Safe Harbor Statement

The presentations during this event may contain forward-looking statements about our outlook, future results and related assumptions, total addressable markets, acquisitions, products and product capabilities, and strategies. These statements reflect our best judgment based on currently known factors. Actual events or results could differ materially. Please refer to our SEC filings, including our most recent Form 10-K and Form 10-Q filings available at www.sec.gov, for important risks and other factors that may cause our actual results to differ from those in our forward-looking statements.

The forward-looking statements made in these presentations are being made as of the time and date of their live presentation. If these presentations are reviewed after the time and date of their live presentation, even if subsequently made available by us, on our website or otherwise, these presentations may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statements.

Statements regarding planned or future development efforts for our products and services are not intended to be a promise or guarantee of future availability of products, services, or features but merely reflect our current plans and based on factors currently known to us. Purchasing decisions should not be made based upon reliance on these statements.

github.com/Autodesk/arnold-usd

The screenshot shows the GitHub web interface for the repository `Autodesk/arnold-usd`. The browser's address bar displays `github.com/Autodesk/arnold-usd`. The repository page header includes the repository name, a search bar, and navigation links for Pull requests, Issues, Marketplace, and Explore. The repository statistics show 14 Unwatched items, 42 Stars, and 11 Forks. The main content area features a tabbed interface with 'Code' selected, and links to Issues (46), Pull requests (2), Actions, Projects (2), Wiki, Security, Insights, and Settings. The 'Description' section contains a text input field with 'Arnold components for USD' and a 'Website' input field with 'https://www.arnoldrenderer.com/'. Below this, there are topic tags for 'arnold', 'usd', and 'hydra', along with a 'Manage topics' link. The repository statistics bar shows 34 commits, 1 branch, 0 packages, 0 releases, 5 contributors, and Apache-2.0 license. At the bottom, there are buttons for 'Branch: master', 'New pull request', 'Create new file', 'Upload files', 'Find file', and 'Clone or download'.

▼ No Sprint 112								
39 Sdr node discovery results should be consistent across renderers						bug		
40 Smart opaque doesn't work with instancer in Hydra or in the procedural			Todo			bug core instancing user		
42 Preview Surface opacity should translate to arnold transmission						bug		
43 Support camera's aperture parameters in the delegate			Todo			bug render delegate user		
44 Propagate render status as exit code						bug render delegate user		
45 Support horizontalApertureOffset and verticalApertureOffset camera attributes			Todo			enhancement render delegate		
46 Support asset attributes for filenames when no tokens are present			Todo			enhancement		
47 Make node names consistent between the delegate and the procedural			Todo			enhancement		
48 Motion Blur UsdSkel, Hydra		sebastienblor and ...	Todo			bug render delegate scene format user		
49 Bring back schema library as an optional component to build						build enhancement user		
50 Default lighting not showing up in Solaris and Usdview			Todo			bug houdini investigate render delegate user		
51 Warning "USD arnold attribute b not recognized"		sebastienblor	Todo			bug procedural		

Arnold USD

USD as a file format for Arnold

- Arnold data can be fully represented in USD
- Save / Load USD files
- Extensions to USD
 - Arnold Schemas
 - Arnold Shader
- Render USD files in standalone (kick)

