

MA1904 - Autodesk® Inventor® Content Center Library Advanced Management

Addendum for Section 6 - Place a component of a modified family from Content Center in Vault Project

Note.

This document covers the 4 most common workflows to reach a status where the component in Autodesk® Vault® and the component in the local Content Center are up-to-date.

Workflow 1 – initial status

The component in Autodesk® Vault® is out-of-date.

The component in the local Content Center Files family subfolder is out-of-date.

Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is not checked.

Workflow 2 – initial status

The component in Autodesk® Vault® is out-of-date.

The component in the local Content Center Files family subfolder is out-of-date.

Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is checked.

Workflow 3 – initial status

The component in Autodesk® Vault® is up-to-date.

The component in the local Content Center Files family subfolder is out-of-date.

Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is not checked.

Workflow 4 – initial status

The component in Autodesk® Vault® is up-to-date.

The component in the local Content Center Files family subfolder is out-of-date.

Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is checked.

Icon Reference

This symbol means that the data is out-of-date.

This symbol means that the data is up-to-date.

Icon used to represent Autodesk® Vault®.

Icon used to represent Autodesk® Inventor®.

Icon used to represent Autodesk® Inventor®'s local Content Center Files family subfolder.

This symbol means that Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is not checked.

This symbol means that Autodesk® Inventor®'s “Refresh out-of-date standard parts during placement” option is checked.

Icon used to represent the Autodesk® Inventor® assembly.

Icon from Autodesk® Inventor®'s toolbar to check in design into Autodesk® Vault®.

Icon from Autodesk® Inventor®'s toolbar to place a component from the Content Center.

Icon from Autodesk® Inventor®'s toolbar to open a file from Autodesk® Vault®.

Icon from Autodesk® Inventor®'s toolbar to refresh standard components.

Icon from Autodesk® Inventor®'s toolbar to get the component's revision from Autodesk® Vault®.

