Class summary

Heard about the Collaboration for Revit cloud service, but still on the fence? This class is for you! We will take a look at the needs served by this cloud-hosted solution, discuss the value that it brings to the table, and then dive into a live project—first on BIM 360 Team, where all project participants have a stake, and then inside the Revit environment. In one fast-paced hour, you should have the knowledge needed to make the decision to adopt Collaboration for Revit to extend Building Information Modeling (BIM) workflows within your own firm.

Key learning objectives

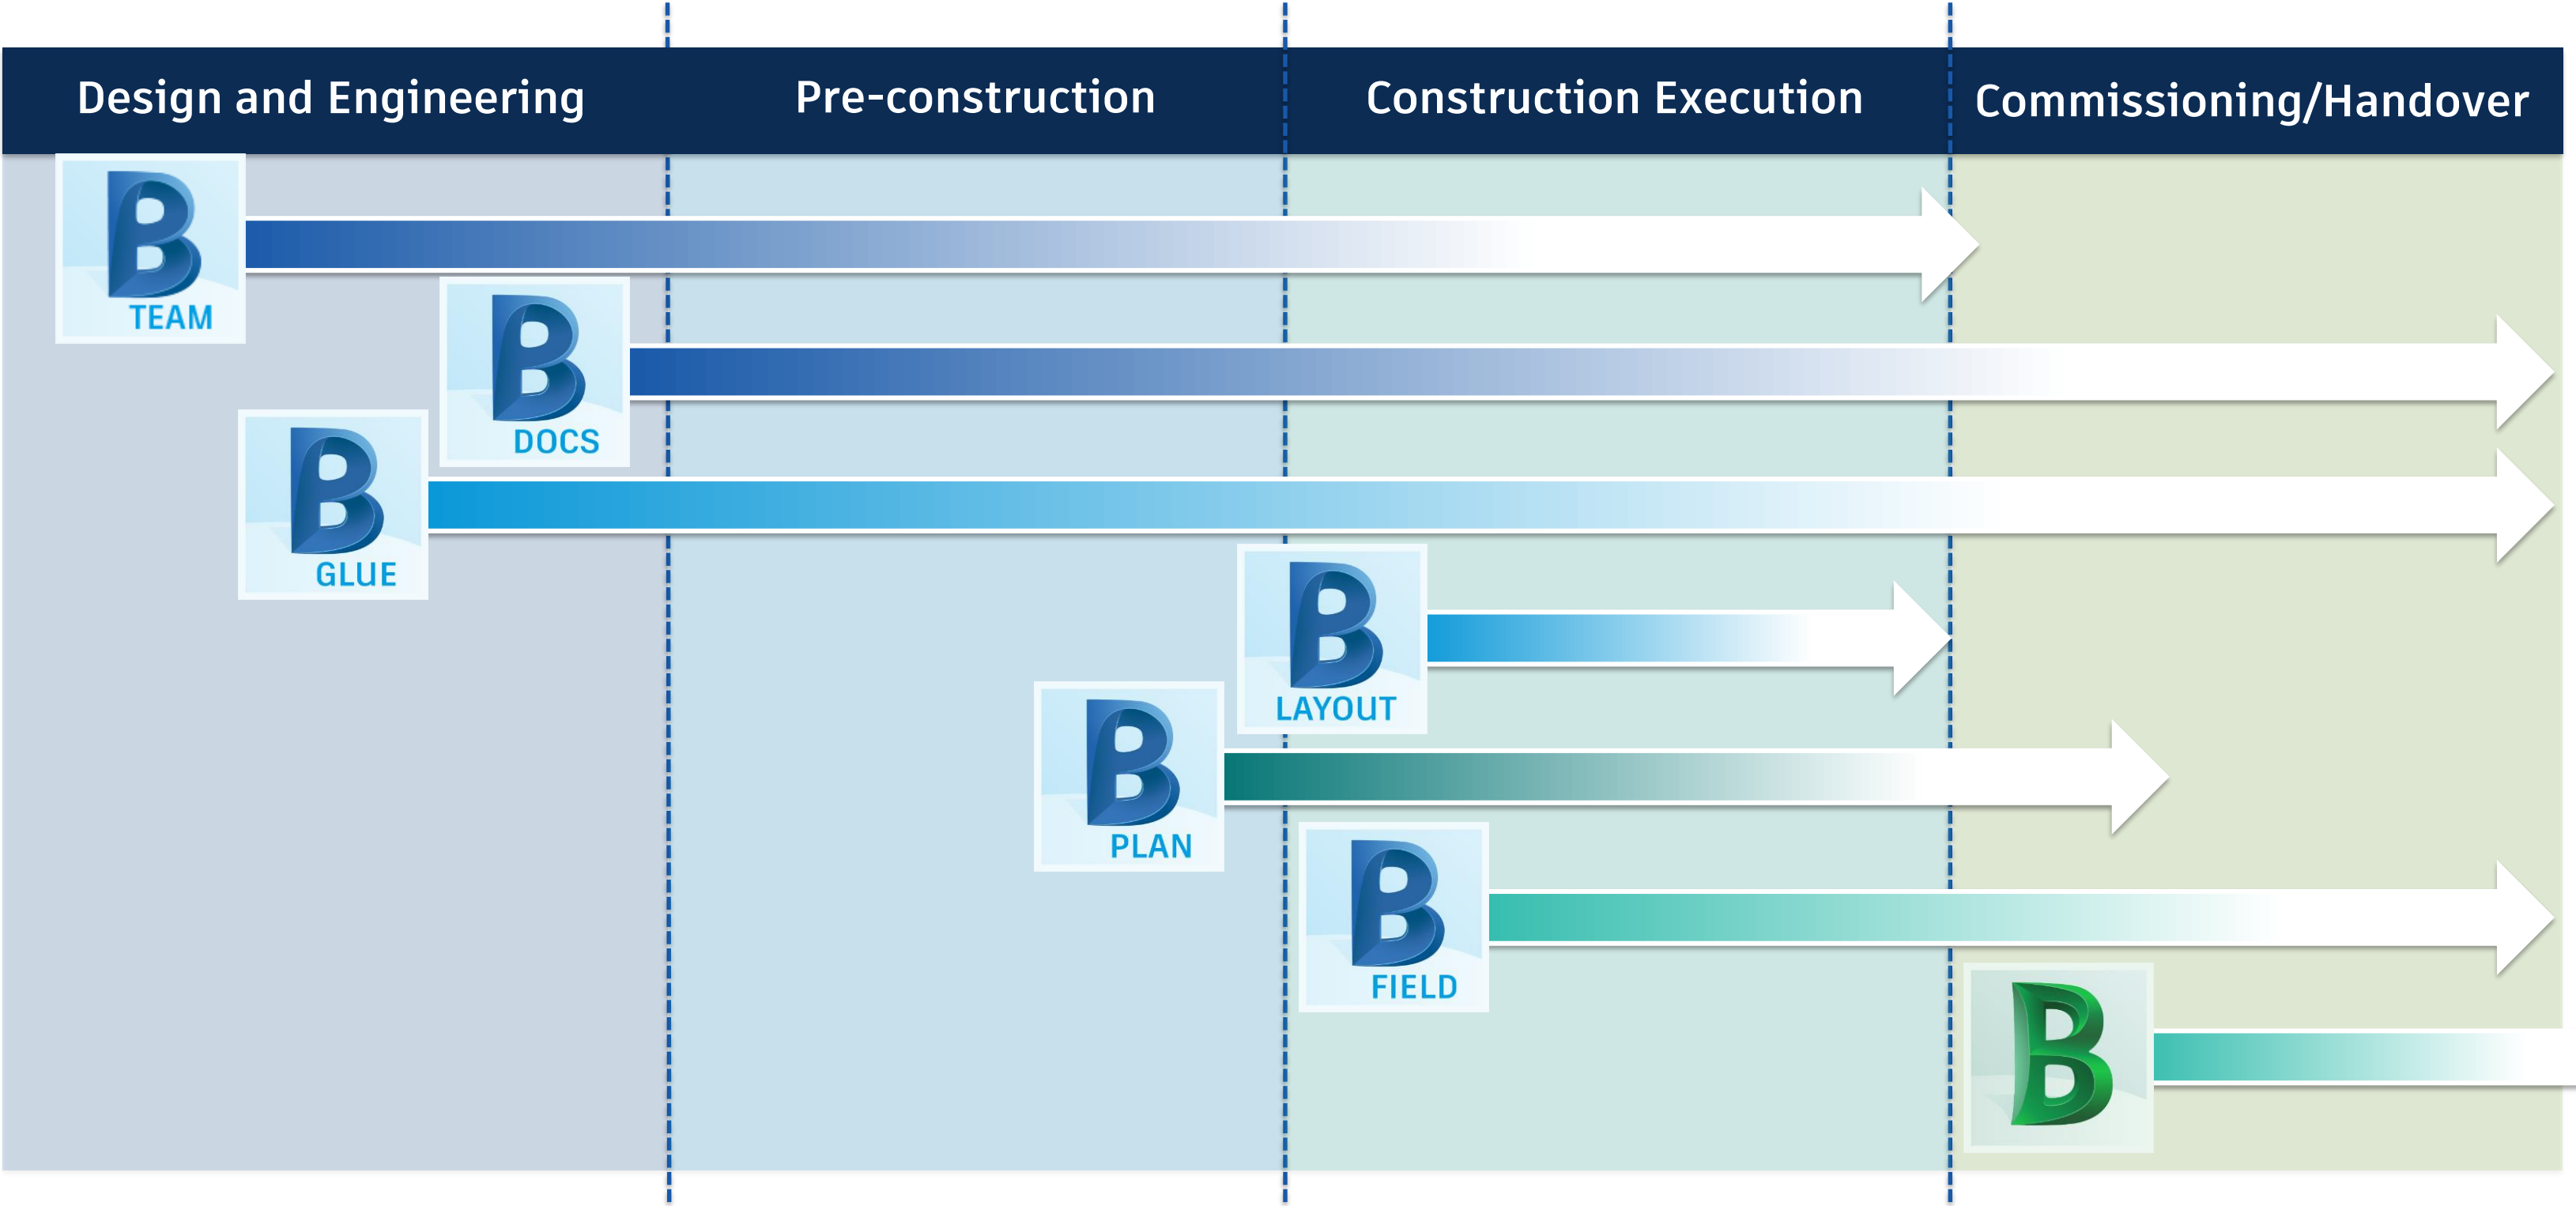

At the end of this class, you will be able to:

- Navigate and manage projects on **BIM 360 Team**
- Explain the differences between traditional collaboration offerings and **Collaboration for Revit**
- Set up and work within a Collaboration for Revit-hosted project
- Assess the potential impact of Collaboration for Revit on your own firm

Let's jump in!

The BIM 360 platform

The entry point

Why BIM 360 Team?

BIM 360 Team is the foundation of the BIM 360 platform, enabling **design, engineering, and construction teams** to work efficiently together in **one central workspace**