Maya USD

Open Source Development

github.com/Autodesk/maya-usd

Maya USD

- Export Maya scenes as USD
 - Extensible framework

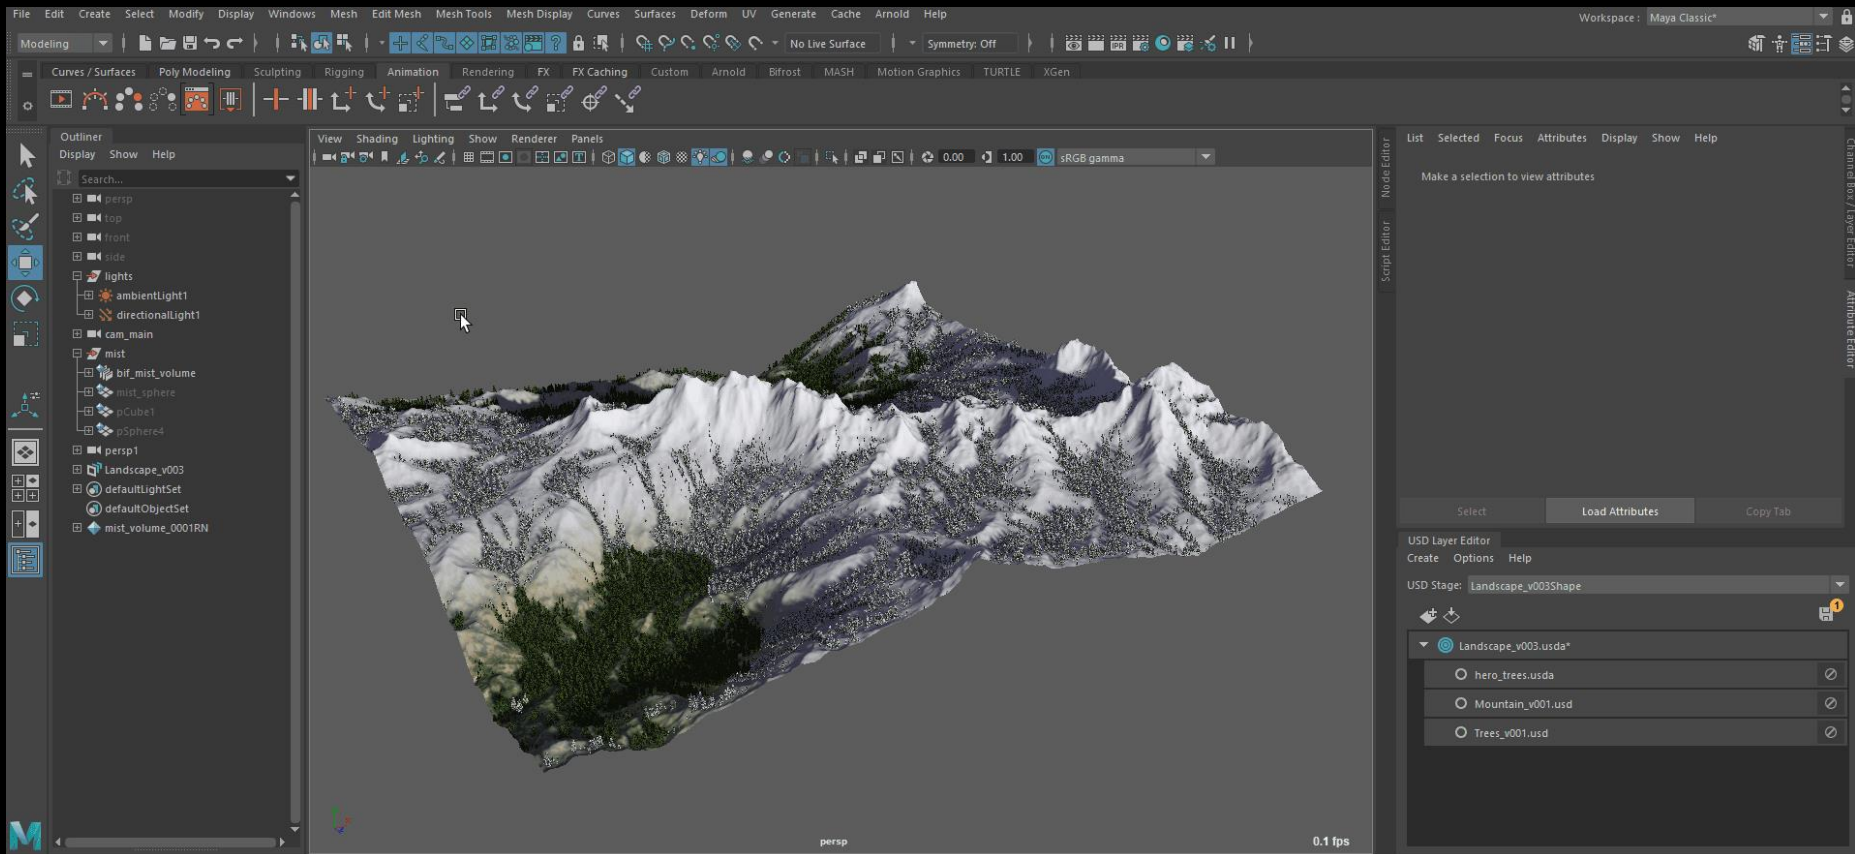

Maya USD

- Export Maya scenes as USD
 - Extensible framework
- Load USD with usdProxyShape
 - Single Maya node
 - USD scene hierarchy in outliner
 - Edits in Attribute Editor
