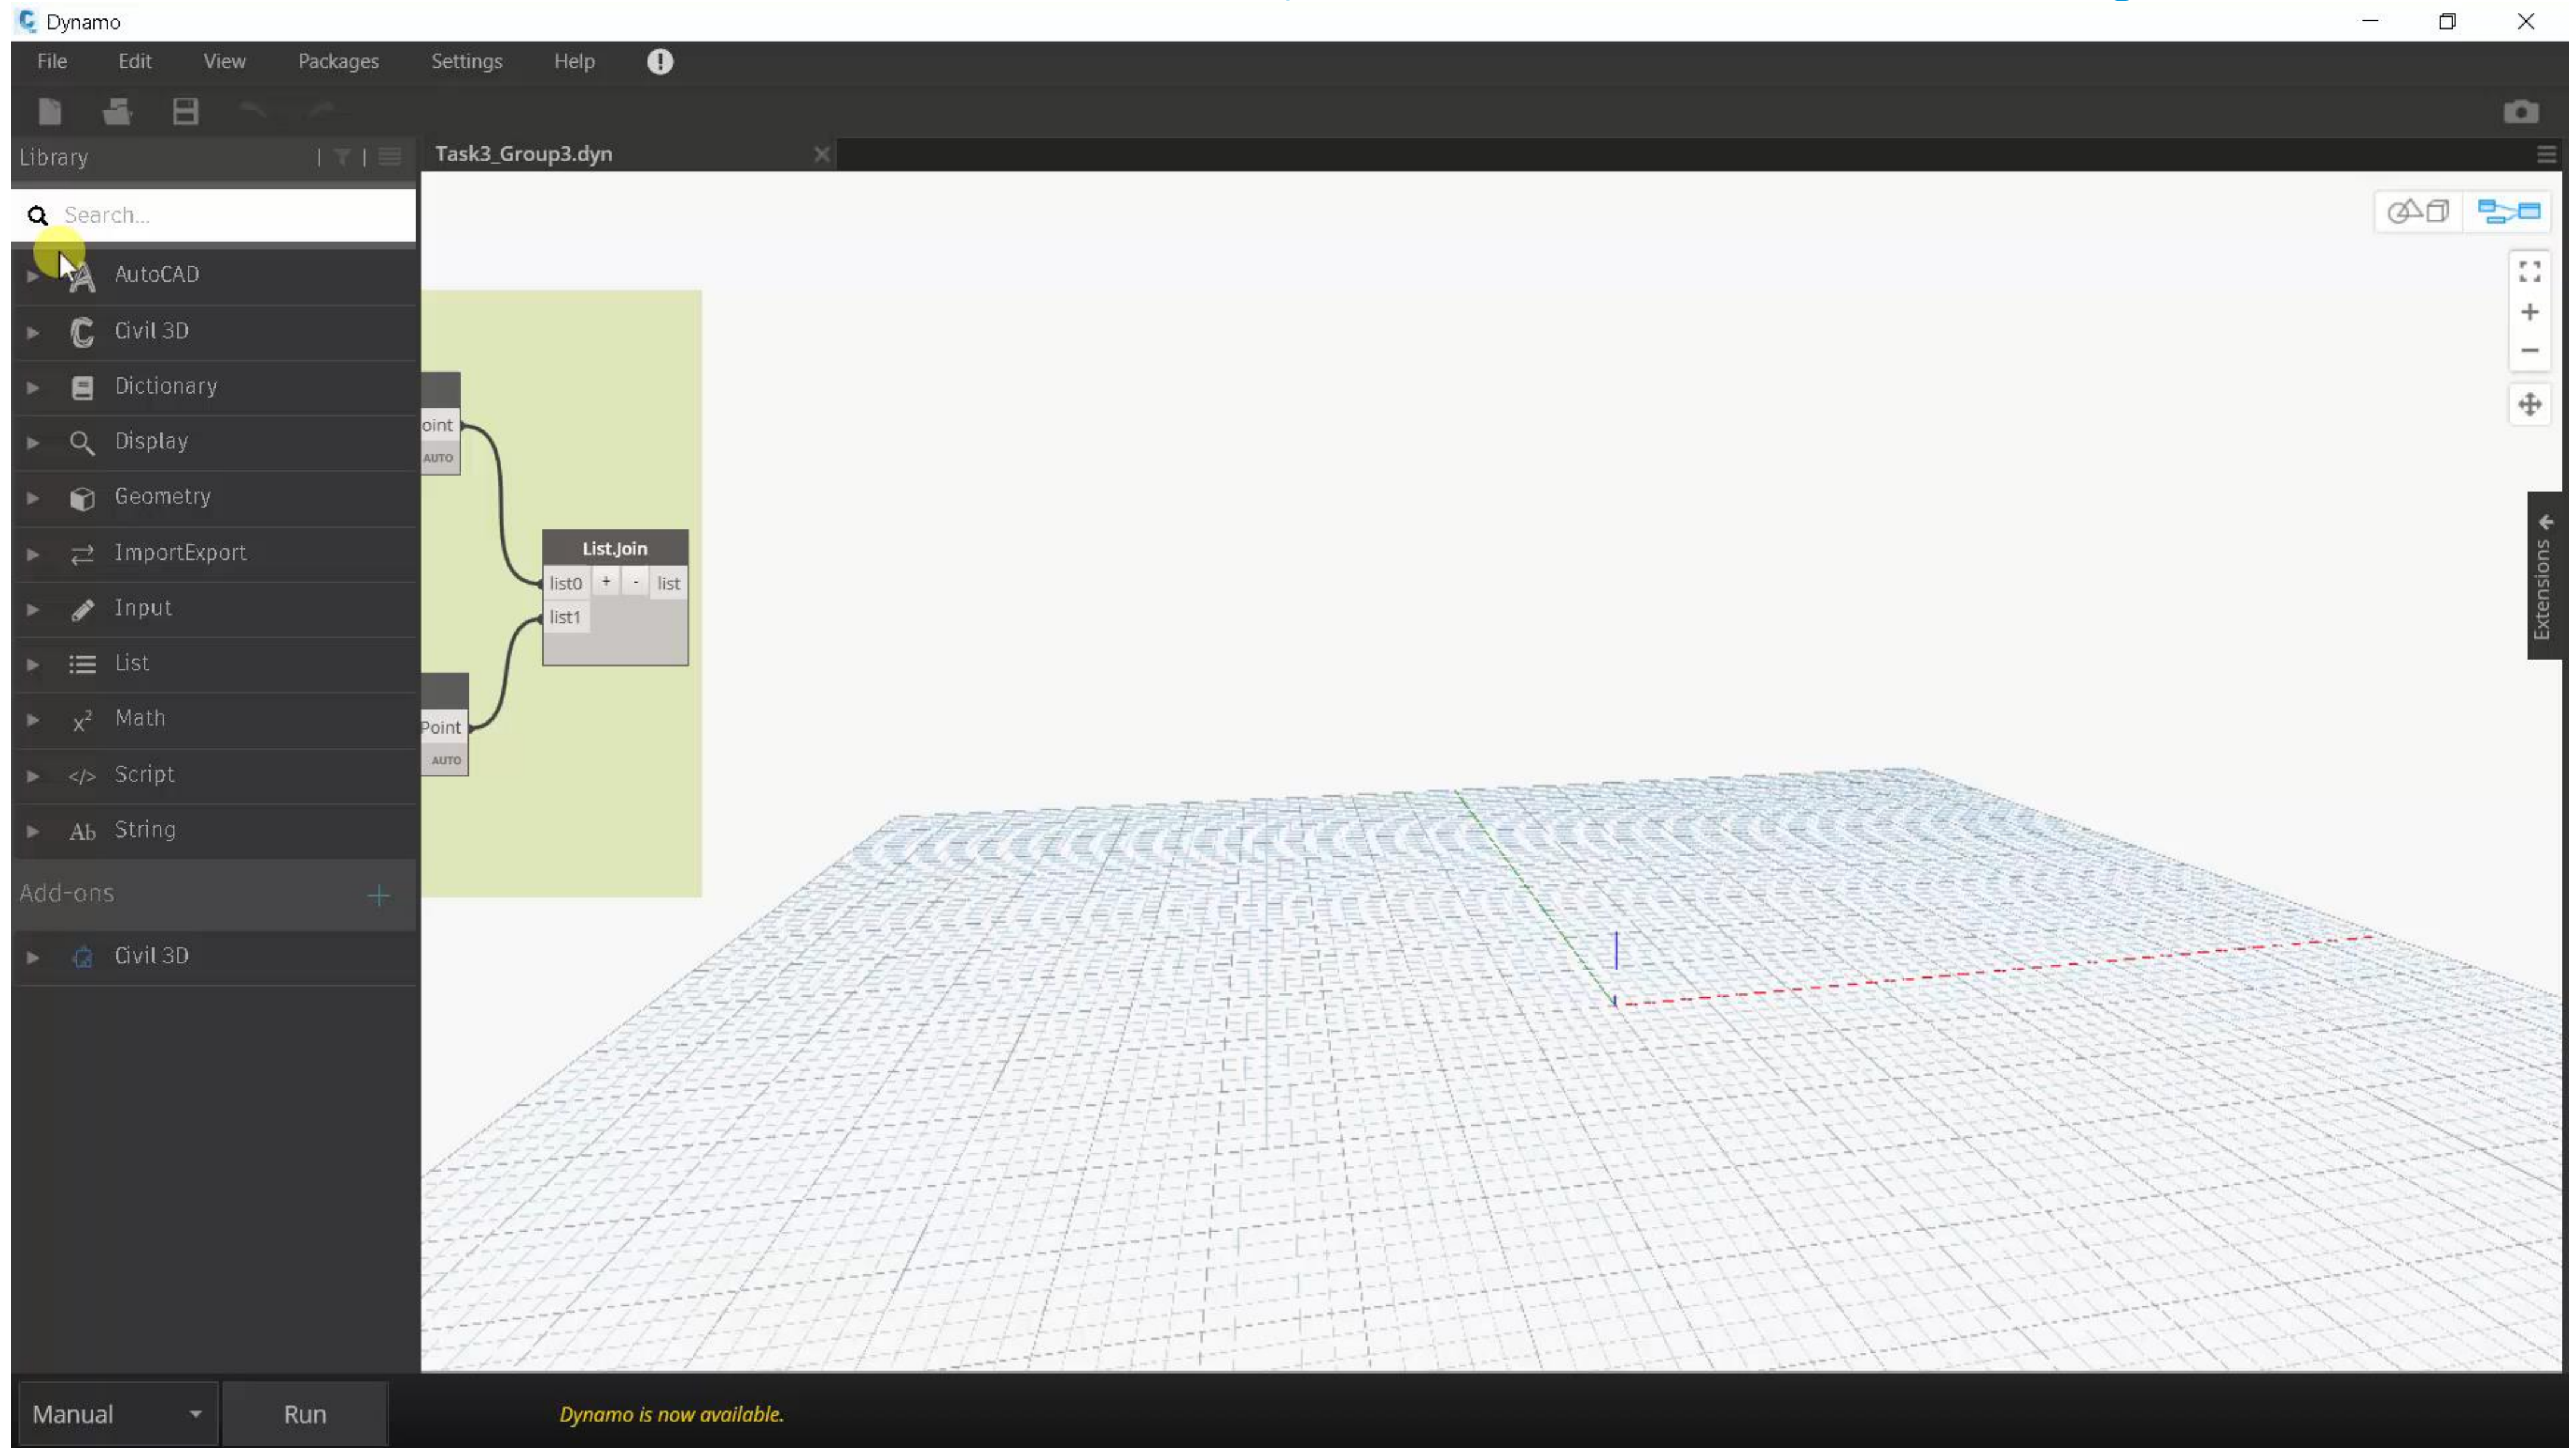

View Video Online - <https://autode.sk/2NSZ8Mw>