BIM Collaboration | Revit Evolution

Team
Single location
Firewalled

- Limited Collaboration
- Daily BIM Management
- No Internal Activity Tracking

Localized Central Model

User 1

User 2

User 3

Enterprise
Multiple locations
Firewalled

- Single Firm
- Expensive Hardware
- Slow Data Exchange

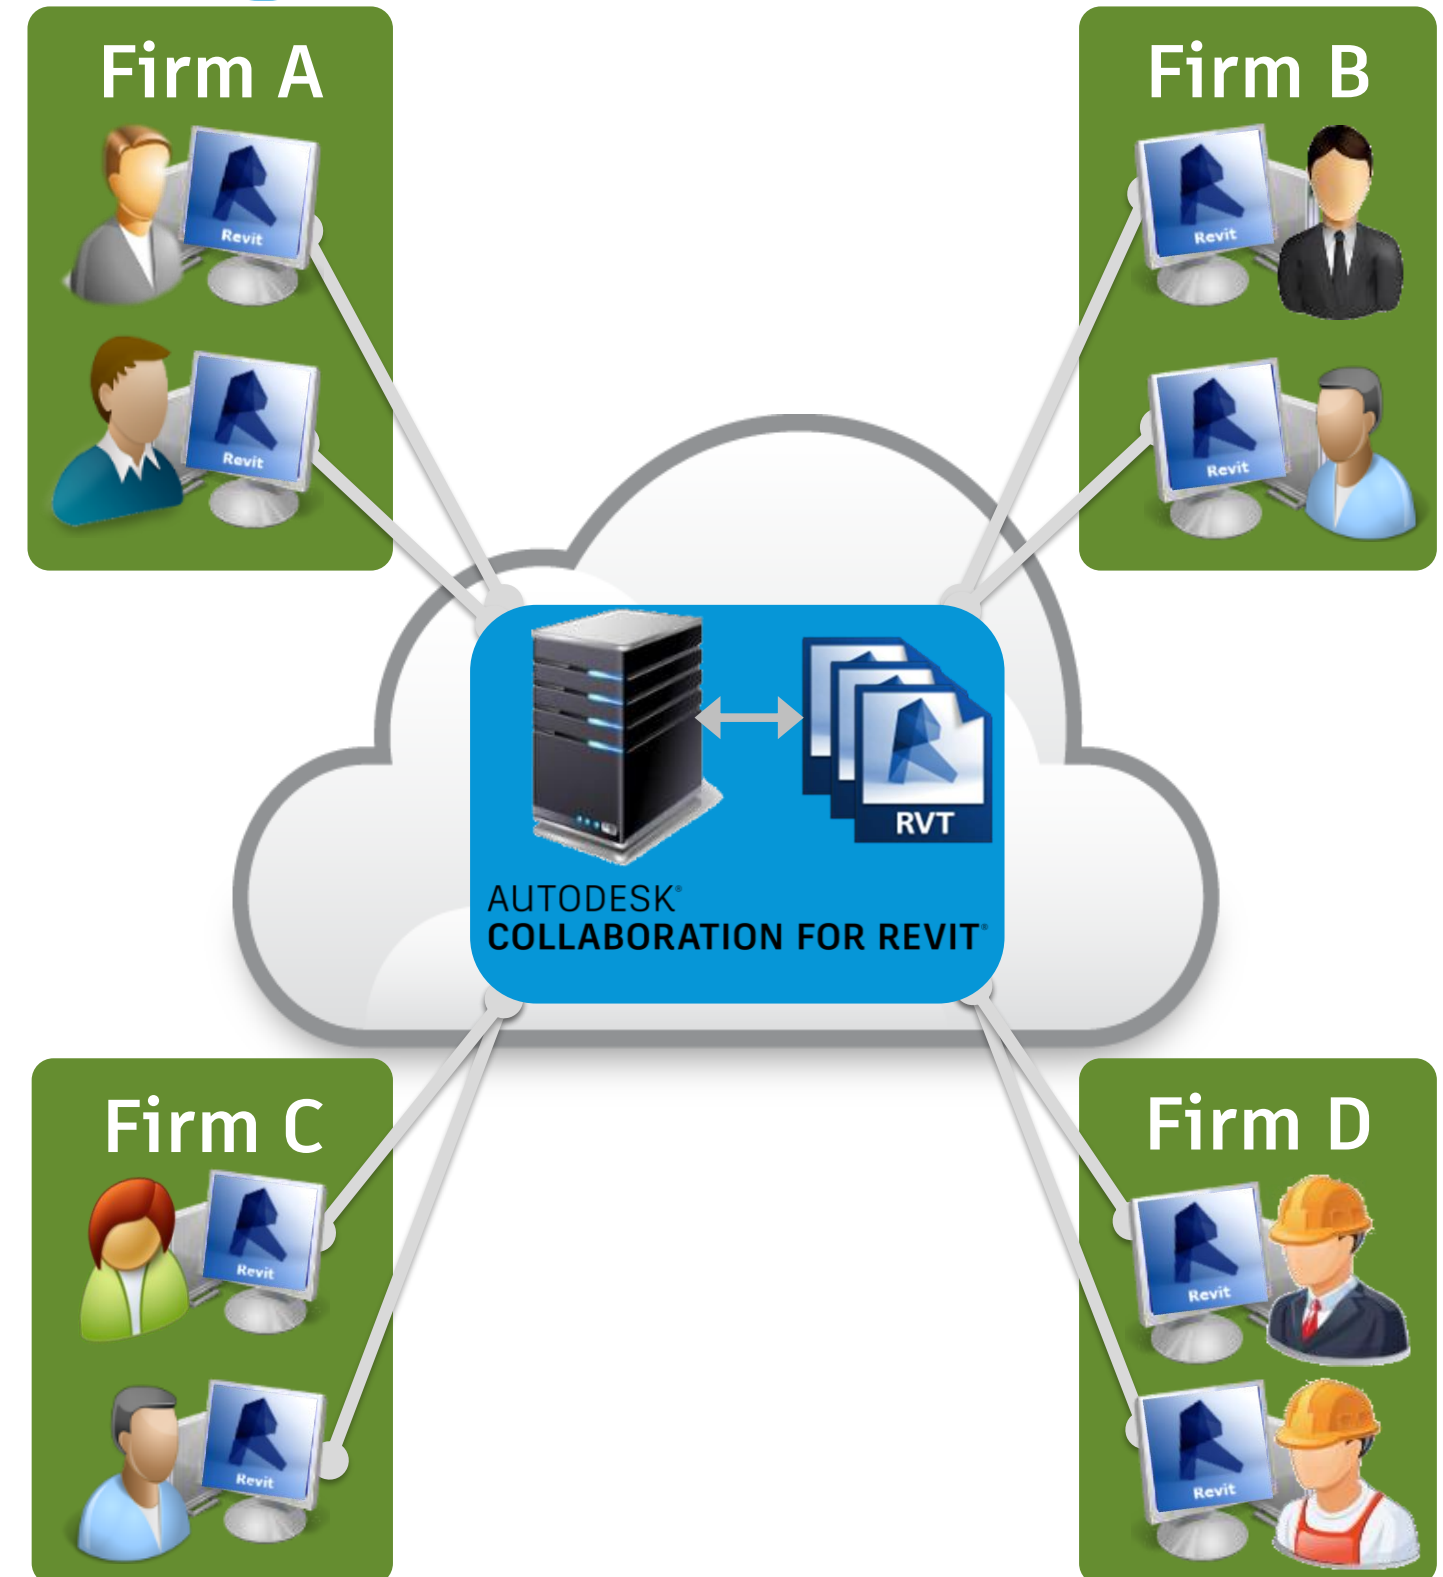