 - Manipulators (move, hide, etc..)
- Create primitives in USD stage
 - Supports custom schemas
- USD Layer Editor

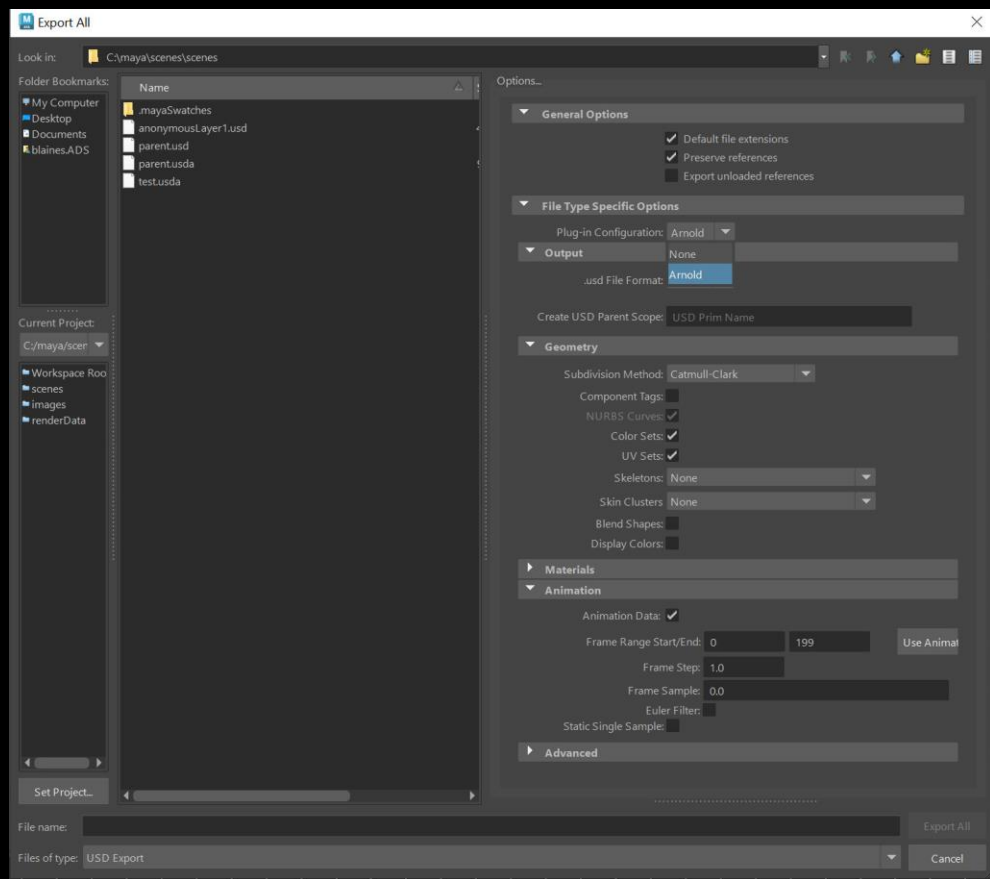

Maya USD

Maya USD with Arnold

- USD export with Arnold configuration
 - Arnold Nodes (aiSkyDomeLight, aiStandIn, etc..)
 - Arnold Shaders
 - Arnold attributes on builtin nodes (meshes, lights...)