# Task 3: Group 4

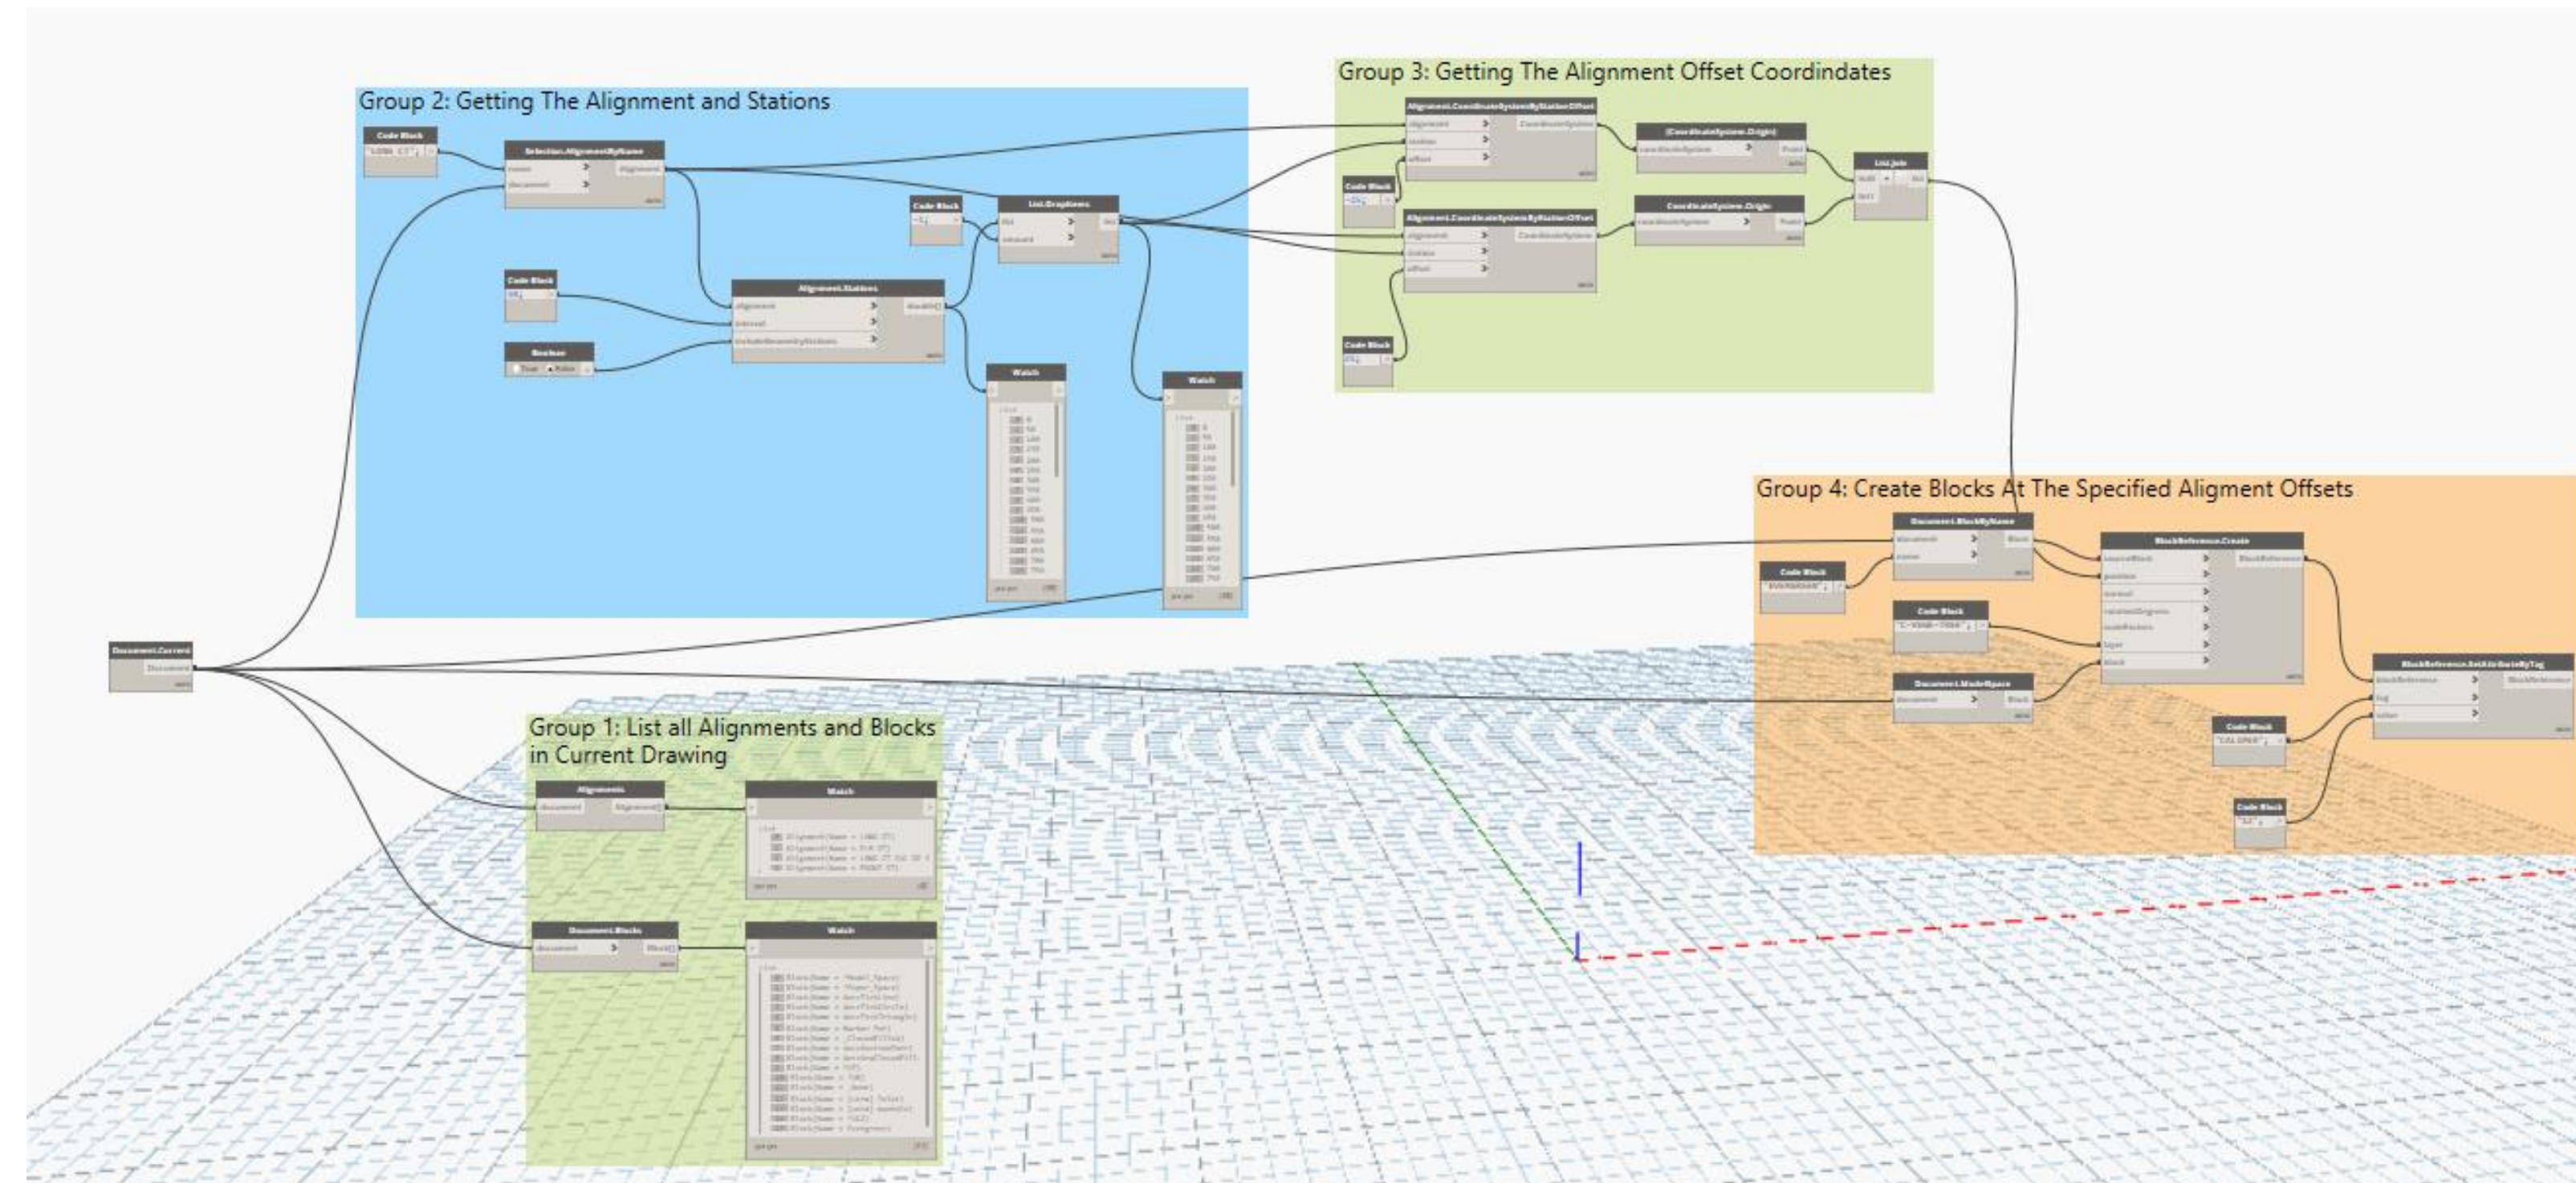

# Try the Exercise