

Class PF5291

1D - 4D Factory planning with Factory Design Suite

Peter De Strijker

DLS Technical Specialist – Belgium Europe

Class summary

Class is setup to cover a complete workflow based on Autodesk technology, starting from process planning over 2D-3D layout, reality capture to 4D timeline and Virtual factory experience.

Key learning objectives

At the end of this class, you will be able to:

- Setup Integrated workflow for factory layouts
- Learn about importance of process planning as a starting point for factory layout
- Integration of “as build” situation in a factory layout workflow
- Factory layout communication between all stakeholders

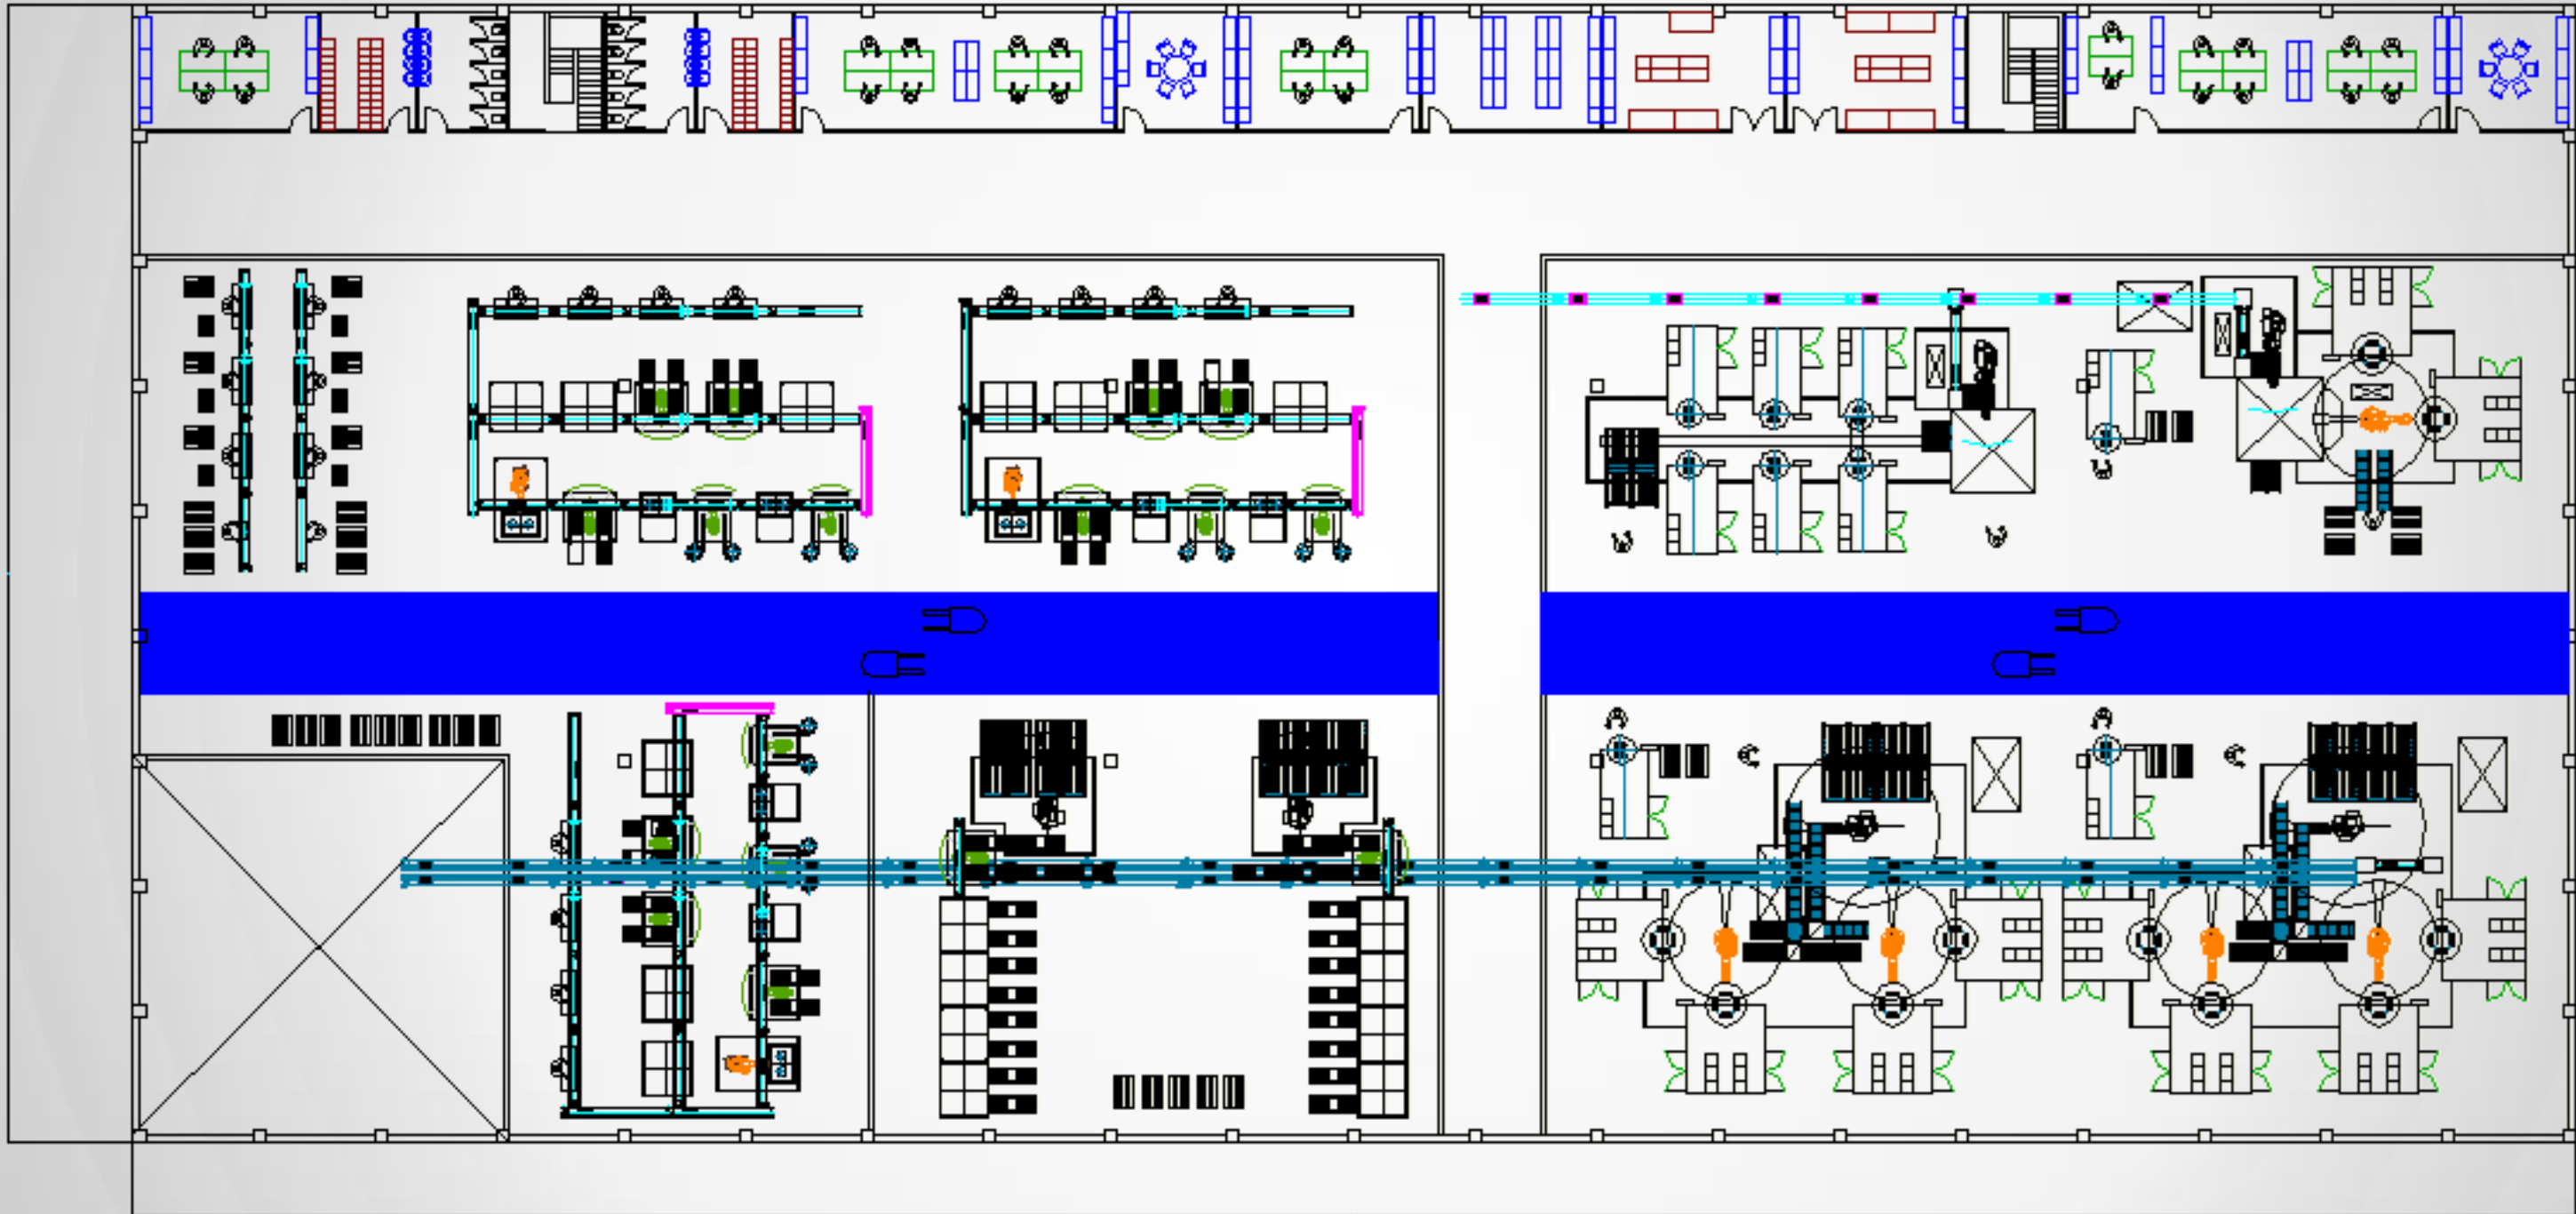

Introduction

Handout dataset: <http://a360.co/14PSluM>

The Building – is the ‘container’

