A stylized, semi-transparent red car is positioned on the left side of the image, facing right. The car's design is sleek and modern, with visible headlights, a grille, and wheels. The entire scene is set against a solid red background.

We had the pleasure of meeting designer extraordinaire [Michael Jelinek](#) at the last Autodesk University, where he'd come a long way from home—the Czech Republic—to demonstrate his formidable rendering skills, using techniques he'd honed doing projects for clients like Nike and Volkswagen. Among other things, Jelinek—who's served as a senior design consultant for Alias software—has a knack for cranking out imaginative vehicles that combine futuristic flair with old-school Syd-Mead-esque style.