Page 67 Handout

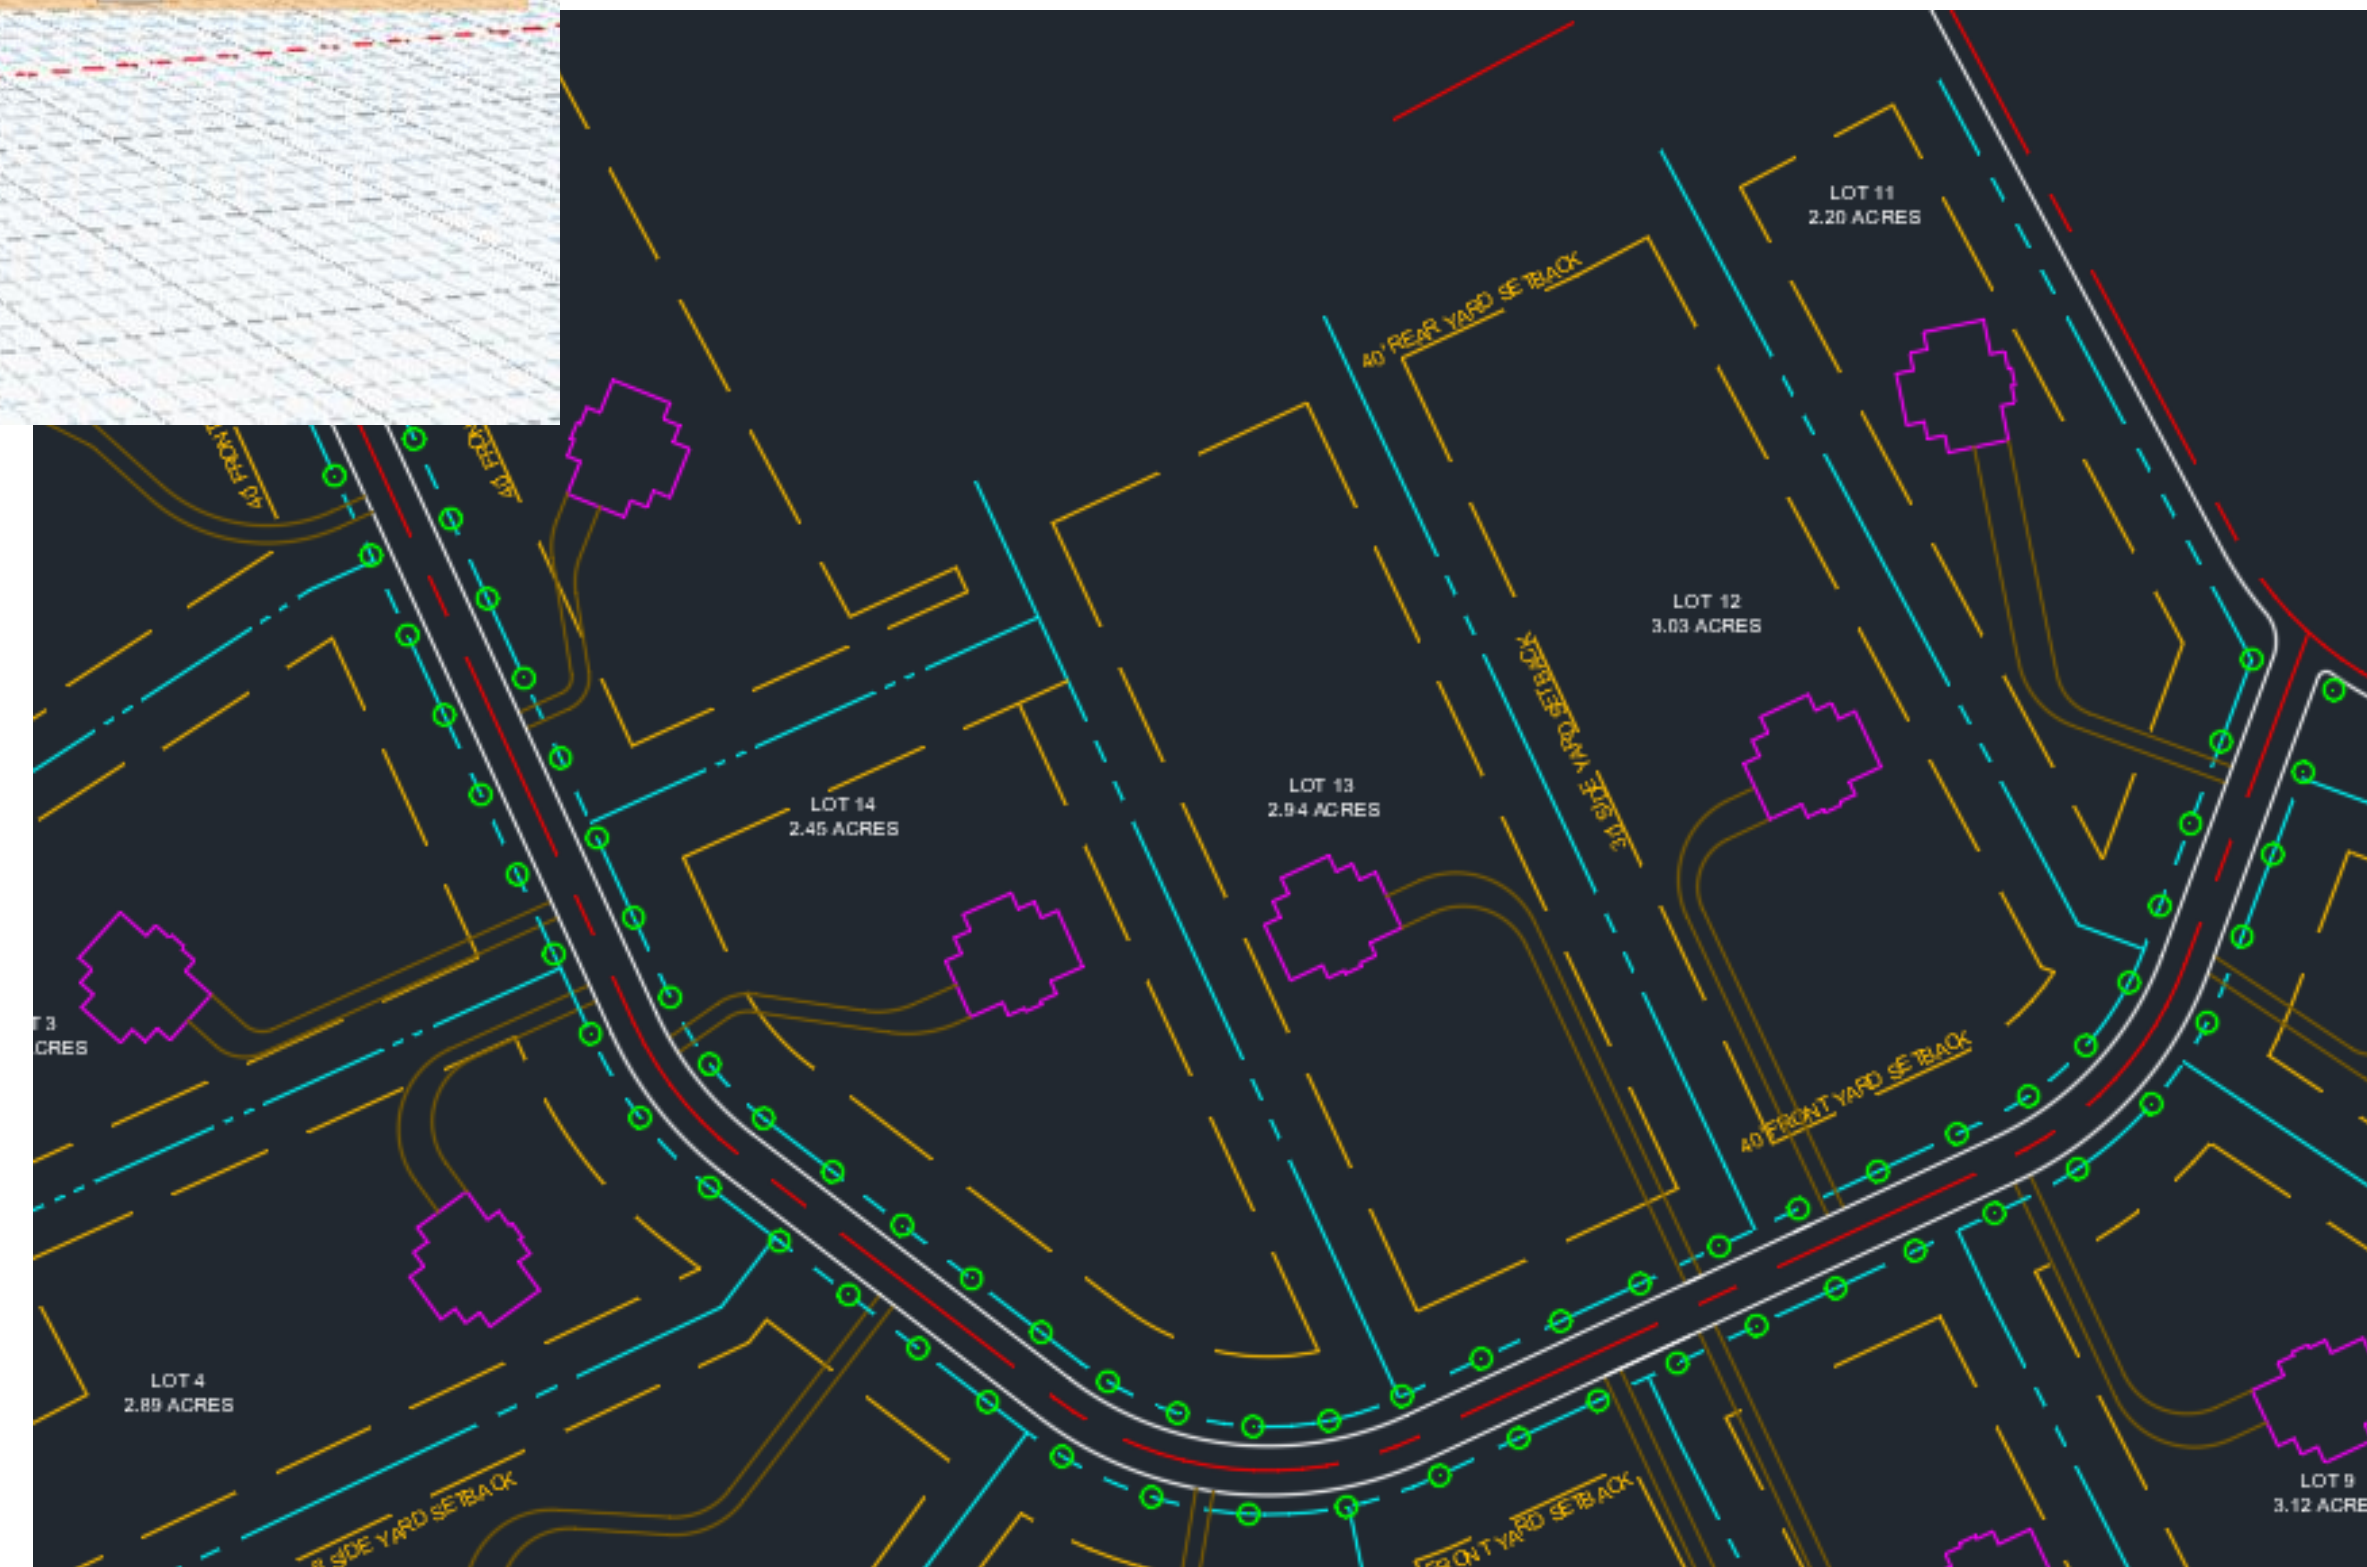

View Video Online - <https://autode.sk/2Q0ylAw>

# Task 3 Conclusion

- Listed stations and offsets along the alignment
- Created blocks along the alignment
- Easily modified for future drawings