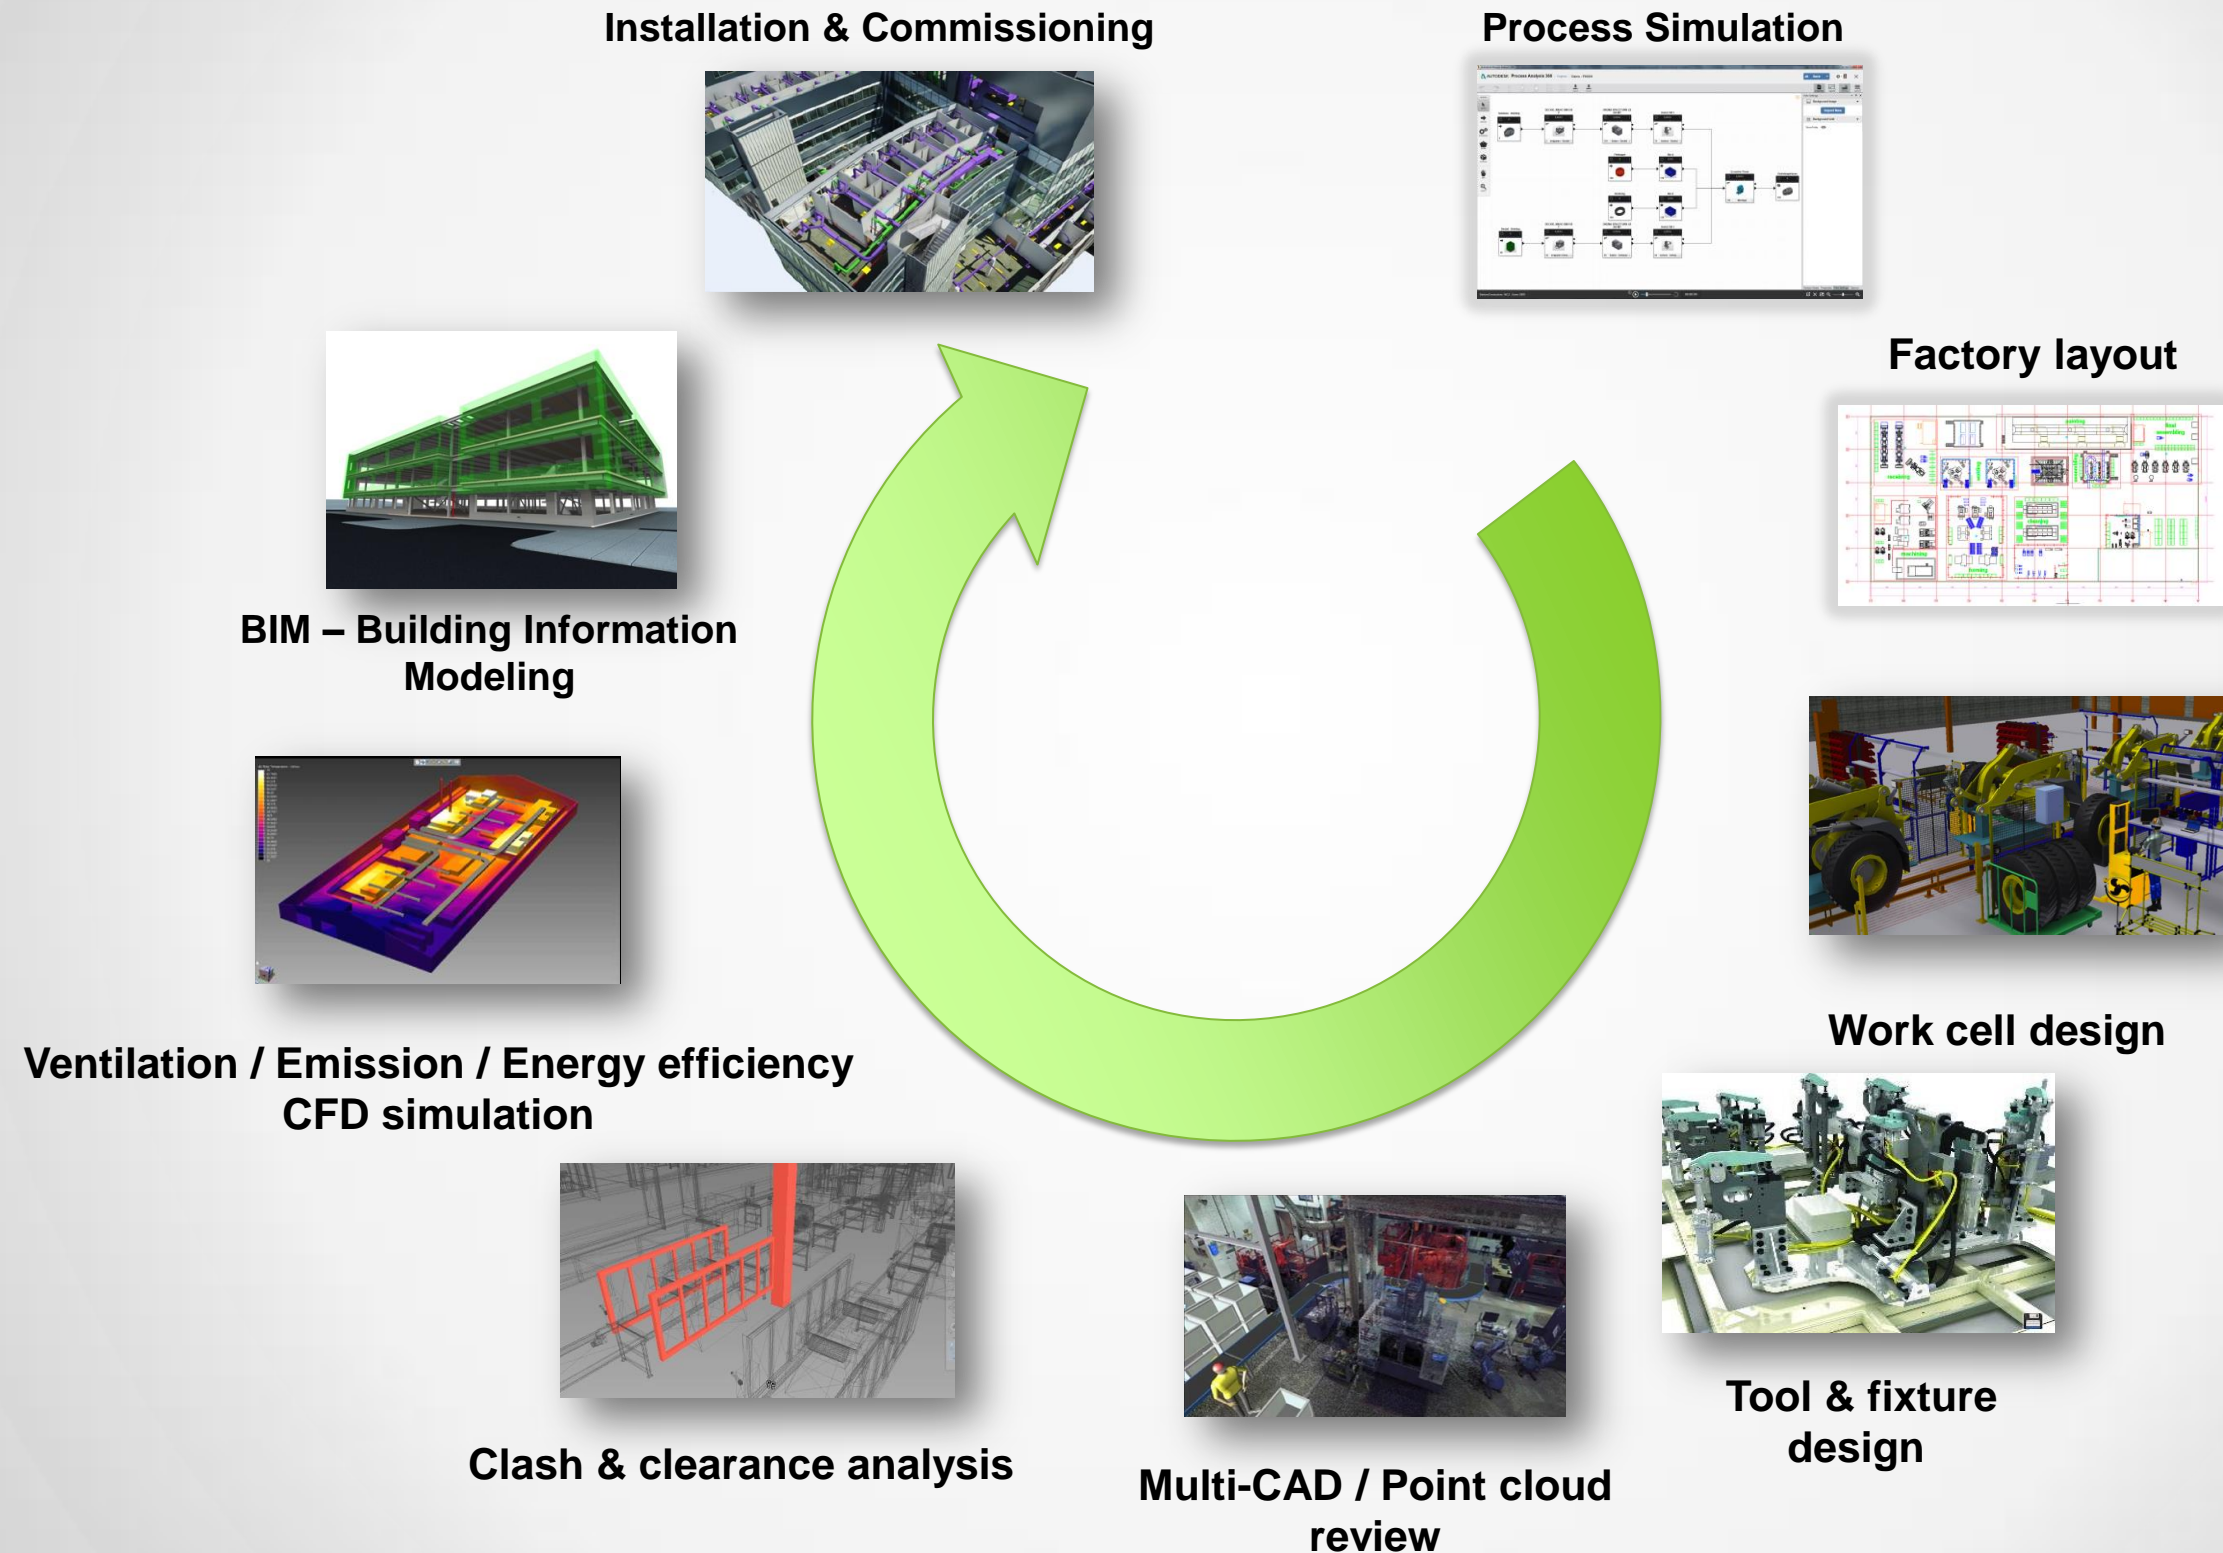

Today's design process

Most production system or machine-line layout is done in AutoCAD.

