LIVE Design Ecosystem — Using Autodesk LIVE, Stingray and 3ds Max for Real-Time Design Viz

Bruno Landry

Product Designer – Autodesk LIVE, Stingray for Design

Autodesk – Media & Entertainment - Montreal

AU 2016 - LAB

- Collaboration between architects and design visualization specialists within the LIVE Design network

- How game engine technologies can enhance the design visualization process

Key learning objectives

At the end of this lab, you will be able to:

- Open an Autodesk LIVE project in Stingray
- Edit Stingray materials and import new content
- Trigger animation in Stingray using Level Flow
- Send the enhanced project back in Autodesk LIVE

Quick word about me !

Autodesk LIVE

We are excited to share sample scenes for the LIVE Service and App with you, freely available under the Creative Commons Attribution 4.0 International license. Use the samples to explore LIVE and familiarize yourself with all it can do for you. Each scene comes directly from our cloud service; with LIVE's easy workflow you too can move from Revit to Real-time in no time.

There are a variety of samples available for you to explore, from the Basic Sample Project to the enhanced Villa Martini. LIVE scenes can be edited in Stingray to enhance projects like Villa Martini by animating assets and textures (birds, fountains, etc.), creating or editing materials, importing new furniture, baking lights, and more. Using your desktop or tablet viewer you can step right into the design. Enjoy!
