

BLD502300 | Integrating Autodesk Tandem with Business Intelligence Data Flows

Dave Campanas
Product Expert | Safe Software

Agenda

- Introduction to Tandem
- Introduction to FME
- Preparing Tandem for FME connections
- Using FME to update Tandem from Excel
- Using Tandem with real time BI dashboards
 - Using FME Server Automations to
 - Monitor and update Tandem from IoT
 - Update Power BI dashboard from Tandem

Autodesk Tandem

Autodesk Tandem

- Cloud based Digital Twin Solution
- Populated from Revit or IFC BIM data
- Extensible through user defined parameters and templates

Autodesk Tandem

- Currently a Descriptive Twin
- FME can be used to improve Tandem's data connectivity
- Boost Tandem up the scale by integrating with other digital data sources

Verdantix Digital Twin Maturity Model

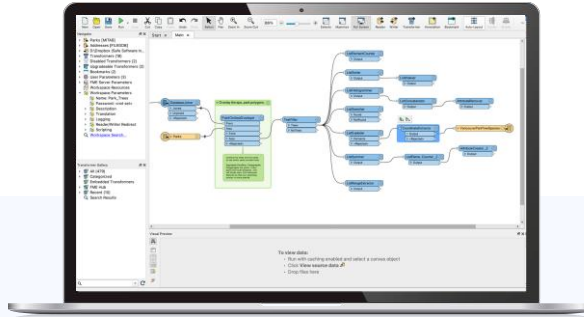

The FME Platform

Run Your Business on Data

FME® Enterprise Integration Platform

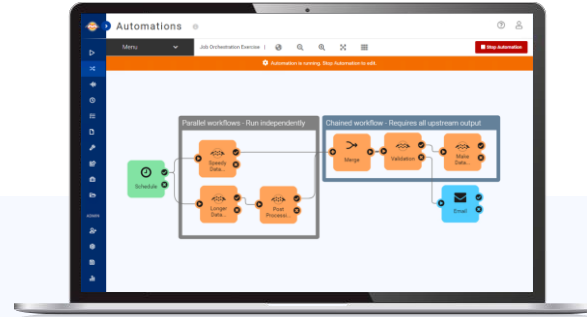

*The **only** Enterprise Integration Solution with comprehensive support for Spatial Data*

FME Desktop

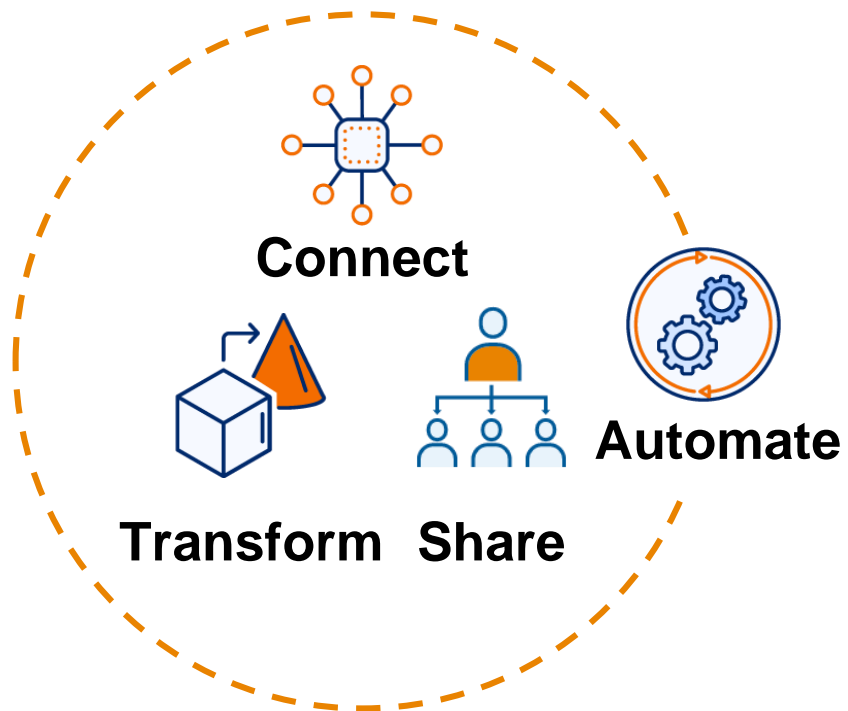

Build & Run Data Workflows

FME Server

Automate Data Workflows
Can be hosted on **FME Cloud**

*Powering your dataflows **on premises and in the cloud***

Power your business decisions with enterprise integration and no-code automation.

- Connect data across **450+ systems** including geospatial data, big data, and real-time data
- Combine, restructure, and transform your data with over **500+ transformers**
- Automate your data workflows including **batch, event-based, and stream processing**.
- Improve data accessibility and sharing with **self-serve apps**
- Scale to your organization's needs with **flexible, secure, and platform-agnostic deployment**

Preparing Tandem

Preparing Tandem

- Add new Parameters to store linked data
- Create Forge App to communicate with Tandem REST API

Using Tandem with real time BI dashboards

Using Tandem with real time BI dashboards

- Update Tandem from IoT sensors
- Update Power BI dashboard from Tandem in real time

Data Flow using REST APIs and Webhooks

Conclusion

Conclusion

- Tandem twins can be set up from Revit or IFC data
- FME can be used to extend Tandem with external data
- FME Server can easily enable complex automated data flows with Tandem