Autodesk Process Analysis 360

- Manufacturing planning
- Design Validation
- Job costing
- Decision support

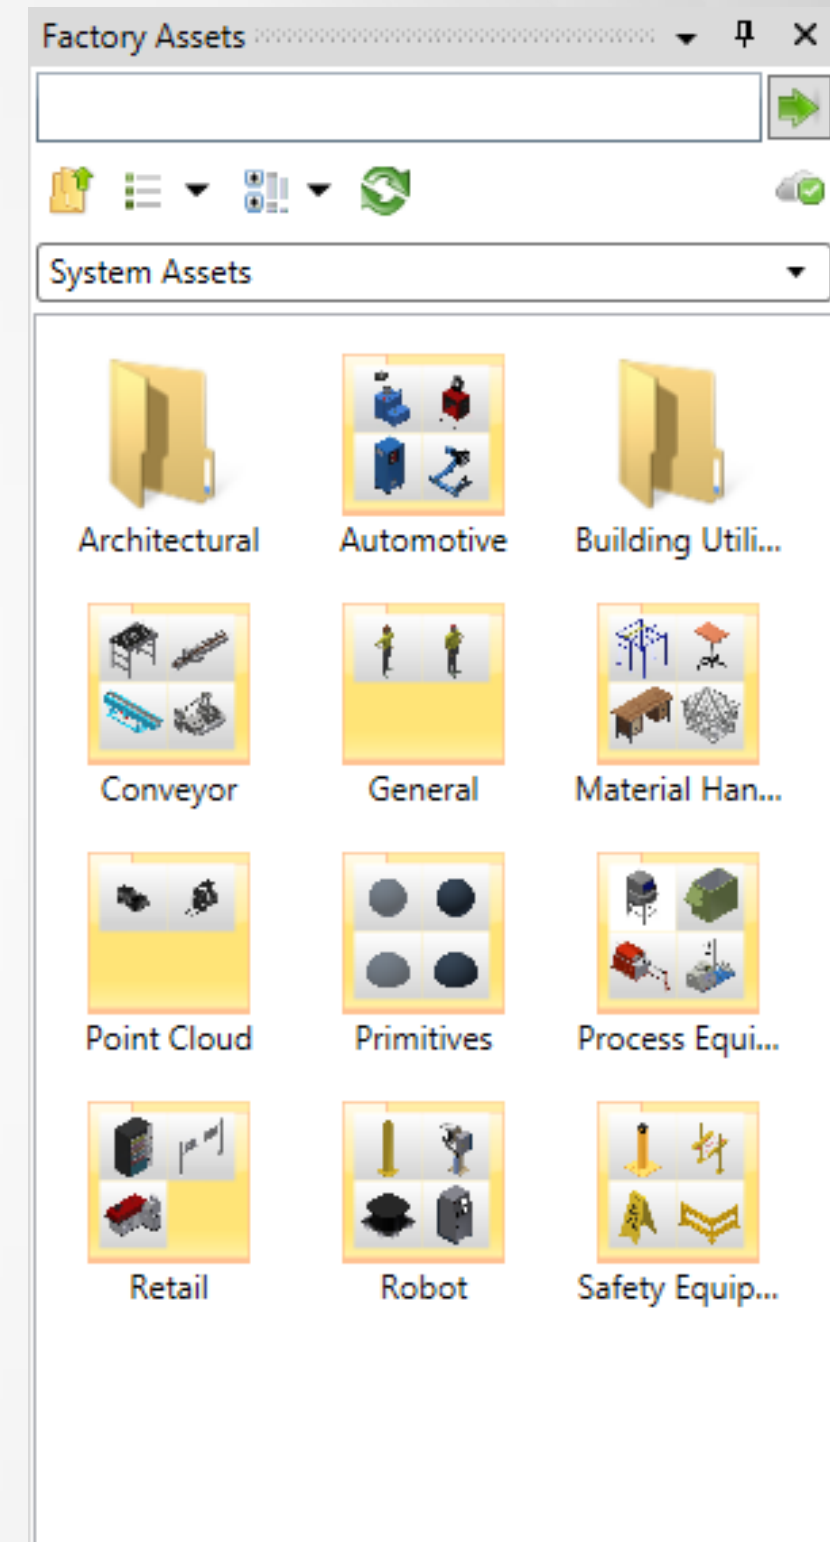

Live

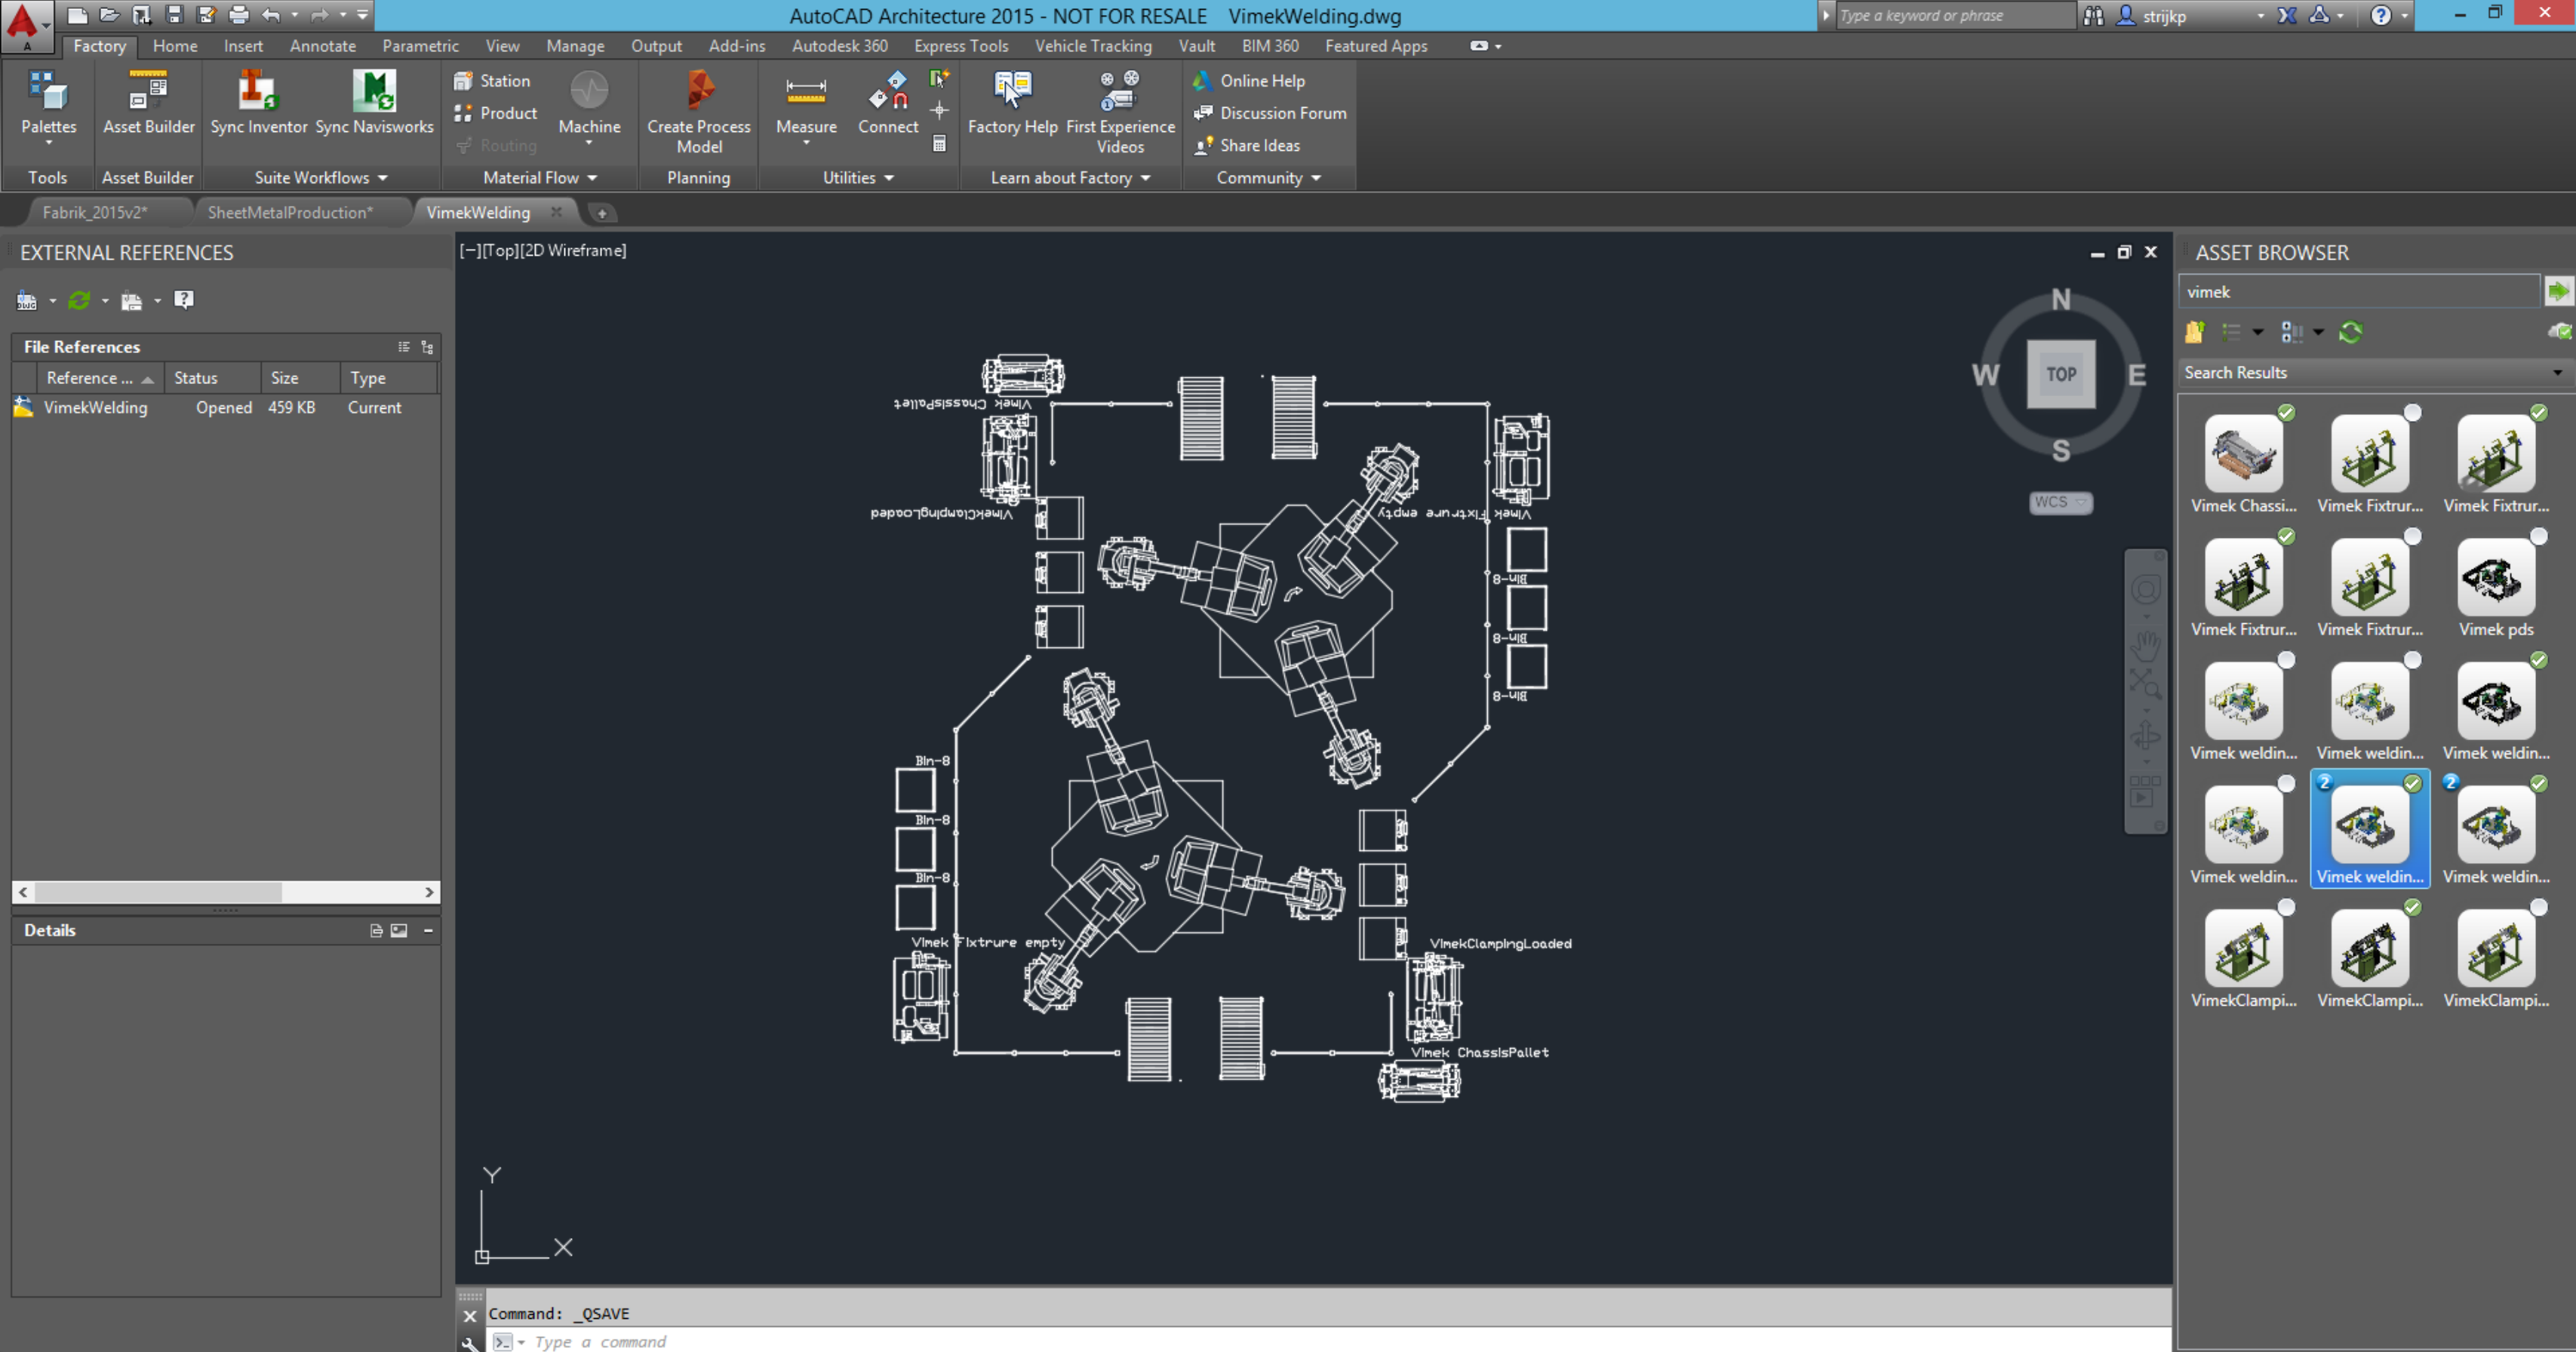

2D

Factory Assets

- *Factory Asset Builder*: Create custom 3D content for layout use; add smart connection points and landing surface definitions on the asset
- *Factory Asset Warehouse*: Publish, store, and share multi-CAD assets in the cloud
- Cloud-based and out-of-the-box content