Project
Multiple companies
Multiple locations
Managed access

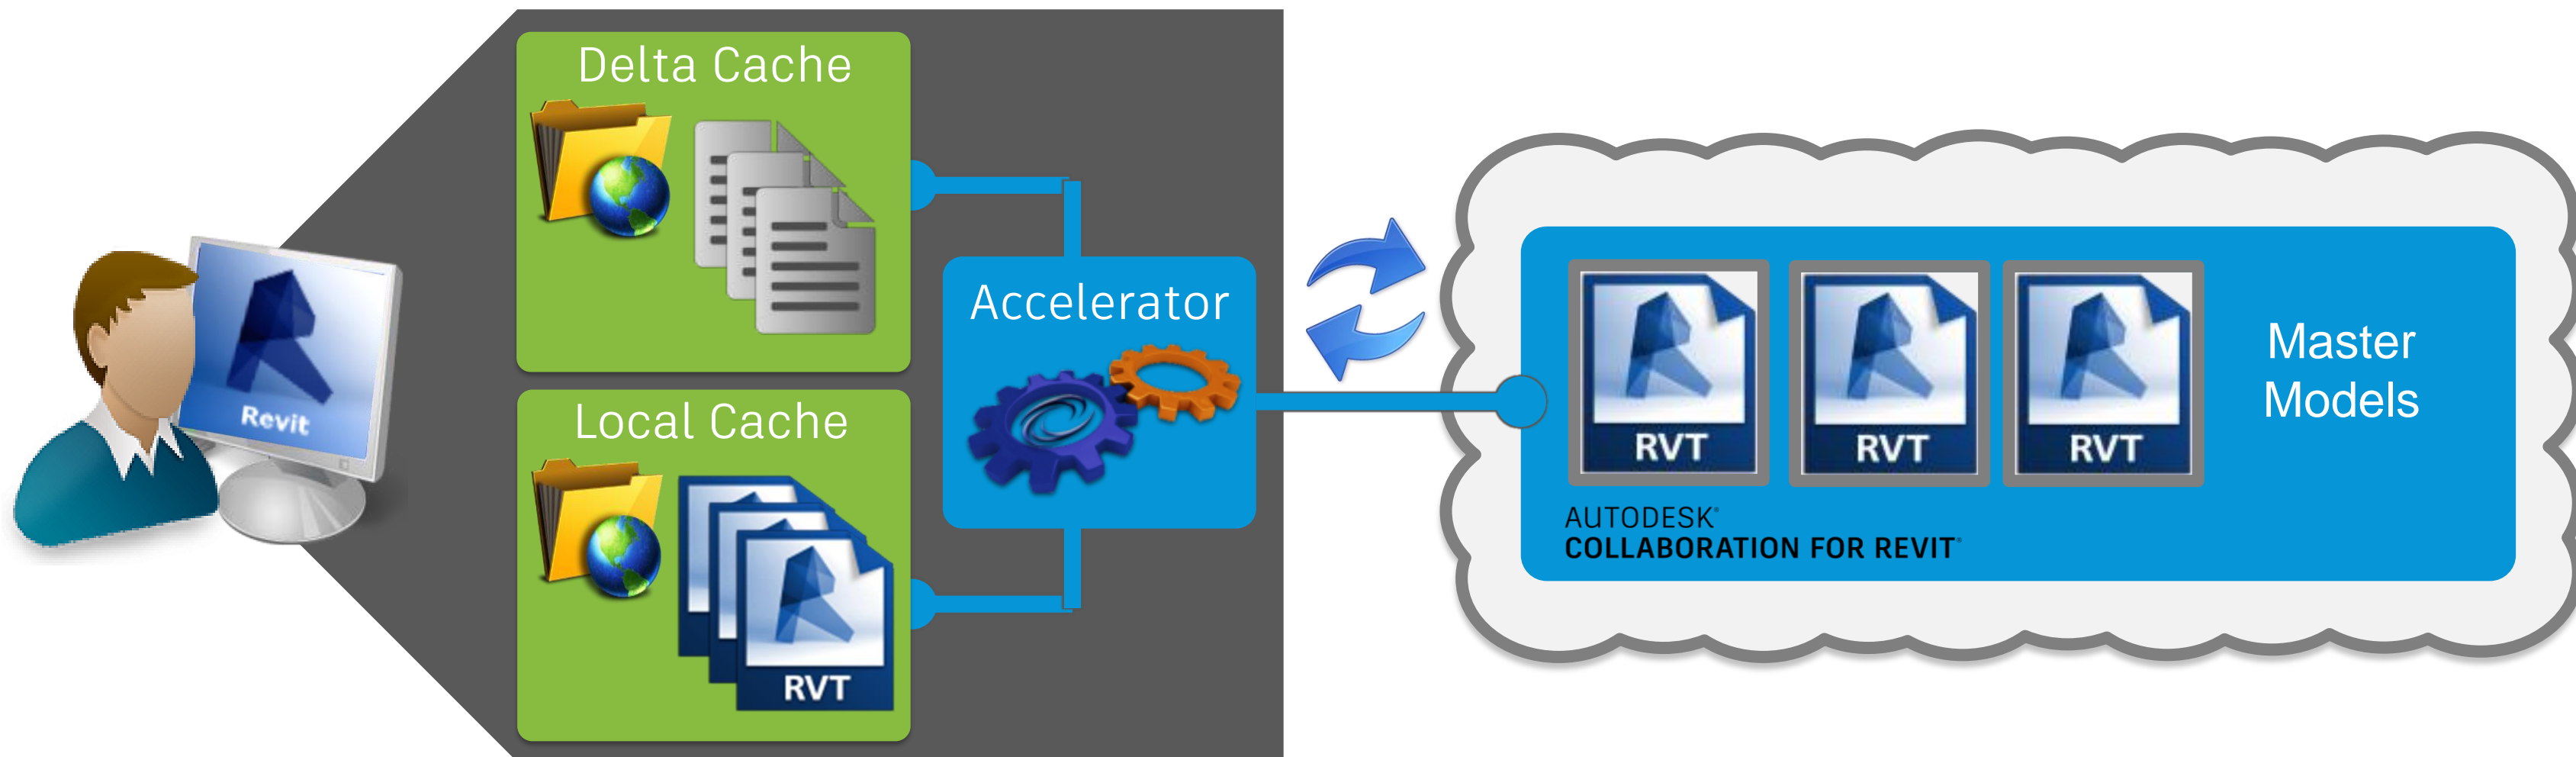

Key Values | Cloud Worksharing

- Multi-firm concurrent authoring

Key Values | Cloud Worksharing

- Multi-firm concurrent authoring
- Delta transfers
- Changes prefetched
- Only working data cached

