0 of 0 parts are selected.

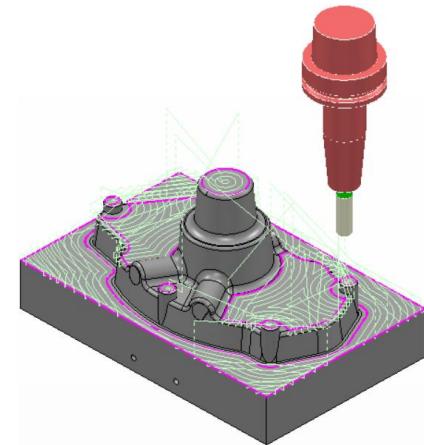

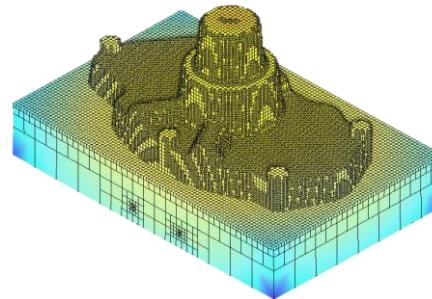

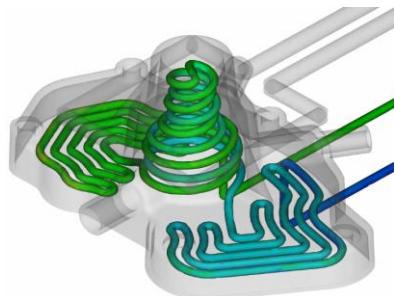

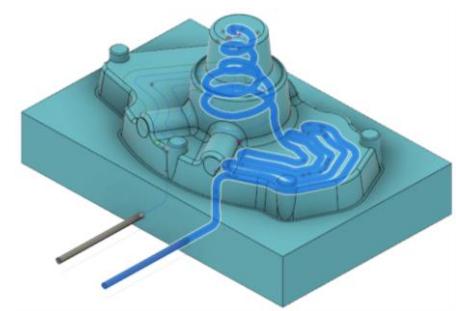

No machines configured. Open My Machines dialog

450x420:400 Rotate/Move Move and rotate selected parts by mouse and cursor keys.

The screenshot shows a 3D model of a mold part in the center workspace. The model has a complex, organic shape with a visible internal lattice structure. The workspace includes a coordinate system (X, Y, Z) and a grid for precise placement. On the left, there's a 'My Machines' panel indicating no machines are configured. The top menu bar includes options like File, Home, Analyze, Modify, Arrange, View, and Help. The toolbar contains icons for Save, Undo, Redo, My Machines, Add Part, Part Library, Platform Overview, Repair Part, Run Script, Prepare, New Analysis, Analyze, Boolean, Generate Shell Modify, Generate Label, Scale, Rotate, Orient, Move, Duplicate, Pack, Generate Supports, Manage Supports, Slice Parts, Everything, Selected, Platform, Area, All Parts, Point, Open Utility, and Utilities. The right side features a 'Clip Planes' panel with X, Y, and Z axes, and a 'Cuts' panel stating '<cutting disabled>'. The bottom status bar displays '450x420:400' and 'Rotate/Move'.

The main workspace shows a 3D coordinate system with X, Y, and Z axes. A small red coordinate system is also visible near the bottom left. On the right side, there is a vertical toolbar with icons for various operations like selection, measurement, and orientation.

A 3D CAD model of a mechanical assembly, likely a piston system, is shown in the center of the interface. A probe path, consisting of several yellow-colored segments, is overlaid on the model, indicating a measurement or inspection route. The assembly includes various components like a piston, connecting rod, and frame. A coordinate system (X, Y, Z) is visible at the bottom left. The software interface includes toolbars for geometry operations, probe paths, and reporting.
