

Arnold + USD = Love

Frédéric Servant

Senior Software Development Manager | @fredericservant

About the speaker

Frédéric Servant

Frederic is the Arnold Software Development Manager and is based in London, where he looks over the Arnold core and plugins teams scattered around the globe. He was previously the main developer of the Arnold integration in Houdini. Prior to working on Arnold, Frederic worked as an R&D Engineer at The Mill in London and La Maison in Paris.

What is Arnold?

- Path tracing in production pioneer
- Scales well for large scenes
- Addresses complex rendering challenges
- Comprehensive C++ and Python API
- Compatible CPU and GPU rendering
- Ships with Maya and 3ds Max
- Plugins for Houdini, Cinema 4D, Katana,...

What is USD?

- Framework for interchange of 3D computer graphics data
- File format
- Non-destructive edits
- Variants and opinions
- Created by Pixar

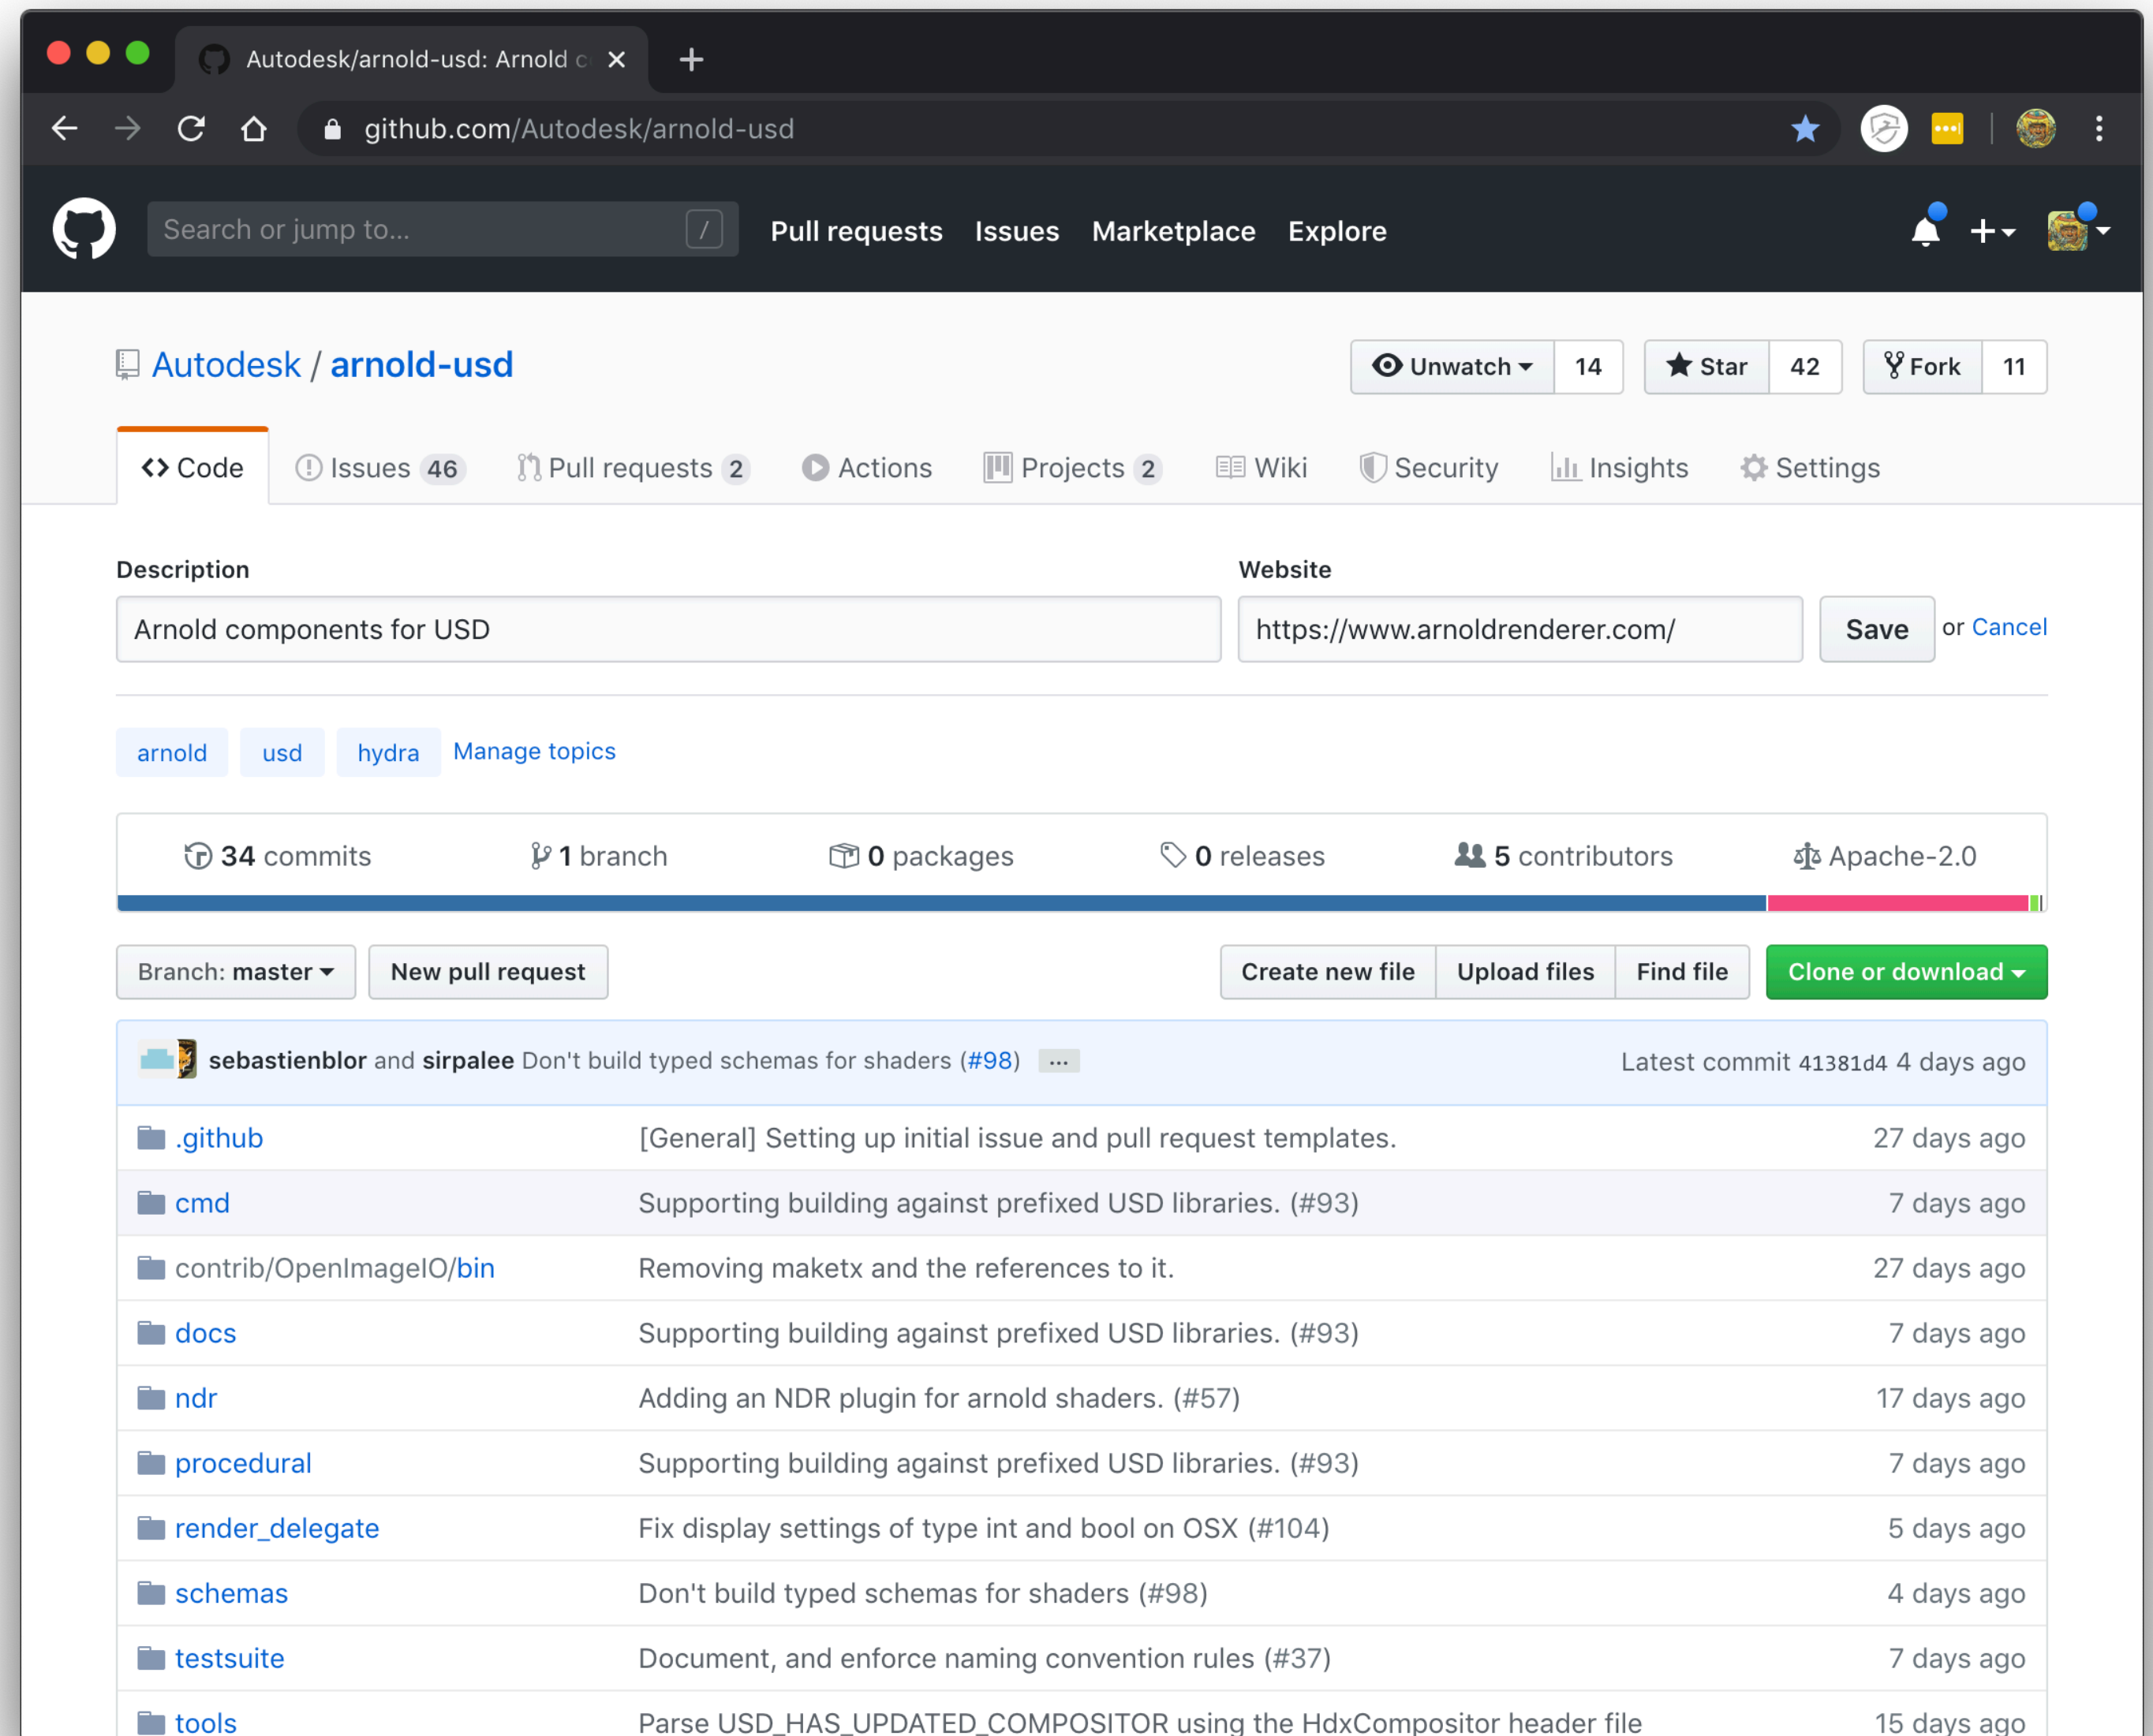

Arnold USD

About the speaker

Sébastien Blaineau-Ortega

Sebastien has been working on the Arnold-to-Maya plugin (MtoA) for several years, and on the USD support in Arnold. He developed the Arnold RenderView and works occasionally on Arnold core. He works remotely from a small village near Marseille, France. Prior to joining the Arnold team, he worked at “The Bakery” on a lighting tool called Relight, and in French VFX studios (BUF and Def2Shoot).

Arnold and Hydra

About the speaker

Pal Mezei

Pal is a software engineer with more than 12 years of professional experience, in animation, visual effects and software development. He started his career working on commercials and trailers for games like Mass Effect and Assassin's Creed. He first joined the Arnold team in 2012 for 3 years before heading to the land of roos to work on Marvel movies like Antman, Avengers or Doctor Strange. In his free time, he likes playing games, writing silly stuff, climbing the ivory tower and dreaming about the future where programming is memory safe, high performance and functional.

Hydra High-Level Overview

What's next?

This is tentative!

- USD Lux upcoming changes
- Custom schemas for procedurals and shaders in Storm/HoudiniGL
- Light linking support
- Plugin architecture for procedural and delegate
- Better Maya/Katana/Max support
- Scenegraph Location Decorator for USD Katana
- Shaders per channel connections
- Native .ass support
- USDZ support
- Arnold nodes & procedural support in Hydra
- Improving documentation
- Moving to CMake
- More tests
- ***Your feature here***

Thank you!

- Luma Pictures
 - RodeoFX
 - Superprod
 - Qvisten Animation
 - Megalis
 - Skydance
 - ...
- Pixar
 - SideFX
 - OTOY
 - The Foundry