Maya USD with Arnold

- USD export with Arnold configuration
 - Arnold Nodes (aiSkyDomeLight, aiStandIn, etc..)
 - Arnold Shaders
 - Arnold attributes on builtin nodes (meshes, lights...)
- Arnold schemas are registered in USD
 - Arnold prims can be created in stage
- Render usdProxyShape in Arnold
 - UsdStage is shared in memory
 - Edits supported in IPR

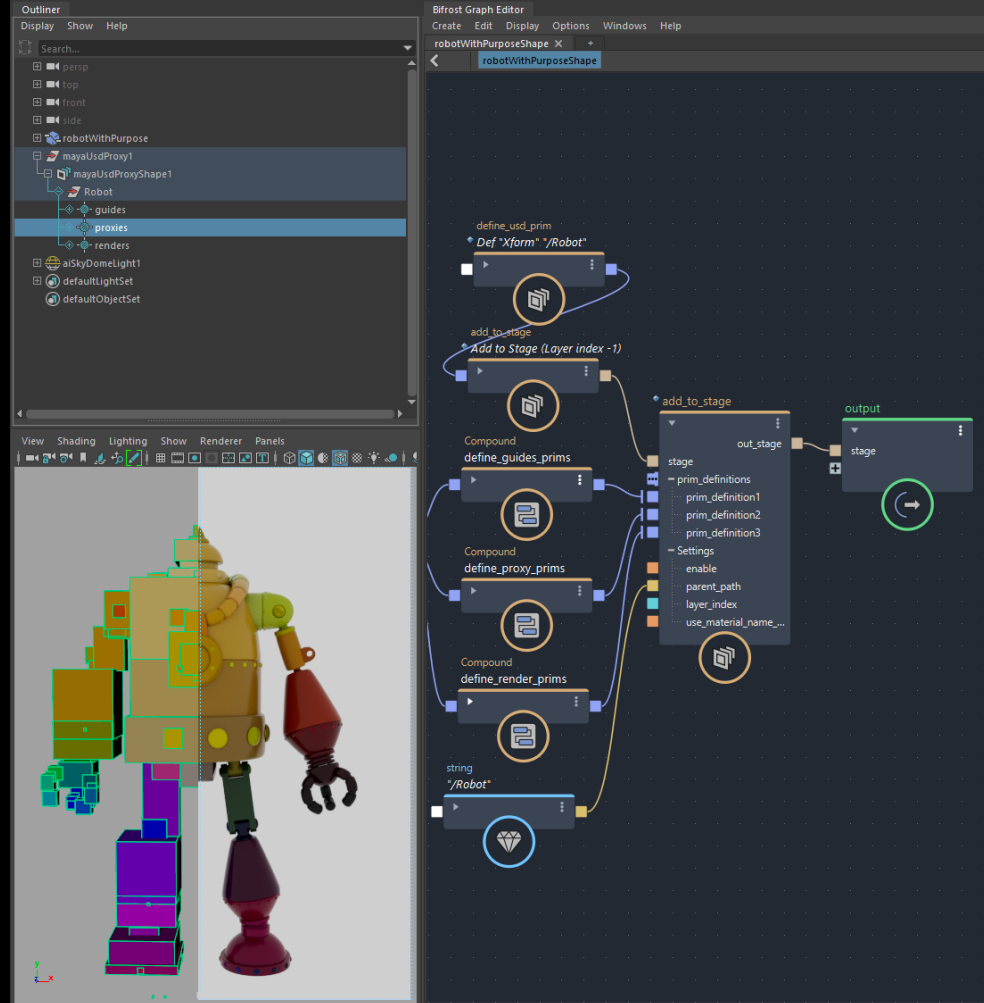

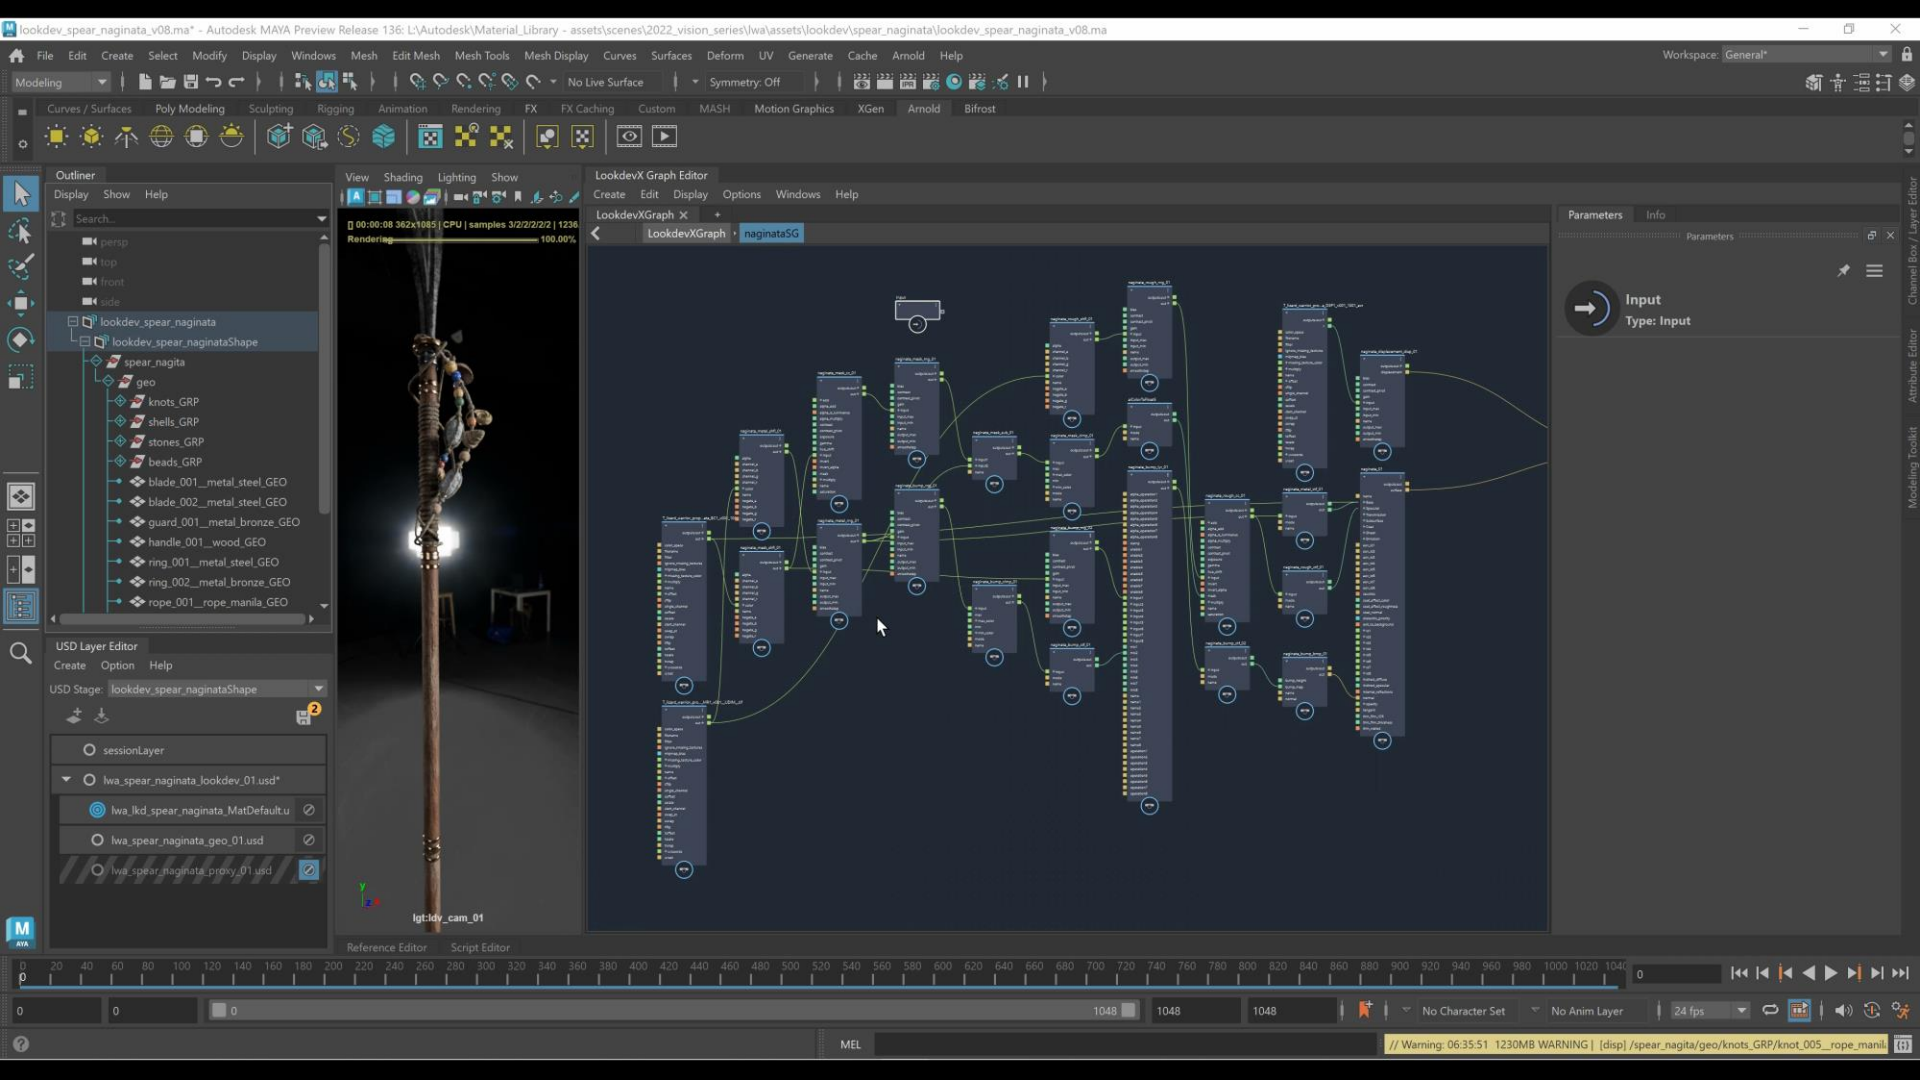

Maya USD with Arnold

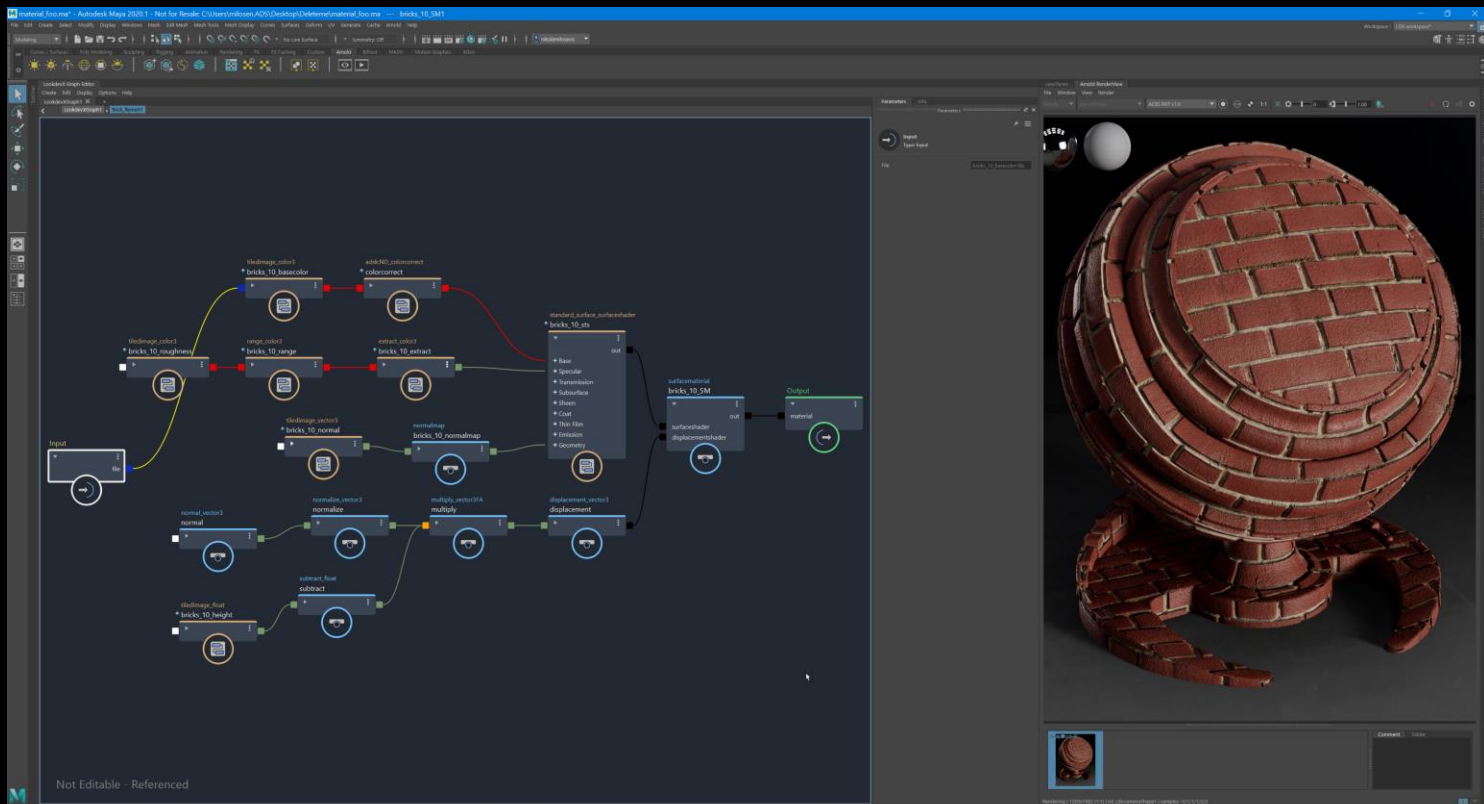

Bifrost USD

- Create and edit USD data
 - Procedural workflow
 - USD data flows through the graph
- Exposes USD API in Bifrost nodes
- Integrated with Maya USD
- Renders in Arnold

To be released...

USD across Maya toolset