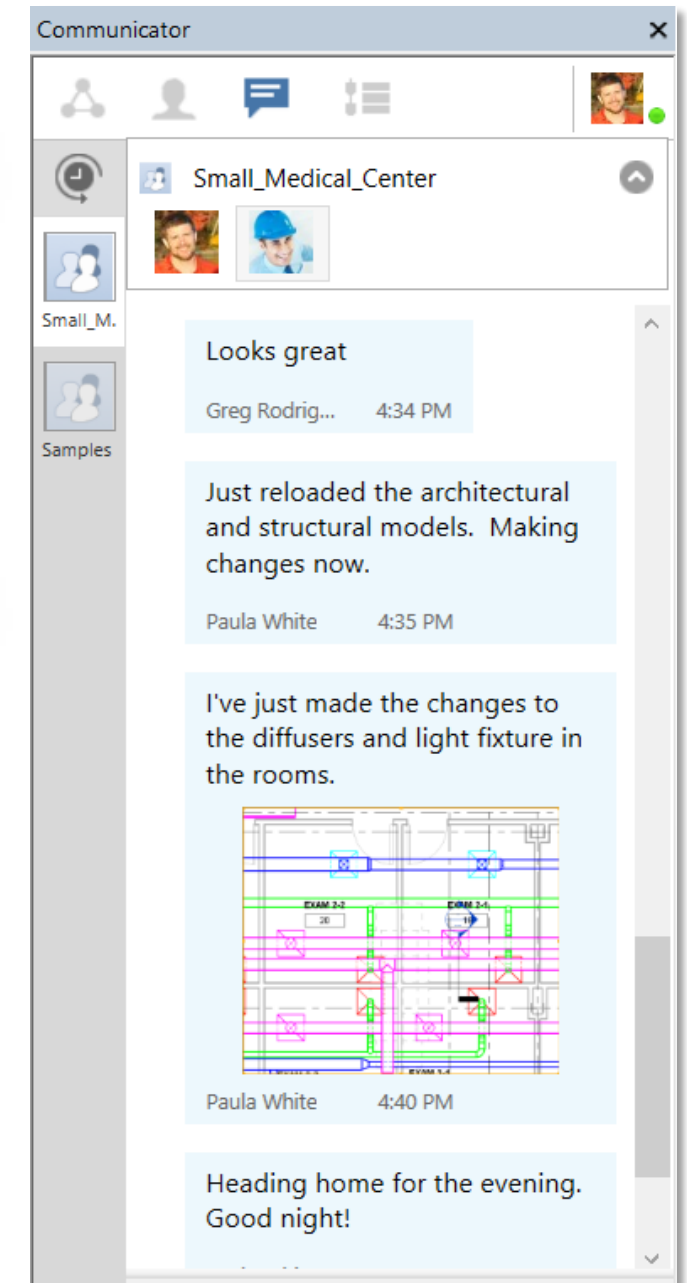

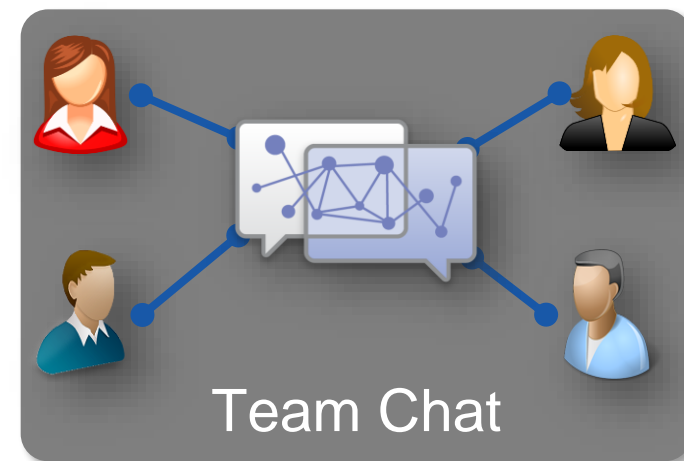

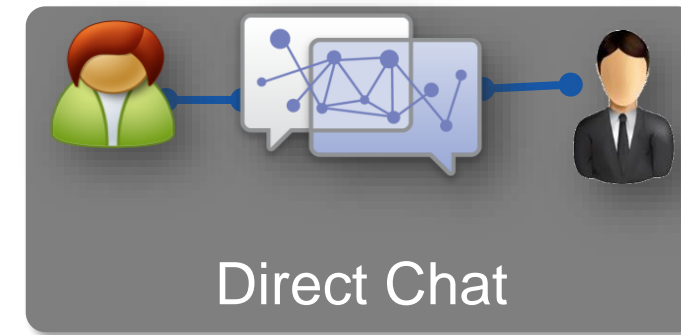

Key Values | Zero IT

- Multi-firm concurrent authoring
