Unlimited Round-Tripping with the RISA-Revit® Link

Matt Brown – RISA Technologies

SE2070

Learn how recent improvements to the RISA-Revit Link have made repeated round-trips a painless process. See how new settings and options can enable you to click the Import/Export button without worrying about the consequences. This class will focus on workflow between your RISA model and your Autodesk® Revit® Structure software model, including how to handle situations where both models are being worked on simultaneously. Special emphasis will be placed on workflow strategies to ensure that both models remain as synchronized as possible throughout the design lifecycle.

Learning Objectives

At the end of this class, you will be able to:

- Transfer RISA models to Revit Structure

- Transfer Revit Structure models to RISA

- Complete multiple round-trips between RISA and Revit Structure

- Avoid common mistakes during repeated round trips

About the Speaker

Matt is a Professional Engineer with prior experience as a design engineer at a major A/E firm. He has worked on several real-life projects where Revit was the primary software used for drawing production.

Matt has been with RISA Technologies since 2008 and has been very involved in the development of the RISA-Revit Link. He has been giving seminars, webinars, and other trainings on the RISA-Revit Link for years, including AU 2009 and 2011
