AutoCAD Support Clinic

Shawn Niles
Autodesk

Daniel Kuhmann
Autodesk

Volker Cocco
Autodesk

Learning Objectives

- Learn the most productive ways to work with Autodesk Technical Support.
- Learn how to apply the most advanced troubleshooting techniques in your daily job.
- Receive answers to real-world problems that are hindering production.
- Network with members of the Autodesk support team and use this relationship for future support questions that arise.

Description

In this class, a panel of Autodesk experts will share productivity tips and tricks, and answer audience questions about real-time challenges. Attend this class for expert AutoCAD advice. The class will start with a brief presentation to introduce the support organization, the speakers, and the current customer support options. This is a real time Q&A session so please come prepared with questions about AutoCAD that you'd like answered. If you'd like to submit a question beforehand, please email it to shawn.niles@autodesk.com so that it can be researched and answered during the session. A computer will be set up in the class with AutoCAD 2019 software for any attendees who need to demonstrate their issues. Panel experts will include members of the Technical Support, Quality Assurance, and Licensing Teams. This class is primarily a question-and-answer format, with most of the questions coming from the audience in real time.

Speaker(s)

Shawn Niles is a Technical Support Manager at Autodesk based in Boston, Ma. Shawn has over 20 years' experience using AutoCAD, starting with version R12. He spent 6+ years in the support organization at Autodesk supporting all levels of AutoCAD questions, and has been managing one of the AMER based support teams since. Before joining Autodesk, Shawn worked as a CAD Manager in the industry for 10+ years and has been with Autodesk for over 10 years.

Volker Cocco is employed at Autodesk as a Technical Support Specialist and AutoCAD KDE (Knowledge Domain Expert). Volker has been working with AutoCAD software since 1991. He has worked for various Autodesk Resellers since 1997 and has had extensive experience troubleshooting and supporting Autodesk products. With a background in CAD drafting and management, Volker has instructed basic to advanced AutoCAD technical classes including sessions at Autodesk User Group International (AUGI) CAD Camp and Autodesk University. Volker has been with Autodesk for 7 years.

Daniel Kuhmann is a Software Quality Assurance Manager for the AutoCAD Platform Team based in San Francisco, CA, and a Professional Civil Engineer. Dan's main role is to make decisions about the features and wishes added to AutoCAD and to make assignments for who will take responsibility for testing them. Before joining Autodesk 10 years ago, Dan worked in Land Development and Surveying for large subdivisions and as a Design-Build Engineering Technician for a pavement design consulting company. He started using AutoCAD on R10 and has also used ACA, C3D, and LDD in his career.

Introduction to Autodesk Technical Support

The Autodesk Technical Support team assists customers and resellers around the world who are having trouble with Autodesk products. There are 208 product specialists and 53 Installation/Licensing specialists globally located in the US, China, Japan, France, Poland, Singapore, Germany, Ireland, and the UK. These specialists work on cases that come to them through Autodesk Account, product forums, phone calls, web chat, and other sources.

The product teams also spend time writing articles for the Autodesk Knowledge Network and many contribute to blogs and present product webinars. Product specialists also work closely with the product development teams to help resolve defects in the products.

There is also a team of dedicated Premium support specialists and Support Account Managers who work solely with our Enterprise priority support accounts.

Support Programs and Options

The following support options are available to ALL customers:

Knowledgebase

www.autodesk.com/support

www.autodesk.com/autocad-support

<http://knowledge.autodesk.com/support/autocad-lt>

<https://knowledge.autodesk.com/support/autocad-for-mac>

<https://knowledge.autodesk.com/support/autocad-lt-for-mac>

Autodesk Forums

<http://forums.autodesk.com>

Help Webinars

The Autodesk Help Webinar series is designed to showcase time-saving tips and tricks that can be used to immediately increase your productivity. This live set of interactive training sessions hosted by our very own Autodesk Technical Support Specialists offers a unique look into some of the most impactful in-product features and functionality that you may not already be familiar with. These sessions are free to all attendees and prior classes are saved to a YouTube channel for later viewing.

Autodesk Knowledge Network

AKN is a valuable resource that contains over 1 million articles written by Autodesk employees or partners. AKN has tutorials, troubleshooting articles, videos, documentation and downloads about Autodesk products that will prove useful to you. The AKN will be the quickest place to find an answer to any problems you may be having with your product.

<http://blogs.autodesk.com/bim-and-beam/2016/10/24/5-ways-the-autodesk-knowledge-network-will-change-your-life/>

Subscription customers receive all of the above, plus the below options:

Expedited support in the forums

Any forum post made by a subscription customer is automatically brought to the attention of the support team if it goes unanswered for 2 hours or goes without an accepted answer for 8 hours. The support team will then typically respond to the customer within the forum post.

Schedule a Call

Your day is busy. Use this feature to schedule a support call at a future time that fits your schedule. This feature can be found after you log in to your Autodesk Account. You choose the day and time you want your call and then continue working until the time arrives that works best for you and an Autodesk specialist will call you.

Remote Desktop Support

Support specialists can log onto your machine so that you can show exactly what is happening within the program. Save potentially days of emails back and forth explaining your problem by taking advantage of this offer.

Chat Support

Available for Installation & Licensing issues and also certain products, you can request assistance through chat. Sign in to your account to see if your product offers this feature.

Autodesk Services Marketplace

This pay-for-use service connects you with Autodesk approved experts who can provide training and customization.

<https://servicesmarketplace.autodesk.com/>

Subscription customers can choose one of the following two options when choosing to sign up for subscription support with Autodesk:

Advanced Support

1 to 1 phone or web support. Autodesk Advanced Support provides unlimited one-to-one extended hour global phone support from support specialists. Advanced support also includes chat support for certain issues, as well as API Support. In addition to calling support in real time, calls can be scheduled at a time convenient to you and a support specialist will call you at that time.

Enterprise Priority Support

Autodesk Enterprise Priority Support delivers proactive services with dedicated account management and technical resources to help customers more quickly realize the business benefits of Autodesk technologies. A global support team increases efficiency and quickly resolves technical issues, minimizing downtime. Customers establish a strategic relationship with Autodesk, helping shape technology directions. Enterprise support gives users 24x7 access to support specialists.

For more information about Autodesk Subscription services, go to:

<http://www.autodesk.com/subscription/overview>

A quick way to check if you have subscription support is to go to <https://accounts.autodesk.com> and log in. It will then let you know if your account is linked to an active subscription or not and provide a link for additional information.

How to log a support case

Log into the subscription center at <https://accounts.autodesk.com> . From there follow the appropriate prompts to log the type of case that is needed.

Tips when logging cases

- 1) More information is better than less. The support specialist does not know what you know about the issue, so the more information we have to begin with is most helpful.
- 2) Be as descriptive as possible. If the specialist who claims your case does not need to ask for more information, the request can be solved quicker.
- 3) Attach any files that are pertinent to the issue.
- 4) If there are steps necessary to replicate the problem, list these steps, again being as descriptive as possible.