- No IT setup required

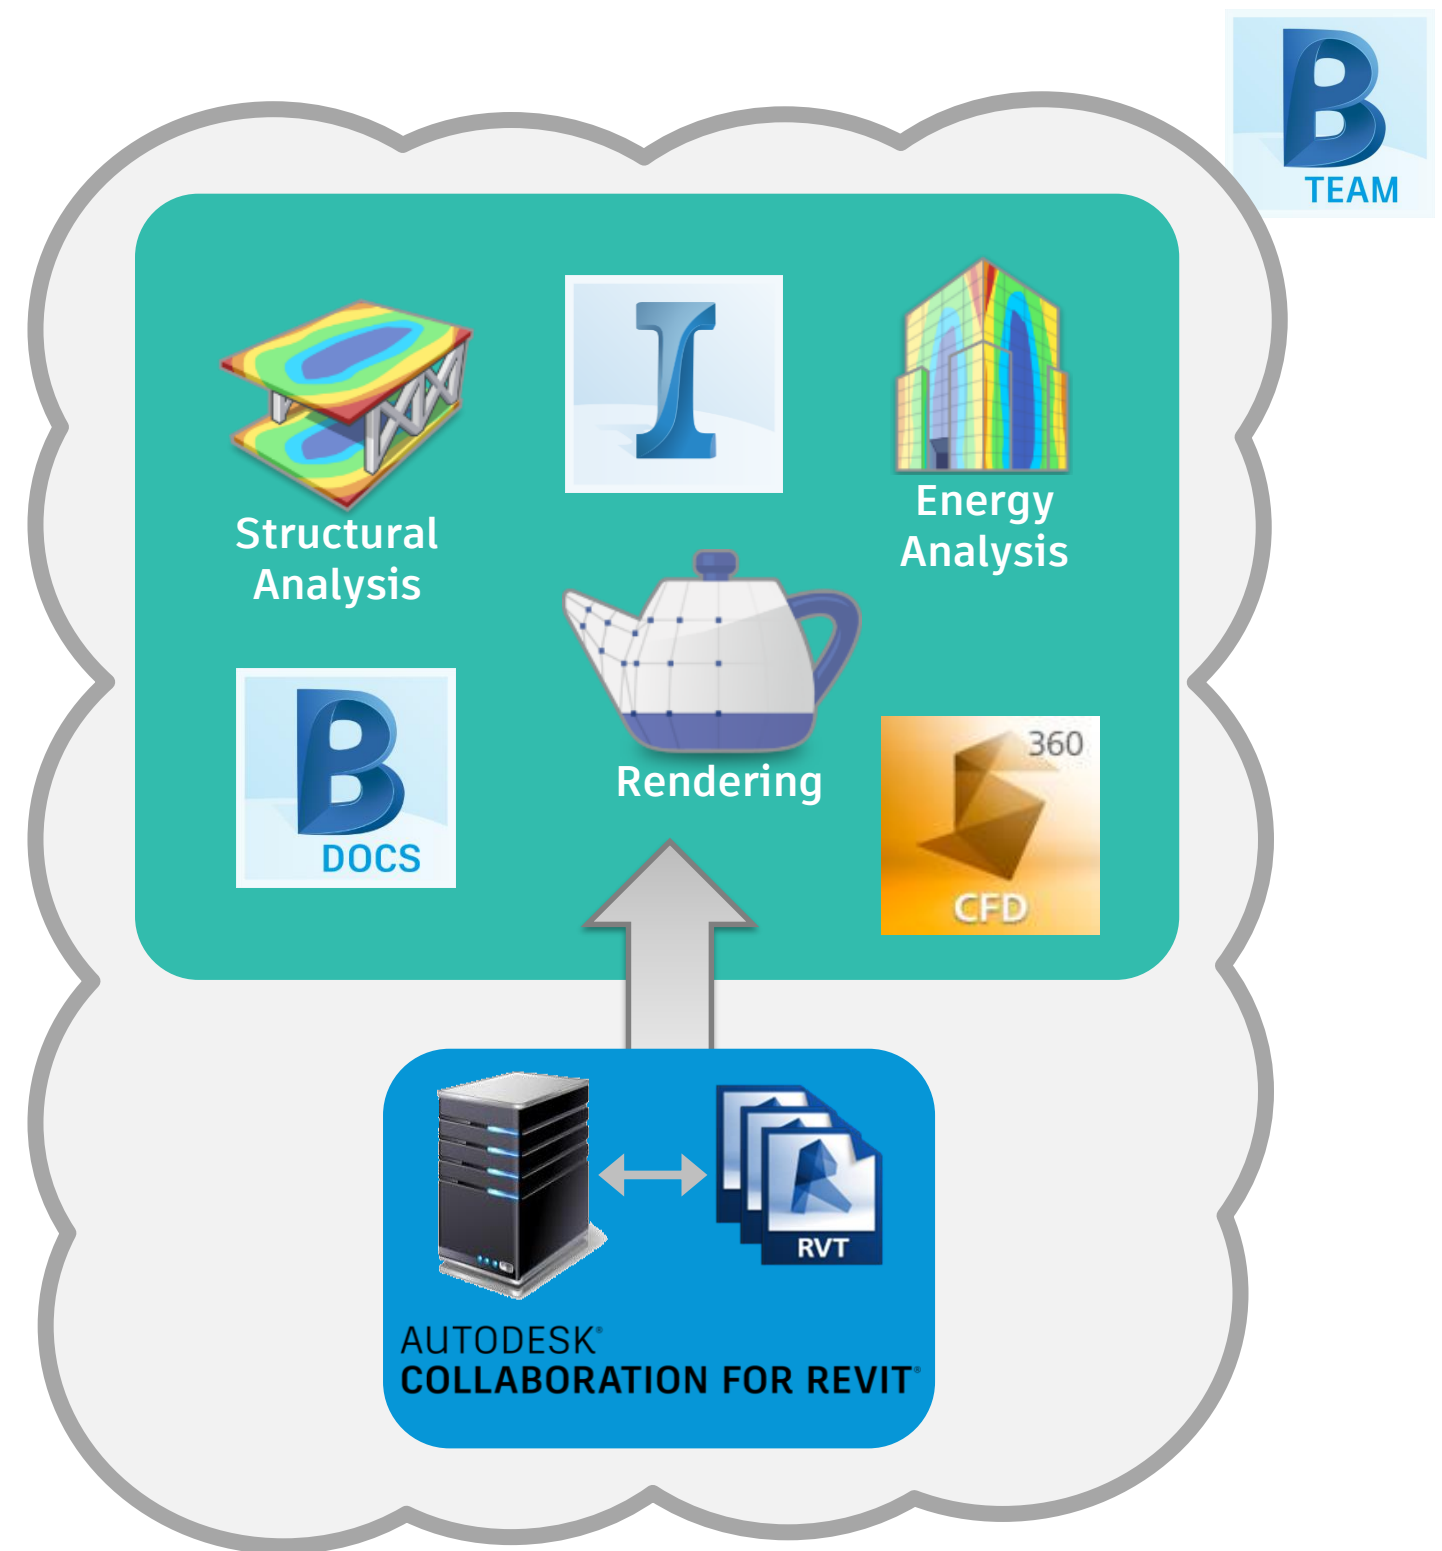

Key Values | Communicator

- Multi-firm concurrent authoring
- No IT setup required
- Integrated communication