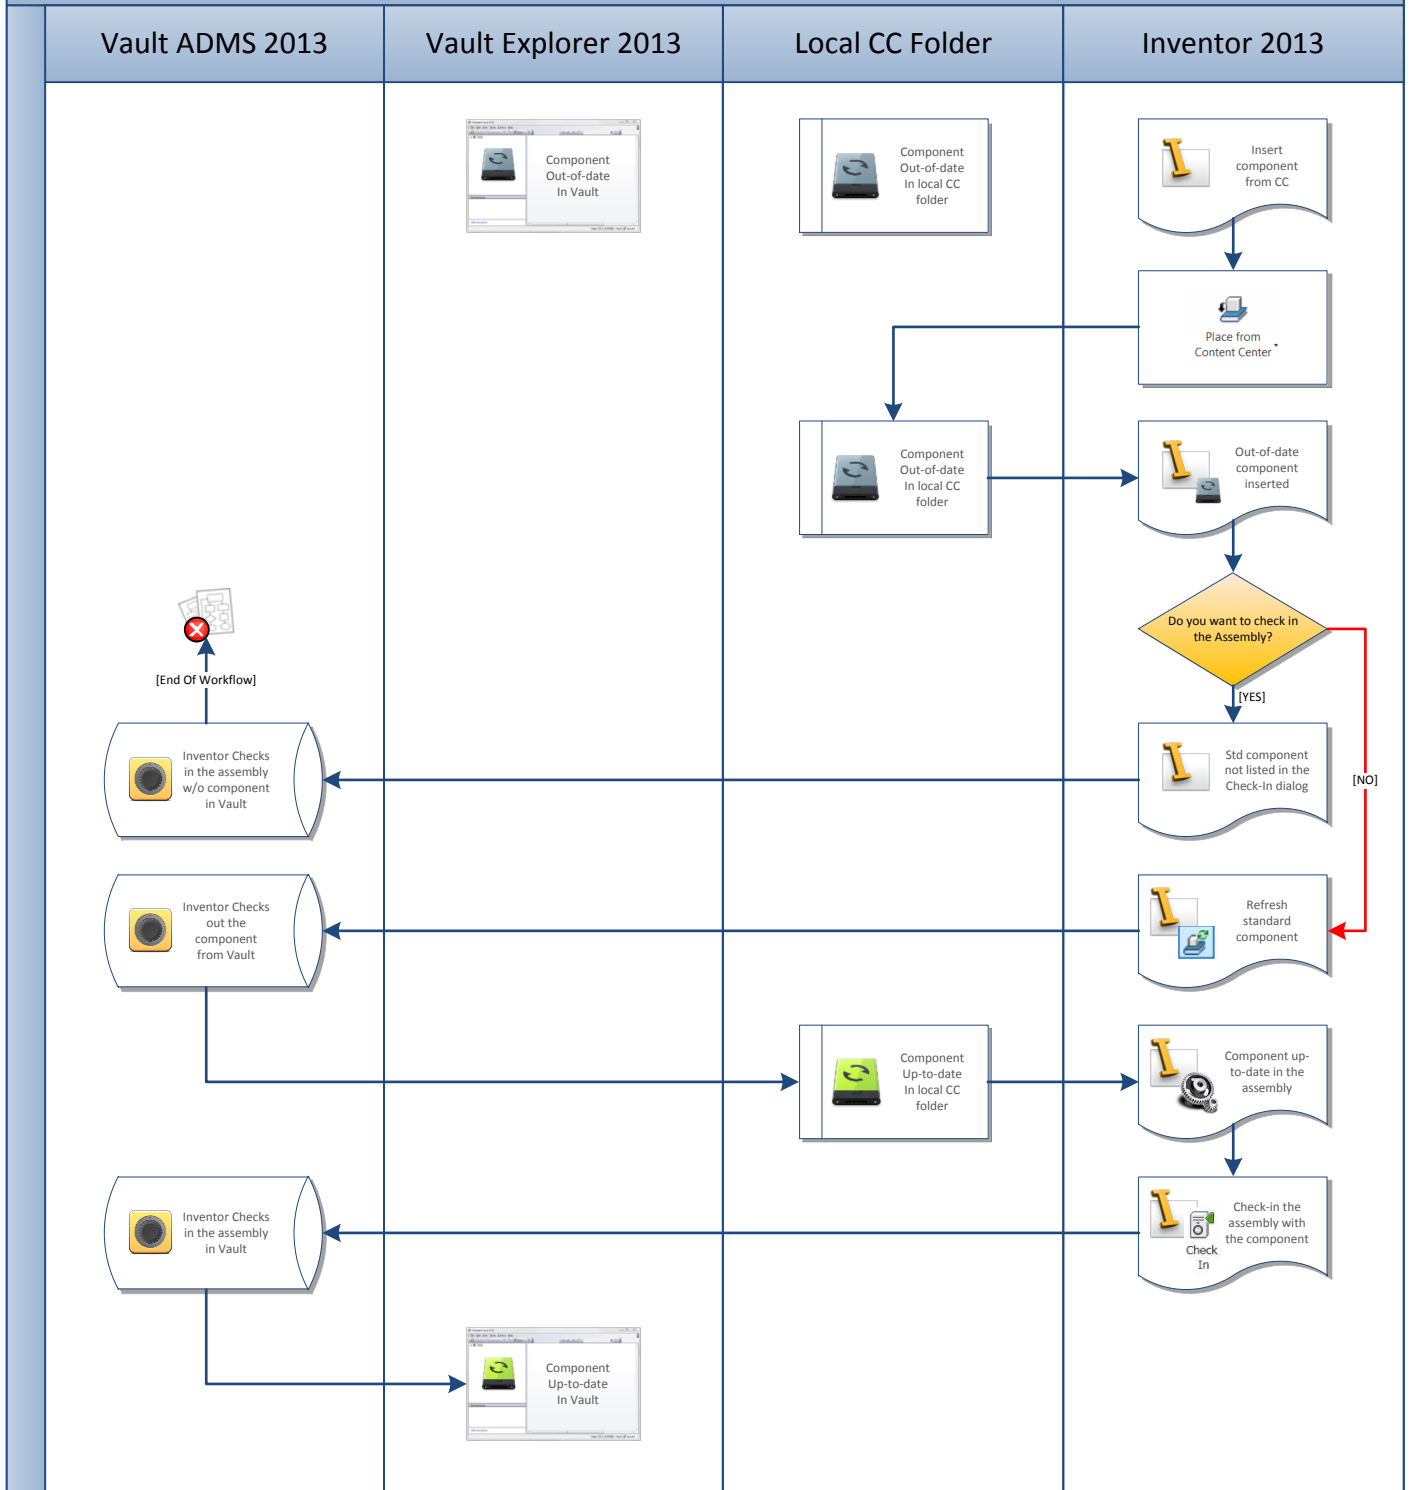

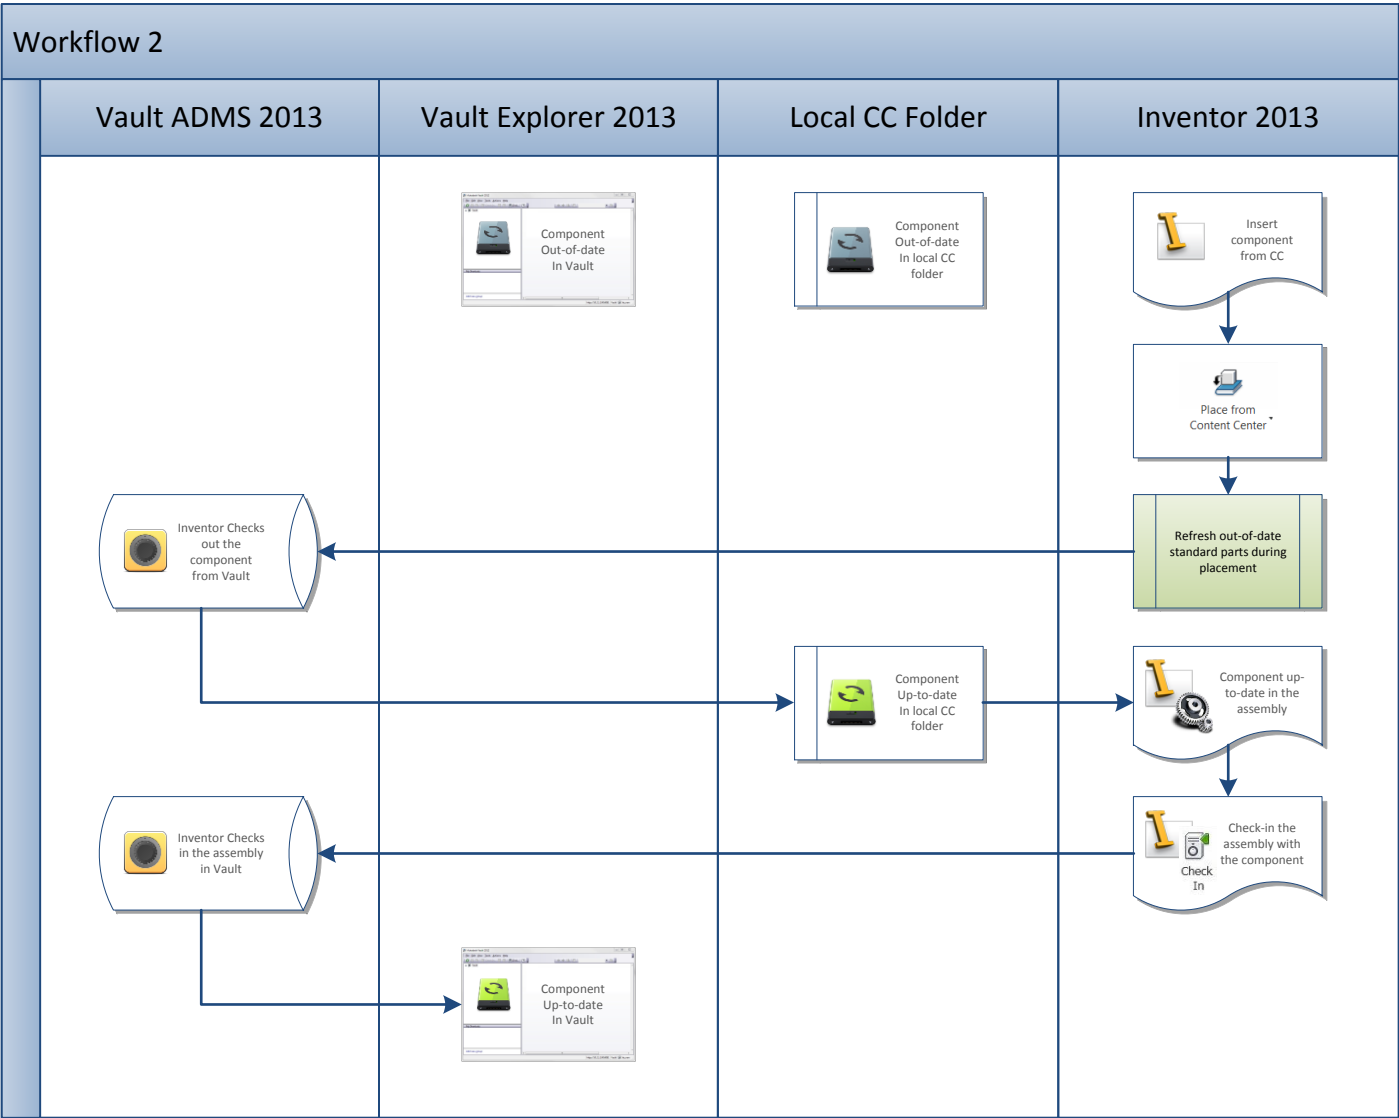

Icon from Autodesk® Inventor®'s toolbar to retrieve the latest version of the selected file from Autodesk® Vault®.

