# AB1778 - As-Built and Conceptual Modeling with Autodesk® ReCap™, Autodesk® Revit®-Based Software, and Autodesk® AutoCAD®

**Dominique Pouliquen**, Director of Market Development, Reality Capture Group, Autodesk **Chad Studer**, President, ADSK Solutions LLC.

### **Class summary**

Reality capture is becoming predominant in architectural, engineering, or construction work. Using the Autodesk ReCap family of products and services in conjunction with Autodesk applications, it's now becoming very easy to design in context using as-built scanned data as a reference. This class teaches you how to take advantage of new workflows based on ReCap software for several use cases that are related to BIM, such as retrofitting a renovation, conceptual modeling, and so on, using both laser scanners and photographs.

# Key learning objectives

At the end of this class, you will be able to:

- Use reality capture workflows for BIM
- Prepare laser scans for Autodesk applications using ReCap Pro
- Create a 3D model from photos using ReCap Photo
- Use ReCap data in Autodesk AutoCAD and Autodesk Revit

# Autodesk ReCap Pro

# Autodesk® ReCap<sup>TM</sup>

A family of software and services to create intelligent 3D data from photos and scans

### **Autodesk® ReCap Family of Products & Services**

#### ReCap

- Desktop product for editing and visualizing 3D data from laser scans
- Processes scans from any device and export to Autodesk products
- Autodesk 360 cloud publishing for sharing laser scans and 3D data
- Easy-to-use with intuitive GUI

#### **ReCap Pro**

Same features as ReCap plus:

- Snap registration for in-field data preparation and verification
- Add survey control to 3D data to tie into control and verify accuracy

#### ReCap 360

- Central portal for all Reality Capture clouds services
- ReCap 360 Real View: Web service for sharing and collaboration of scans
- ReCap 360 Photo: Photo-to-3D Web service

# **Autodesk® ReCap For Laser Scanning**

**ReCap 360 Real View** Sharing & collaboration of scans on Autodesk 360

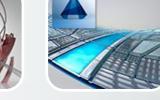

Indexation, Clean up, Regioning 3D & Panoramic Viewing on desktop Pro only: Point cloud to point cloud Registration

# Autodesk® ReCap vs ReCap Pro

Laser Scans Features	ReCap	ReCap Pro
Indexing		
Visualization		
Measurements		
Editing		
Scan Publication to ReCap 360		
Scan-to-scan Registration		
Survey Control Verification		

ReCap Pro is the same product (same installer) as ReCap with license-enabled additional features.