Building The Matrix City of Machines – Use Case

John Paul Giancarlo
Technical Specialist

MATRIX CITY OF MACHINES

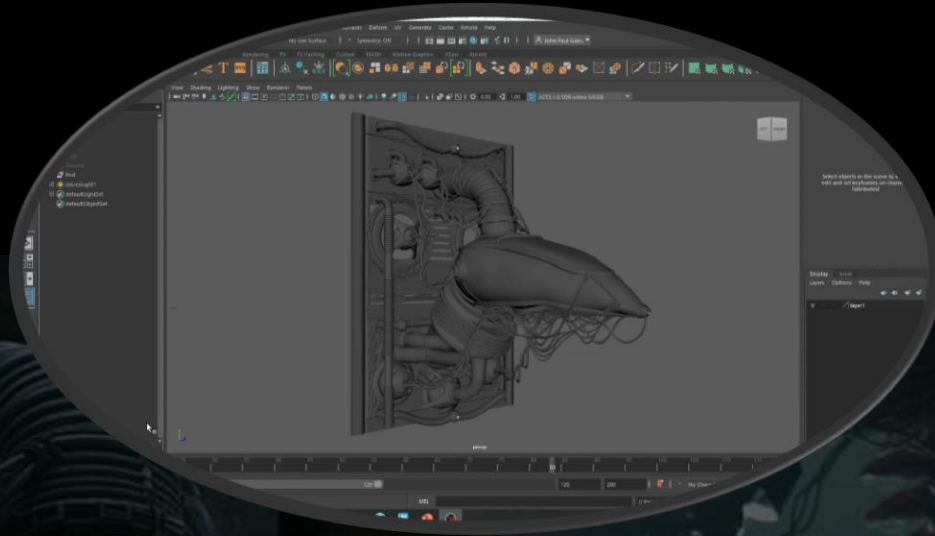

BY JOHN P L IANCA LO -

AGENDA

- 01 USD Across Maya Technical Overview
- 02 Create, edit, load & work with USD in Maya *Assembly and Layout Workflows*
- 03 Authoring Material X with LookDevX
- 04 Maya - Arnold USD Plugin Export
- 05 Bifrost USD procedural workflows
Use Case Building The Matrix City of Machines

Assembly and Layout Workflows - Export , Import Work with USD

✓ Export Maya Models as USD

Import USD Data as Maya Models

Work with USD Data

Maya / Bifrost USD makes assembly and layout fast and easy using Maya's and Bifrost's native workflows you already know.

