What is Arnold?

- Path tracing in production pioneer
- Scales well for large scenes
- Addresses complex rendering challenges
- Comprehensive C++ and Python API
- Compatible CPU and GPU rendering
- Ships with Maya and 3ds Max
- Plugins for Houdini, Cinema 4D, Katana,...

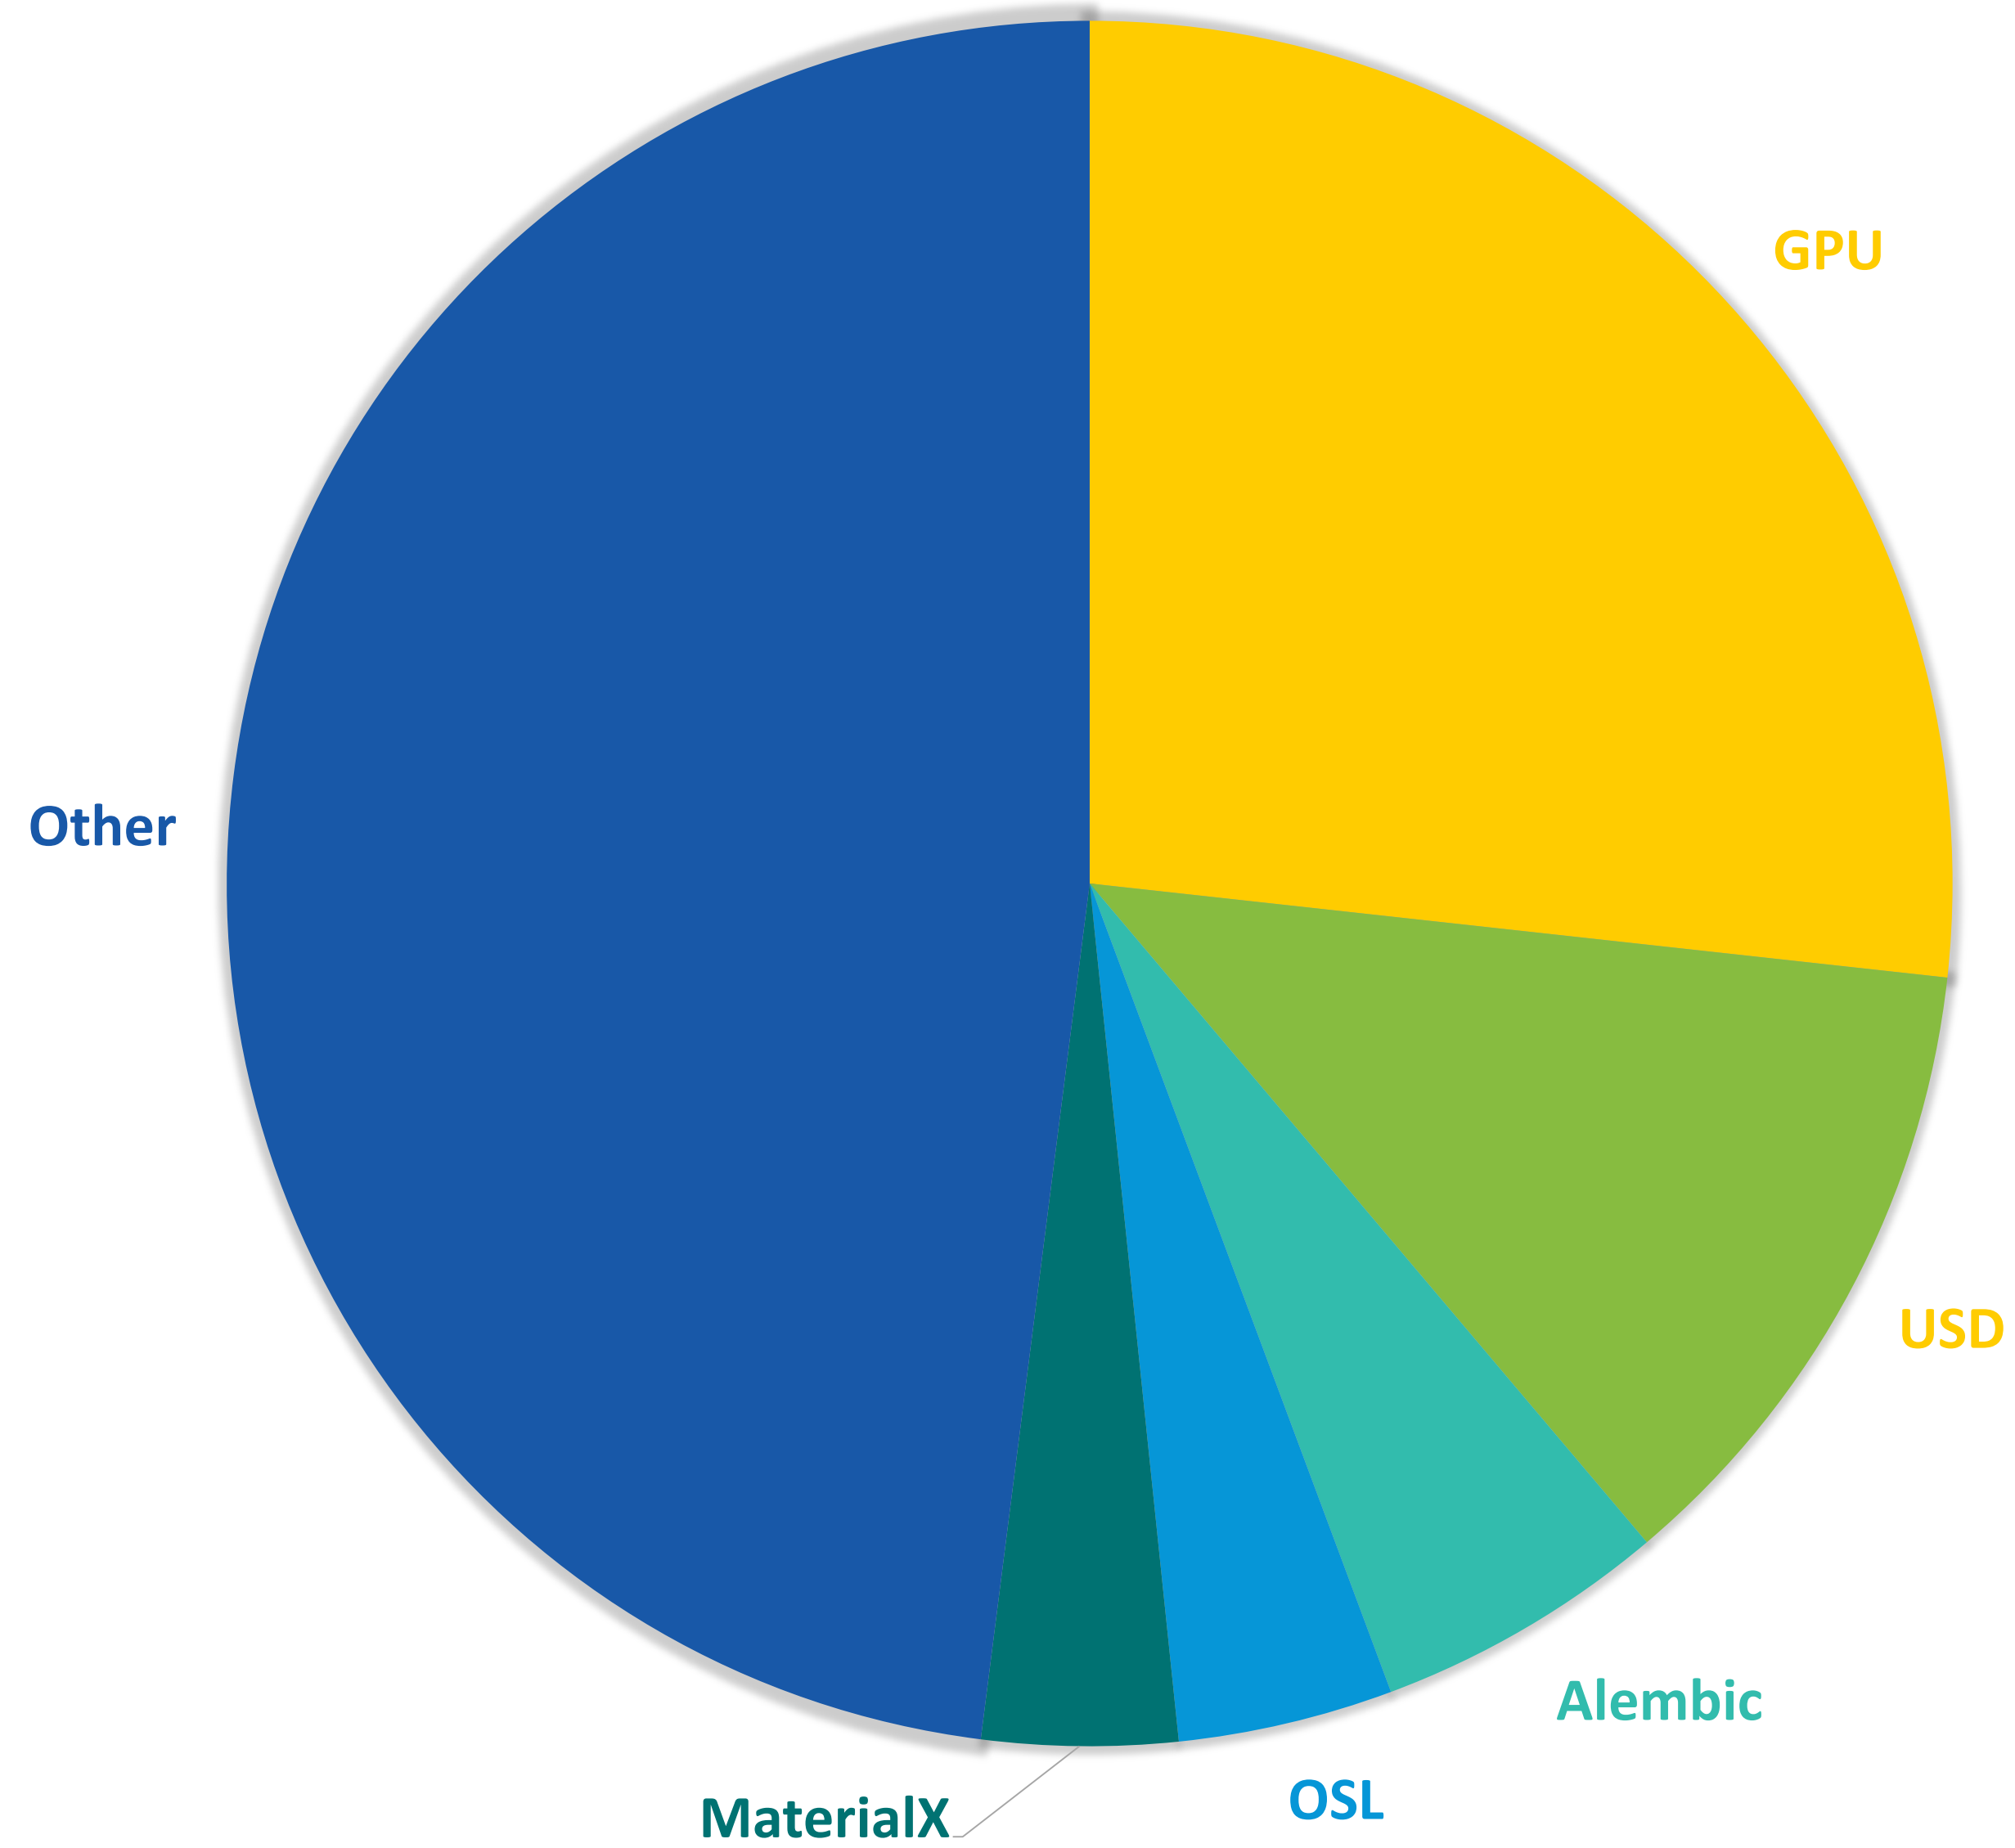

Release Pace

Material Transfer in Production using Arnold and MaterialX

LEARNING OBJECTIVES

- Transport your looks across supported software easily.
- Build Modify and Edit your looks all along your pipeline.
- Setup your pipeline for high flexibility and re-use
- Scale your pipeline combining modular looks across software.

ARNOLD – USD @ AU 2020

Arnold + USD = Love

Frederic Servant

Leverage the power of Pixar's USD with Arnold in production scenarios. We'll show examples of exporting and importing USD assets including full shading, material assignments and render setup, from any of the application that Arnold supports, such as Maya, 3ds Max, Houdini or Cinema 4D and demonstrate how you can take advantage for the power of USD's composition and variants to address common scenarios in modern studio pipelines. All of Arnold's effort for USD is open source, you'll learn what's out there and how you can contribute.

- Hide key learnings

- Import and export USD from any of the Arnold supported applications.
- Leverage Arnold and USD to build studio pipelines
- Use Arnold and USD in production today.
- Understand the Arnold commitment to Open Source for USD