# POWER CLAP!

Image caption goes here

# Wrap Up - Closing

# Key Learning Objectives

Identify repetitive tasks in your daily workflow

Learn how to import and manipulate AutoCAD Objects and/or Civil 3D data

Produce Dynamo for Civil 3D scripts to automate repetitive tasks

Discover ways that Dynamo for Civil 3D can elevate efficiency

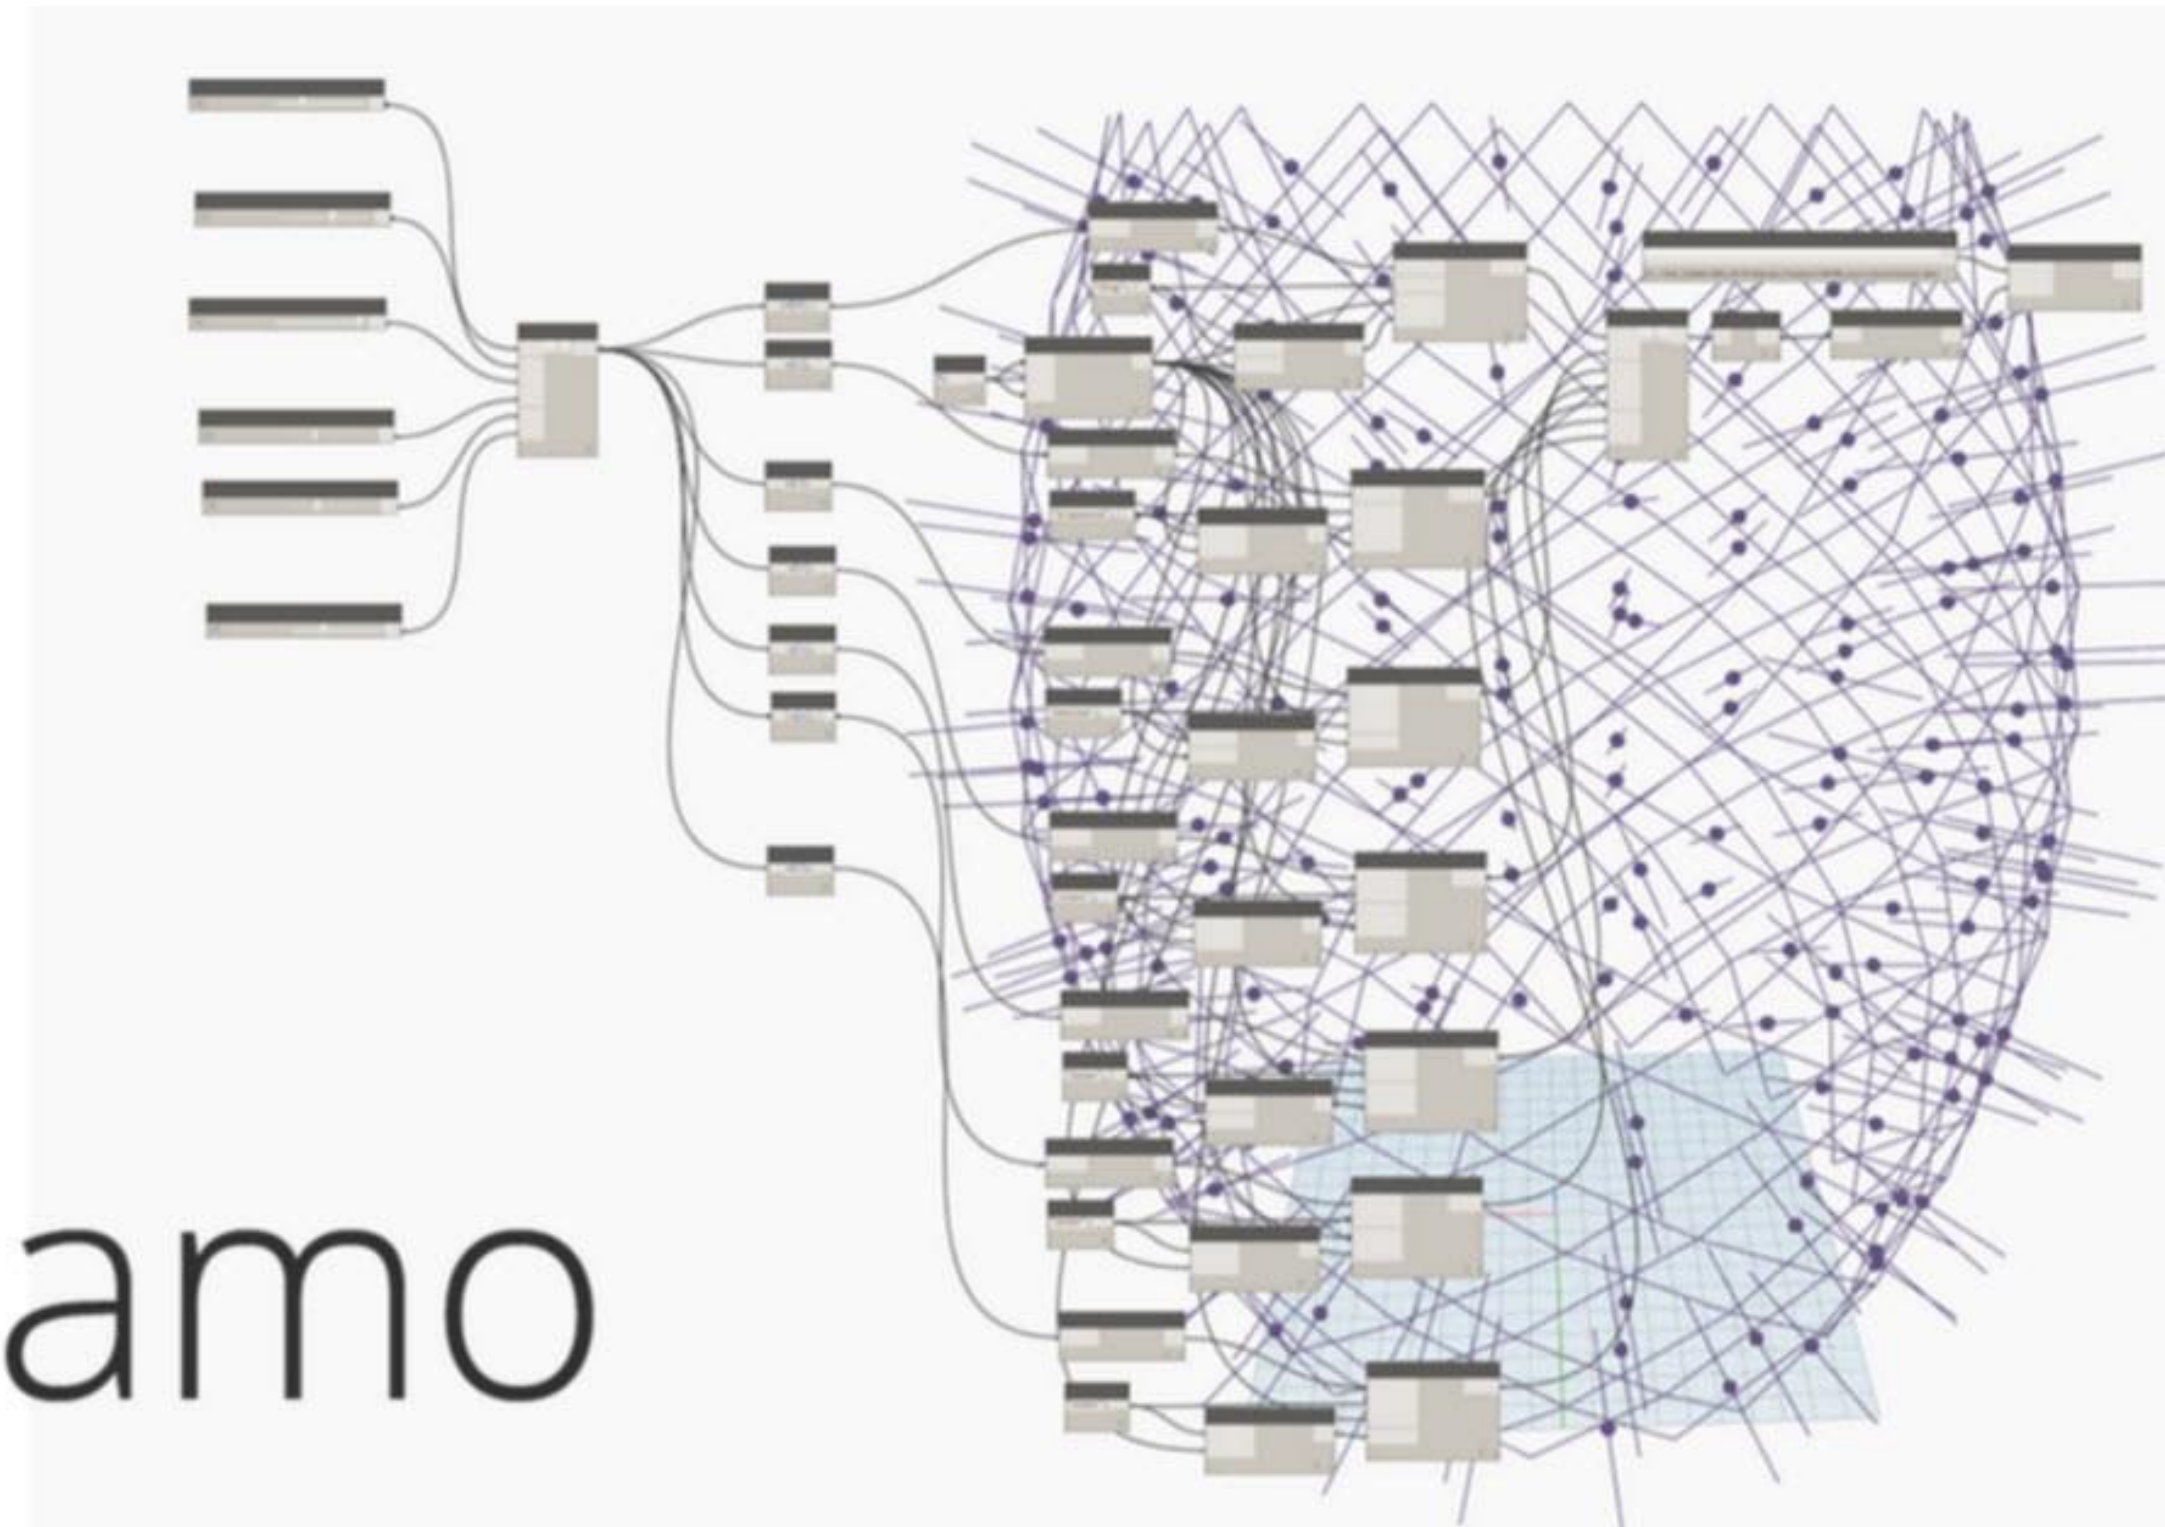

## Handout:

- Bonus Material!
  - Create Cogo Points in DWG
  - Create Points instead of blocks for trees
  - Alternate tree types at interval along Alignment

Mix and match any group in these 3 scripts to create something new!

# Task 2 – Bonus (Dynamo)

- Create Cogo Points from Stations in Group 2
  - Placed on New “Test\_Point Layer”
- New Point Group created
  - Named Algn\_Geometry