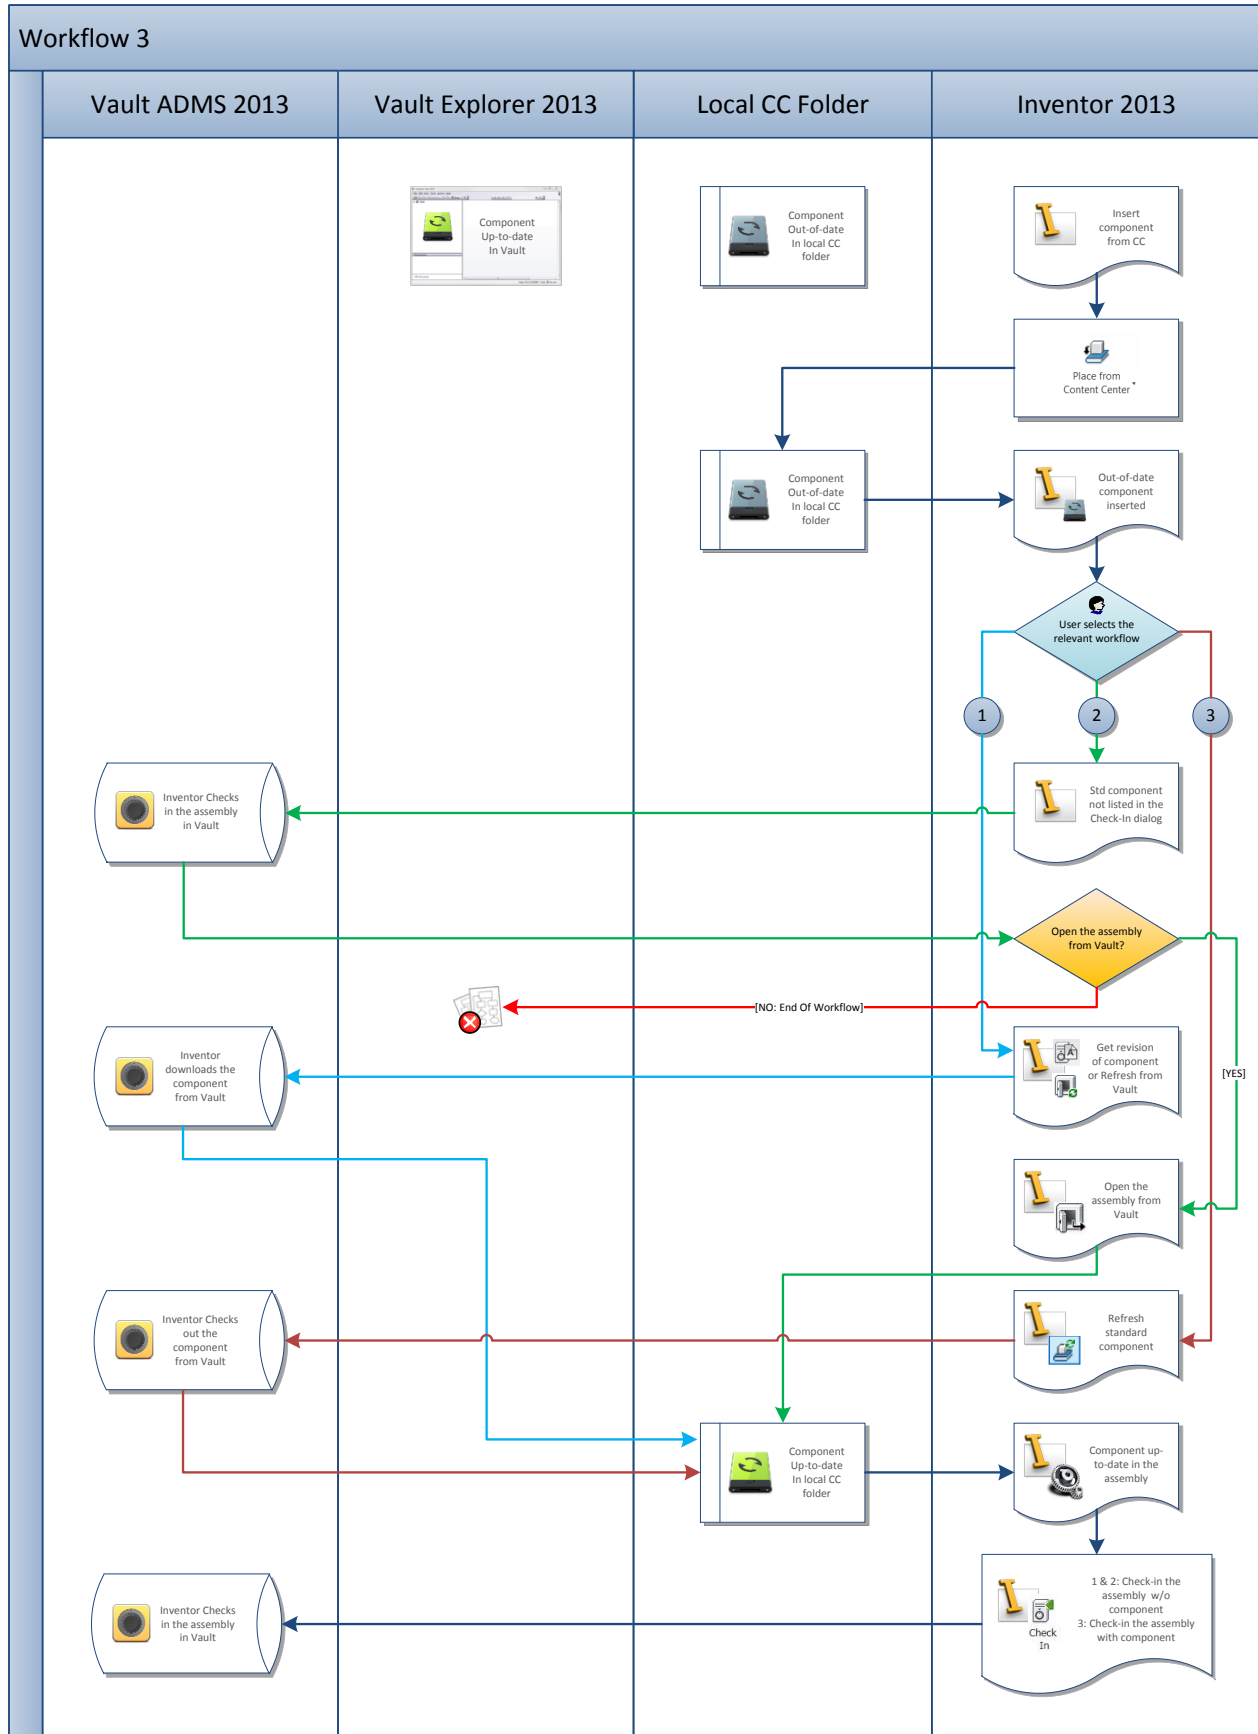

This symbol means that the user is exiting the documented workflow.