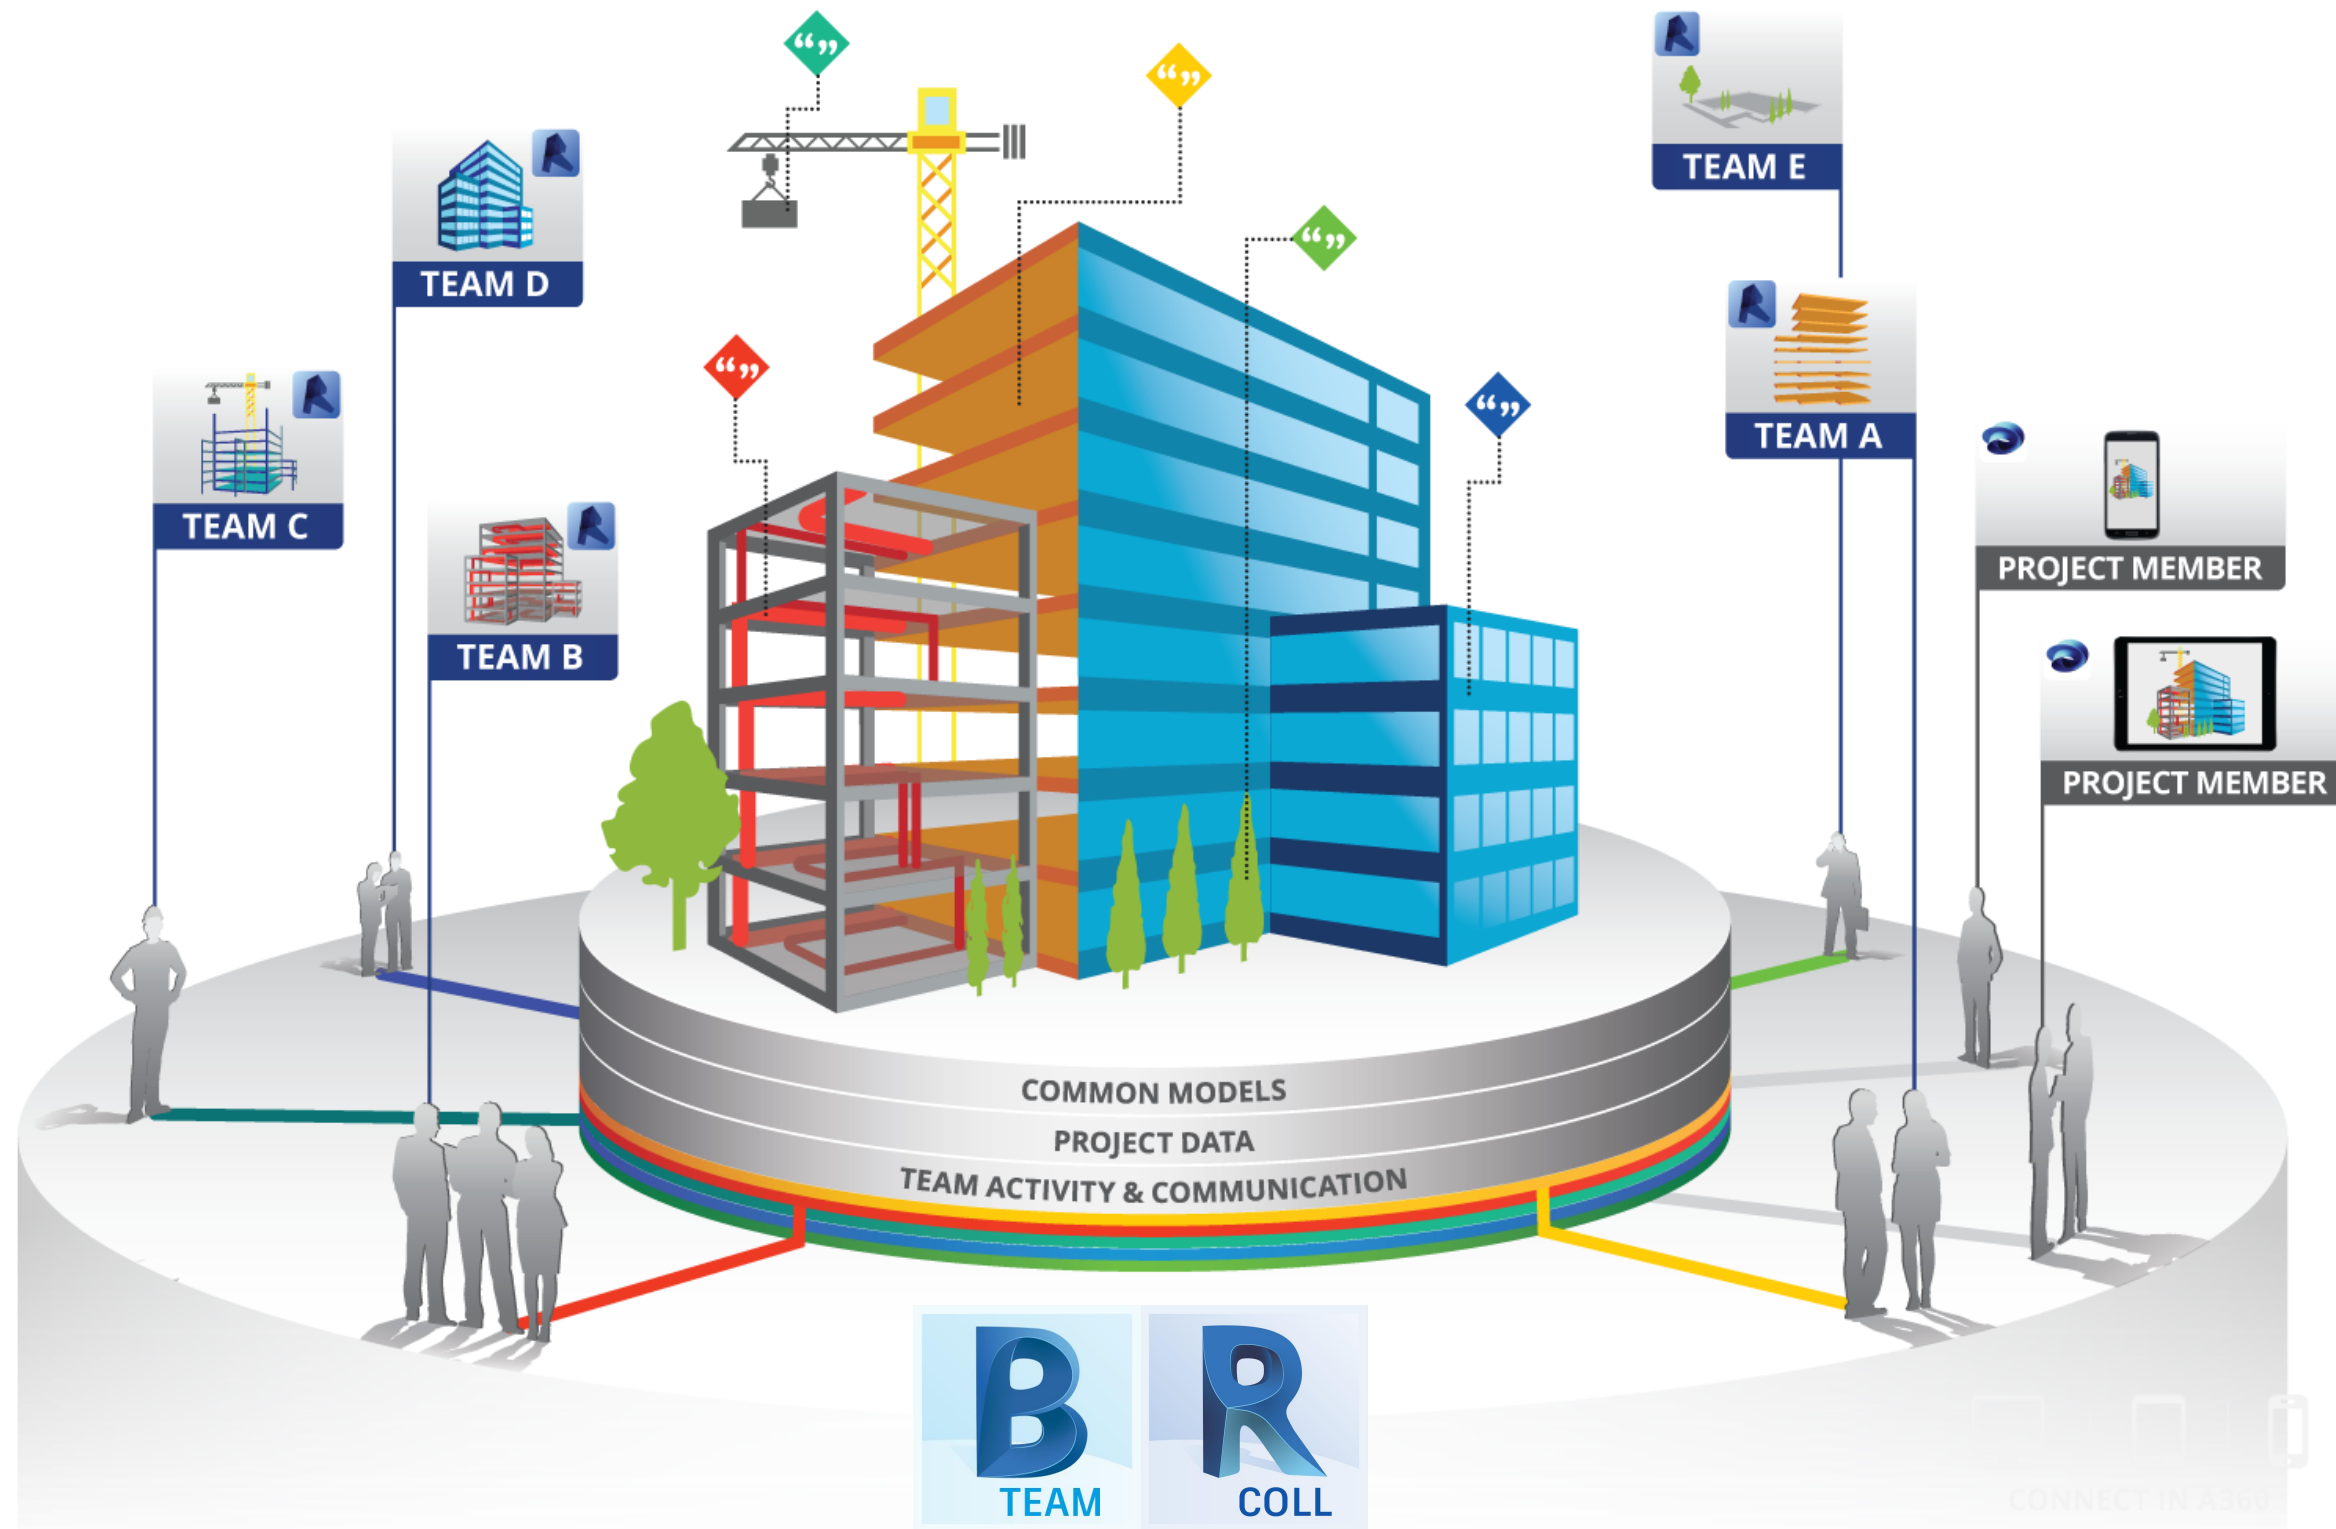

Key Values | Harnessing the Cloud

- Multi-firm concurrent authoring
- No IT setup required
- Integrated communication
- BIM directly accessible to other cloud services

Common Questions

Common Questions | Data Security

AUTODESK SECURITY UPDATE

January 29, 2015 3:00 PM

Autodesk is aware of the GHOST vulnerability and we are in the process of patching impacted systems. This may result in temporary disruptions to some services. Any additional information will be shared here as needed, on the Autodesk Trust Center.

October 17, 2014 11:00 PM

On October 16th, Oracle announced security vulnerabilities affecting certain versions of MySQL. Because our customers' security is our first priority, we are performing emergency maintenance on impacted services to mitigate these issues. Please excuse potential service interruptions during this time.

We self-certify compliance with:

Overview

Autodesk knows that data integrity is critical to your success. With over 15 years of experience providing cloud-based solutions, we are committed to delivering trustworthy cloud services by imposing rigorous internal standards.

Common Questions | File Sharing

“We don’t work with consultants using Revit...it’s just us.”

(and/or)

Collaboration for Revit gives you the flexibility to work from home, from the coffee shop, from a jobsite, or even from your client’s office on live Revit projects with no hassles. Just sign in and go!

“We only have one office.”

Common Questions | File Sharing

“We don’t work with consultants using Revit...it’s just us.”

(and/or)

Collaboration for Revit gives you the flexibility to work from home, from the coffee shop, from a jobsite, or even from your client’s office on live Revit projects with no hassles. Just sign in and go!

“We only have one office.”

“We’re concerned that other members of the project team could edit our models.”

With Collaboration for Revit, you will know who synced your models and when. And you can roll back to any previous sync.

Additionally, BIM 360 Team enables you to share data easily and securely with external team members that do not need model editing features.

Common Questions | File Sharing

“We don’t work with consultants using Revit...it’s just us.”

(and/or)

Collaboration for Revit gives you the flexibility to work from home, from the coffee shop, from a jobsite, or even from your client’s office on live Revit projects with no hassles. Just sign in and go!