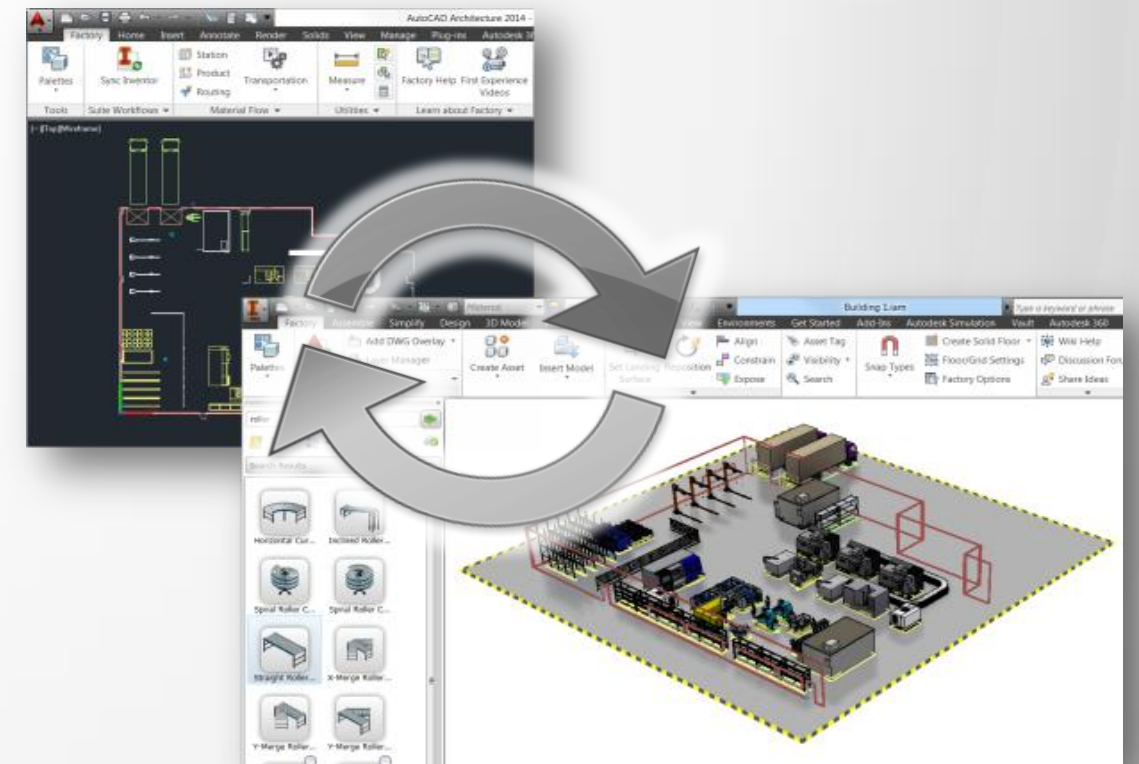

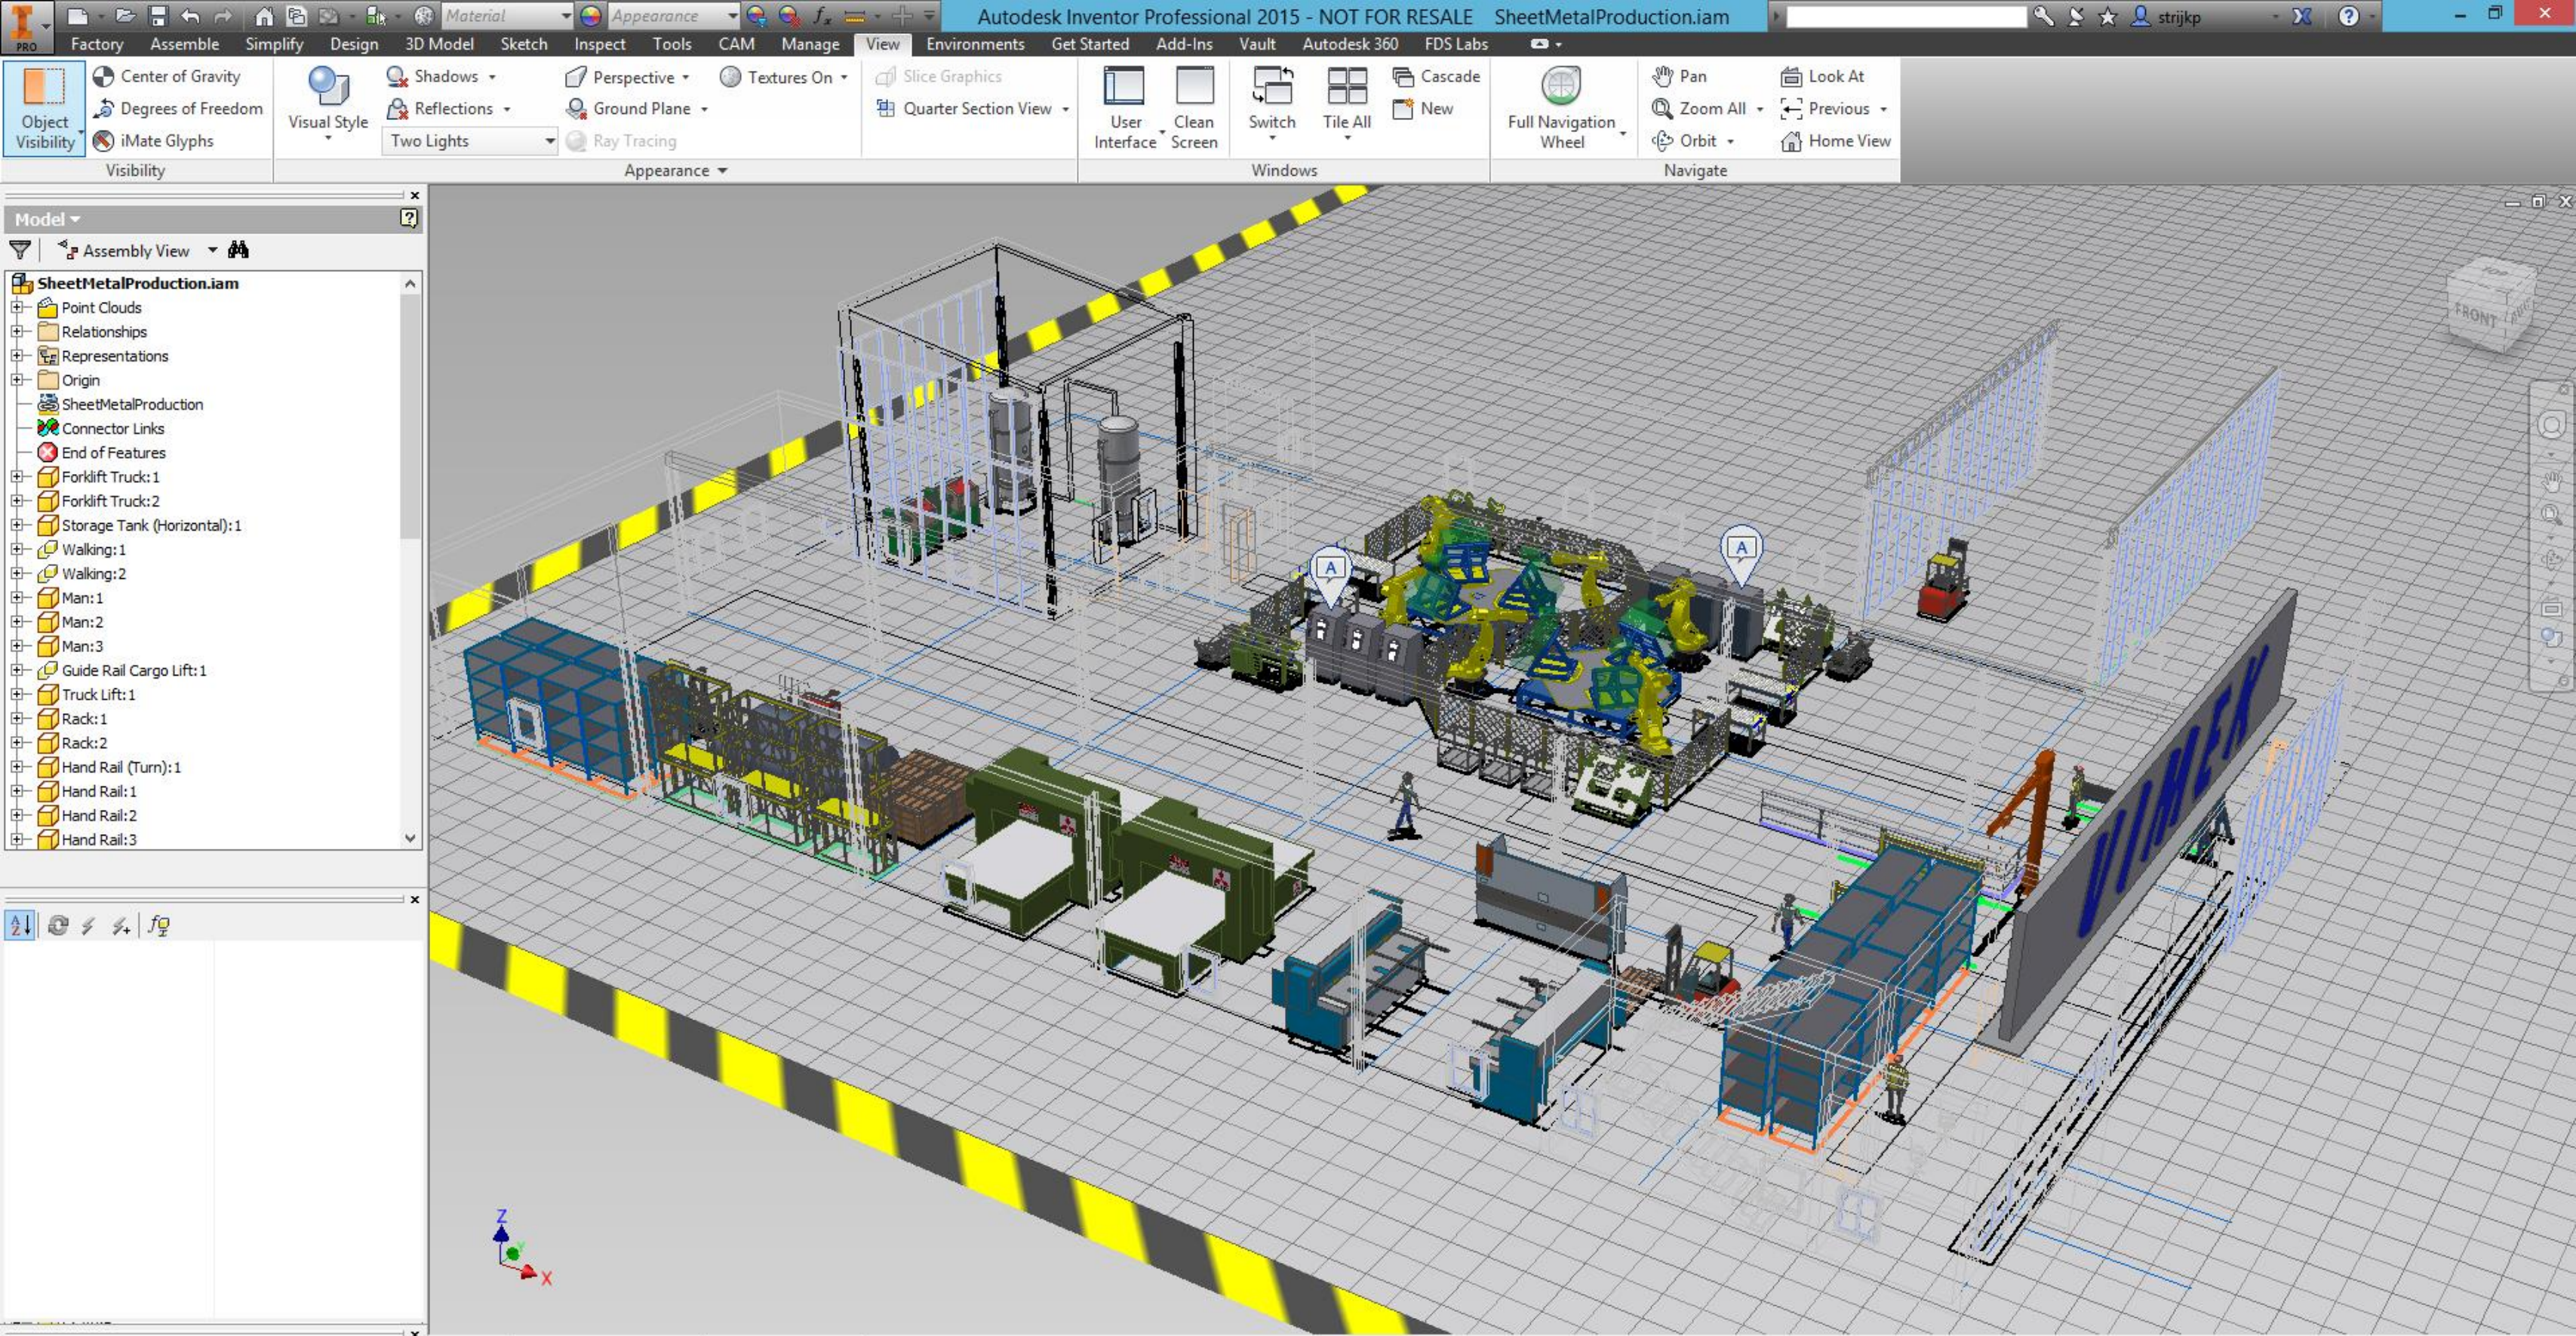

Live

3D

3D visual layout modeling

- **Convert 2D layouts into 3D with a single click**
- **Reduce errors with 2D/3D bidirectional associativity**
