# Item Creation Made Easy... well... kind of

Scott Hendricks

Technical Advisor Enceptia

### **Class summary**

This class will cover advanced item-creation techniques for those familiar with the creation of fabrication items. We will walk through a best-practice workflow using the Product Information Editor, price lists, product lists, and labor tables for creating more accurate and complete items.

### **Key learning objectives**

At the end of this class, you will be able to:

- Learn how to build manufacture specific items using the MAKEPAT command
- Understand the relationship between items and their product list, price list, labor cost, and product information tables
- Learn effective workflows for creating Fabrication software items
- Learn how to leap tall buildings in a single bound

#### **Collect Data**

- Dimensional Data
- Costing Data
- Product Information

#### **MAKEPAT**

- Create item and save to folder
- or Copy existing item from zMasters

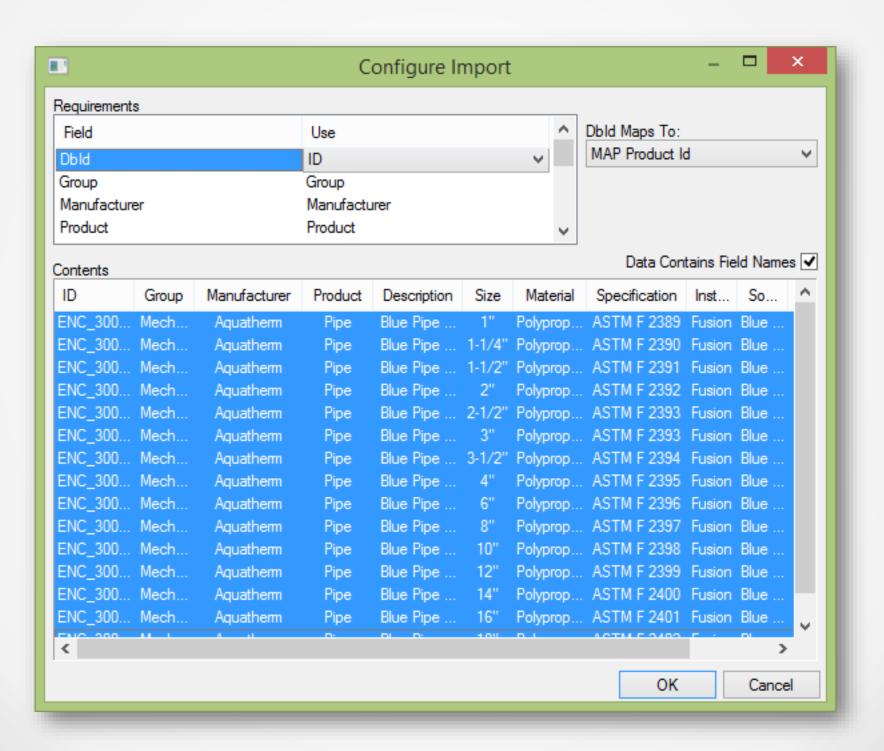

### Input data into Excel

- Product Information
- Price List
- Labor
- Product List
- Link

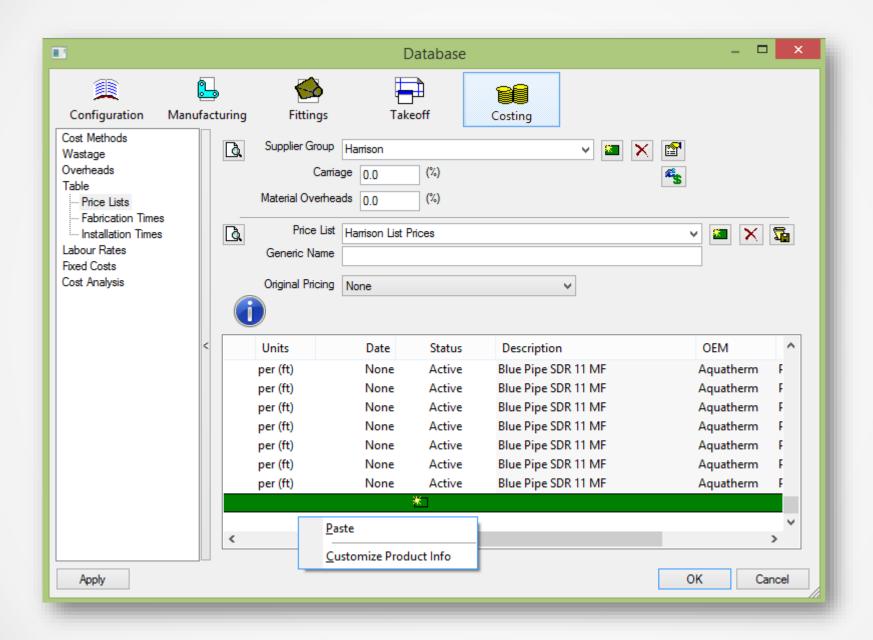

#### Paste data into the Product Information Editor

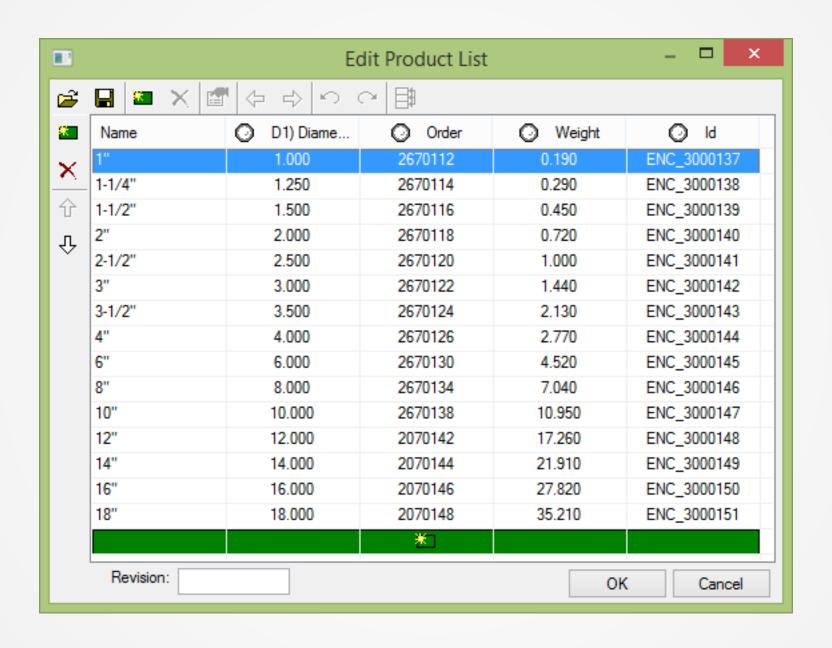

### Paste data into Pricing and Labor Tables

#### **Product list item**