Assembly and Layout Workflows – MaterialX & LookDevX

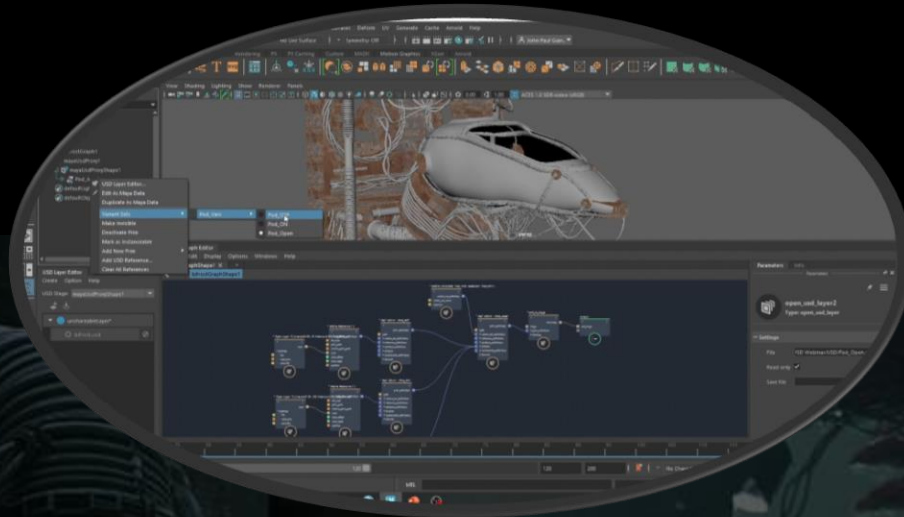

✓ Assign Material X Shaders to USD files via LookDevX system

Export and Render USD with Other Renders like Mantra

Maya / Bifrost USD makes assembly and layout fast and easy using Maya's and Bifrost's native workflows you already know.

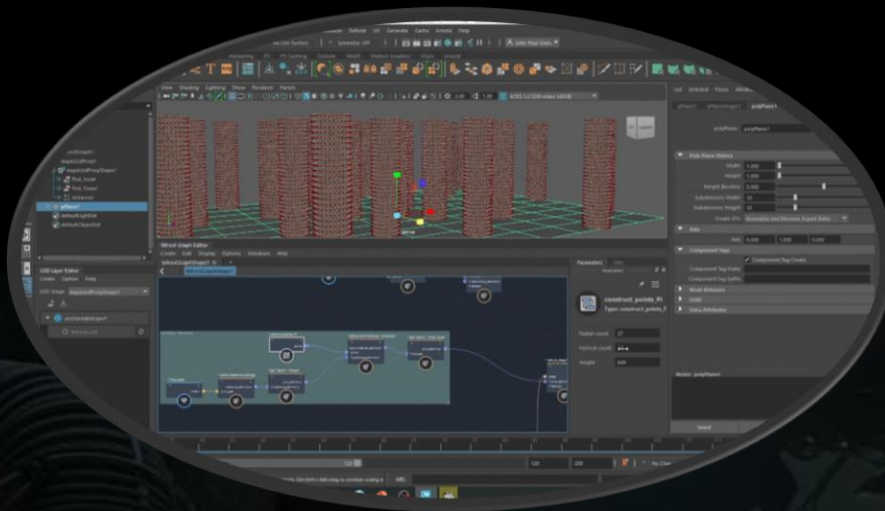

Assembly and Layout Workflows - Assembly asset with variants and define model VP Purpose

- Add Variants definitions “Composition Arcs” Specify Asset Render - Proxy Purpose Get asset ready

Maya / Bifrost USD makes assembly and layout fast and easy using Maya’s and Bifrost’s native workflows you already know.

Assembly and Layout Workflows - Procedurally build the City with Bifrost

- Build Construct points using USD Point Instancer
- Set Prototype definitions using existing Prim Path

Maya / Bifrost USD makes assembly and layout fast and easy using Maya's and Bifrost's native workflows you already know.
