

Cloud Adoption and its Impact on Roles and Responsibilities of Team Members

Ali C. Atabey

Designated Support Specialist

About the moderator

Ali C. Atabey

is a Designated Support Specialist and a Subject Matter Expert. He works with major AEC companies as a technical advisor providing support, training, and guidance on BIM, Generative Design and BIM 360 Design products. Ali studied architecture at the University of Florida and practiced for over five years in Boston before joining Autodesk. He was a technology leader focusing on mixed-use, high-rise developments as well as healthcare and planned unit developments (PUDs). In his spare time, Ali is an aspiring sailor, drone pilot and snack enthusiast who enjoys adventuring around the world.

Learning Objectives

- Learn how industry leaders recognize changes, challenges, and opportunities within BIM360 Design and gain a first-hand impression of their journey.
- Discover how to become a champion for cloud projects in your organization and understand the value it brings to a project team
- Get the inside scoop on how to setup a team for success in a BIM360 Design project
- Learn how the BIM360 platform improves team collaboration

“The Power of Data”

Almost every industry is on an expedition to find ways to use data for their benefit or use it in a way to differentiate themselves from competition. Architecture, Engineering, and Construction is no exception to this. In fact, many see Data/Big Data as an untapped potential for these industries due to their track record on historic technology adoption.

Why is this relevant to us, here today?

BIM 360 = Unified Solution

BIM 360 platform brings a unified solution that supports a centralized collection and use of data – common data environment that puts the project in the center.

- Project information digitized, collected and stored in a central location
- Guided handoff of information across project phases
- Leverage the entire project data set in unity
- Connected information to provide project wise insight into data and trends
- Better predictability