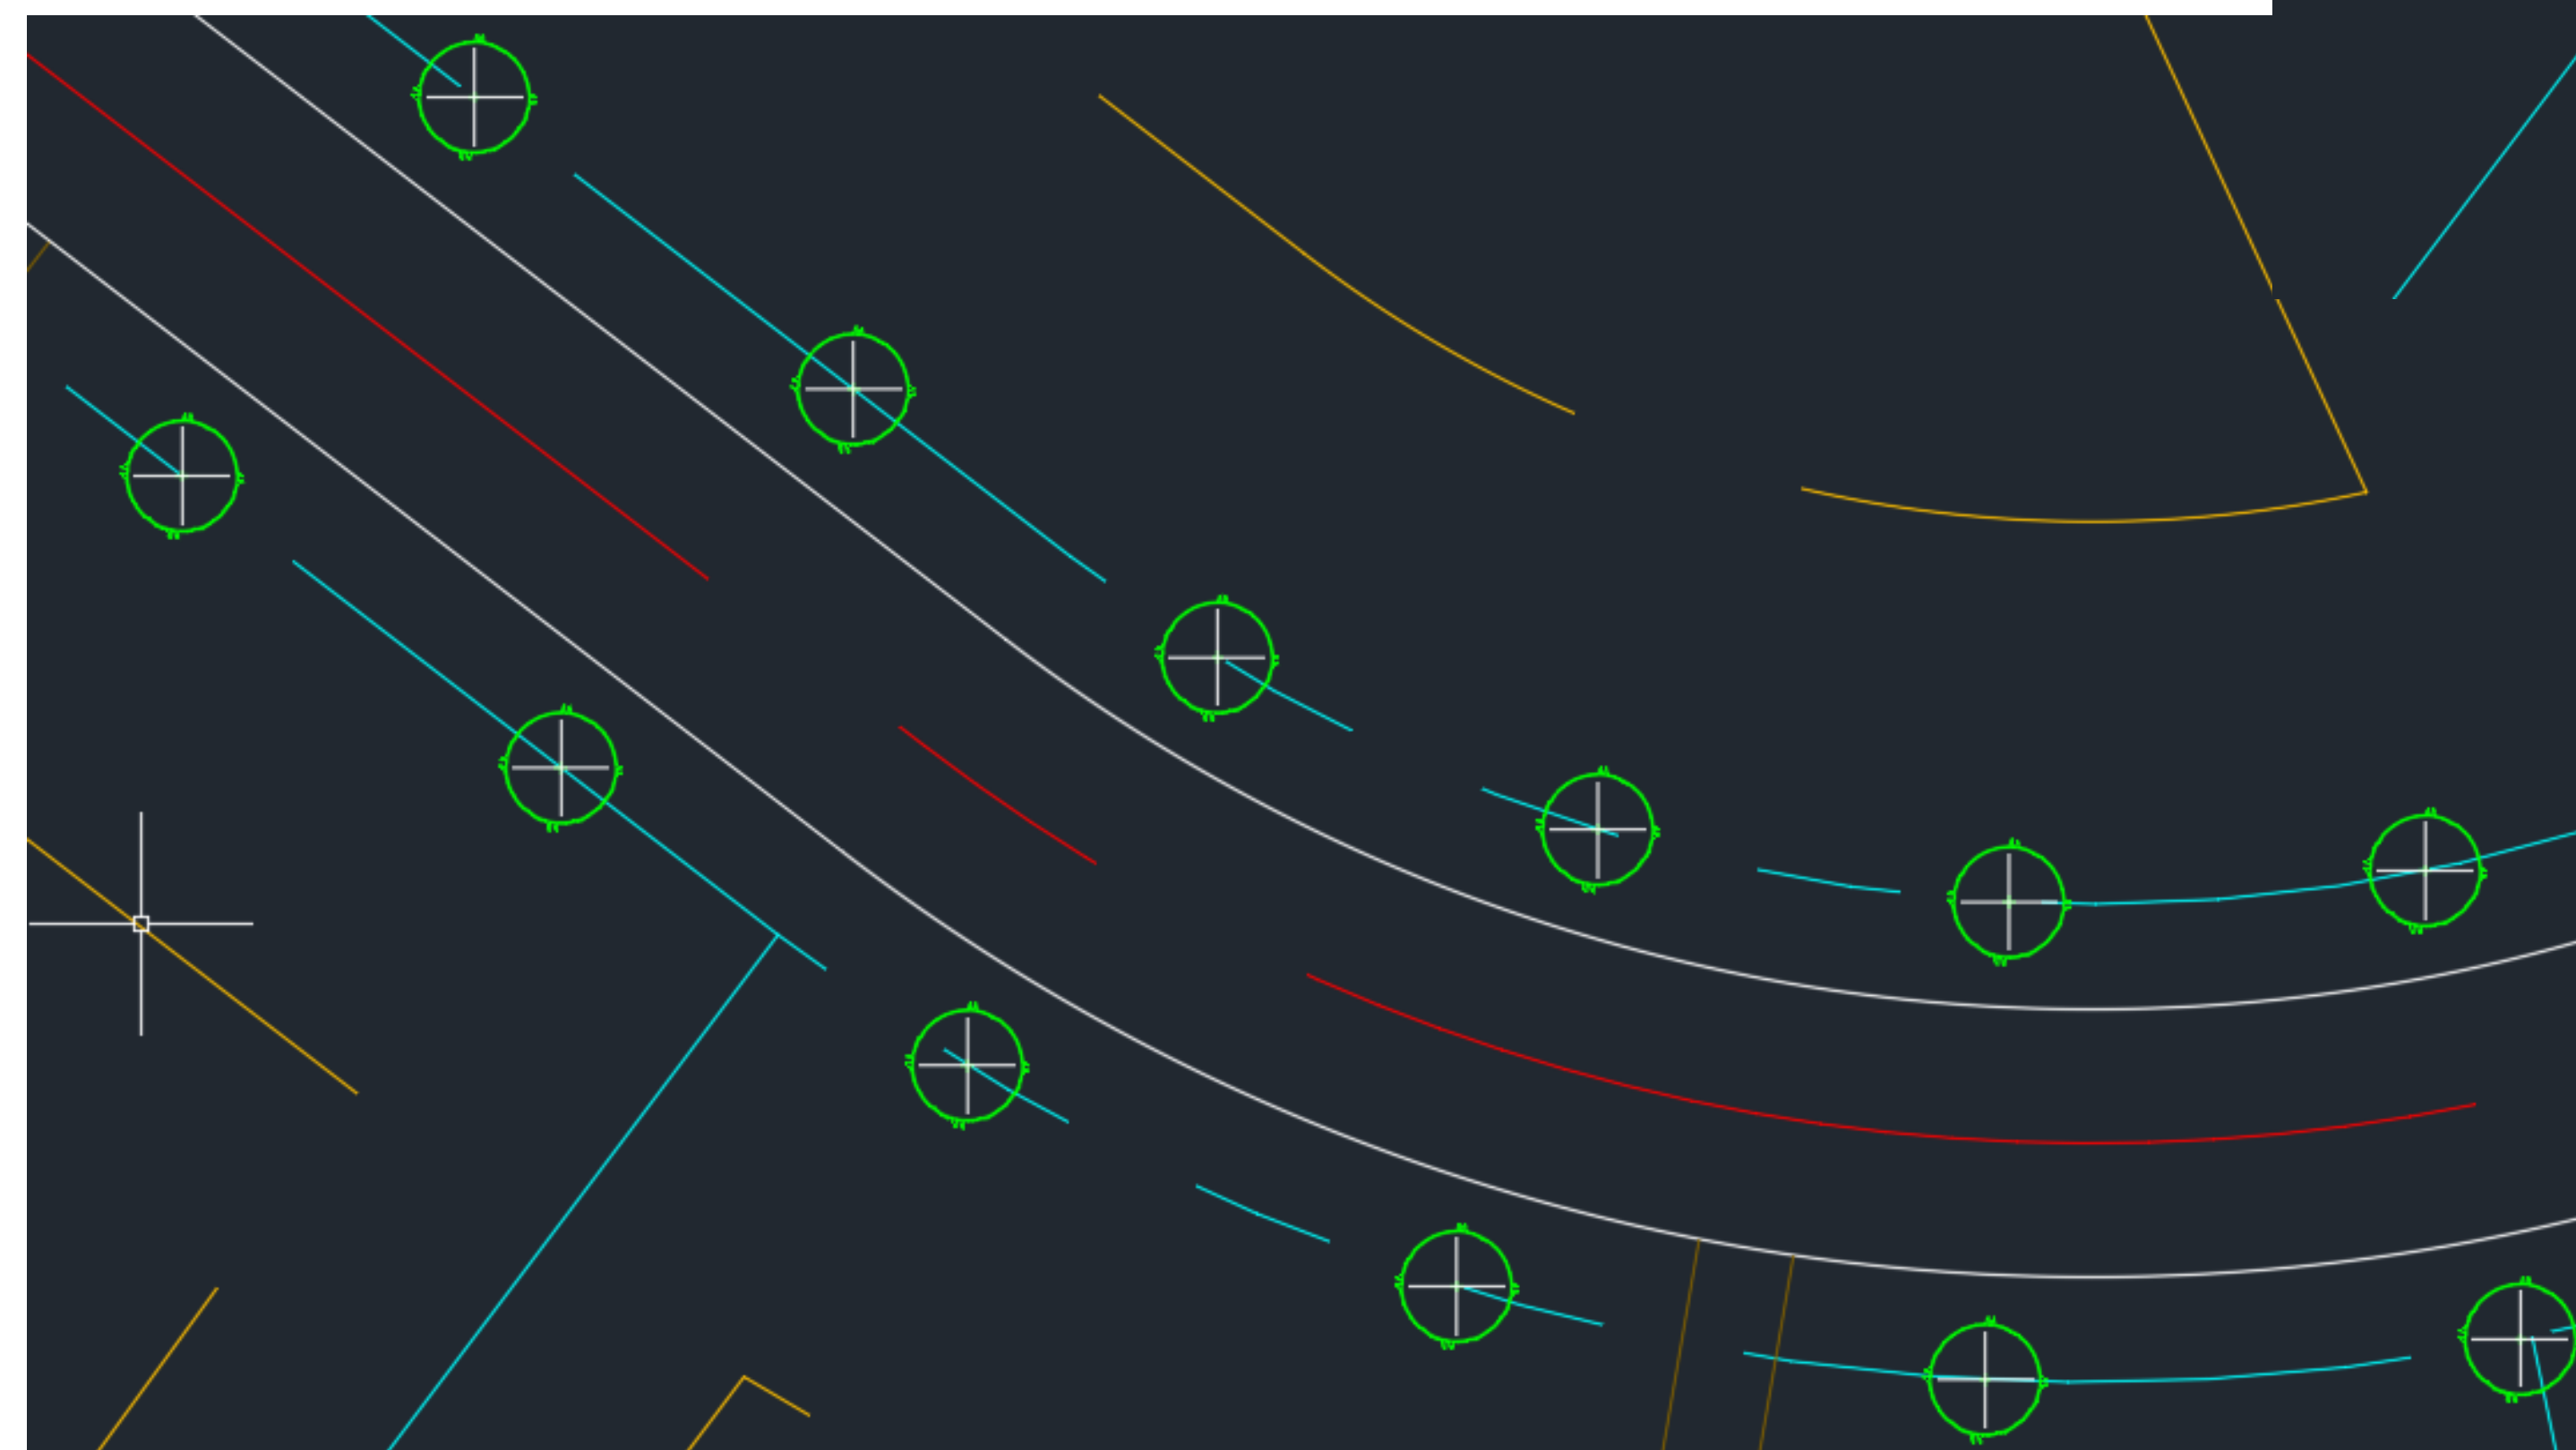

## Bonus Inside Civil 3D

- Cogo Points created at alignment stations & geometry
- Cogo Points on new layer
- New Point Group Created in Civil 3D
  - Dynamo will not add to existing point group

## Task 3 - Bonus

- Create Cogo Points from Stations Offsets in Group 3
  - Placed on New “C-VEGE-TREE” layer
- New Point Group created
  - Named “Proposed Trees”

## Bonus

- Create two different tree types along the alignment
- Type of tree alternates