“We only have one office.”

“We’re concerned that our other members of the project team could edit our models.”

With Collaboration for Revit, you will know who synced your models and when. And you can roll back to any previous sync.

Additionally, BIM 360 Team enables you to share data easily and securely with external team members that do not need model editing features.

Generic file storage tools work very well for that purpose. But they weren’t built for design-based collaboration, and they do not fully address those needs.

“We use Dropbox (etc.).”

BIM 360 Team enables you, your clients, and extended project team members to view and interact with 3D models in a browser or on mobile devices and provide feedback, markups, etc. Team communications are also tied directly to the project.

Common Questions | Storage

“Is there enough storage?”

BIM 360 Team offers 500 GB of storage, a major increase over A360 Drive (25 GB).

Also keep in mind that you will be using BIM 360 Team primarily for active projects. Completed projects may be deactivated and don't count.

Common Questions | Storage

“Is there enough storage?”

BIM 360 Team offers 500 GB of storage, a major increase over A360 Drive (25 GB).

Also keep in mind that you will be using BIM 360 Team primarily for active projects. Completed projects may be deactivated and don't count.

“Wait...I used to have 25 GB of storage on A360 Drive.”

That's correct, and you still do, as these are two separate products. You are also able to access A360 Drive data from BIM 360 Team, so you can leverage BIM 360 Team's collaboration tools with your legacy data stored in A360 Drive.

Common Questions | Pricing

Product		
Core Functionality	Centralized Workspace, Unlimited Projects	Cloud-enabled Revit Worksharing Across Locations and Firms
Additional Value	2D/3D Viewing, Deep Search, Cloud Storage, Comments, Markups, Document Sharing, Mobile Access	Communicator for Revit Includes BIM 360 Team
Current Pricing	\$10-15/user/month	\$67-100/user/month

Subscribe to
Collaboration for Revit
for

\$67/user/month

(when purchased annually)

What's the ROI?

Example: \$67/mo. = \$800/yr.
 $\$800/\text{yr.} \div \$100/\text{billable hour} = 8 \text{ hours/yr.}$
 $8 \text{ hours/yr.} \div 52 \text{ weeks/yr.} = \underline{9.23 \text{ minutes/week}}$

If Collaboration for Revit
saves your users

10 minutes/week

it pays for itself!