- **Easy drag-and-drop placement of components on the factory floor**
- **Large library of 2D & 3D parametric factory content**

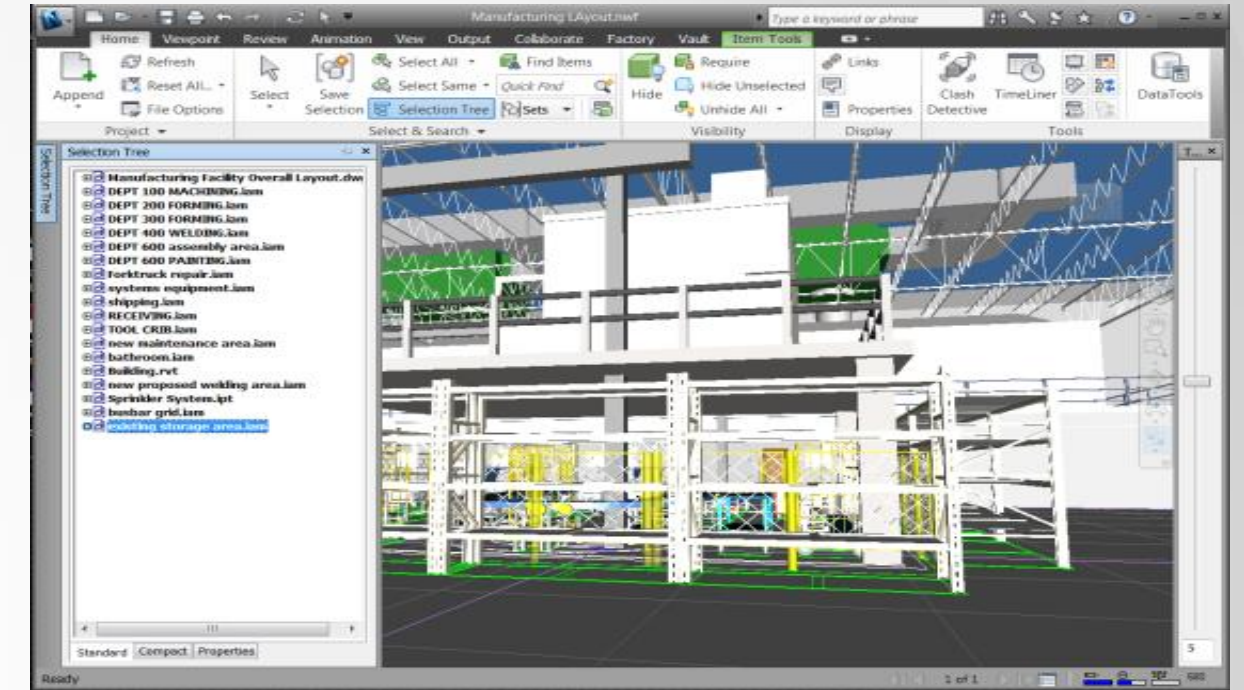

Live

4D

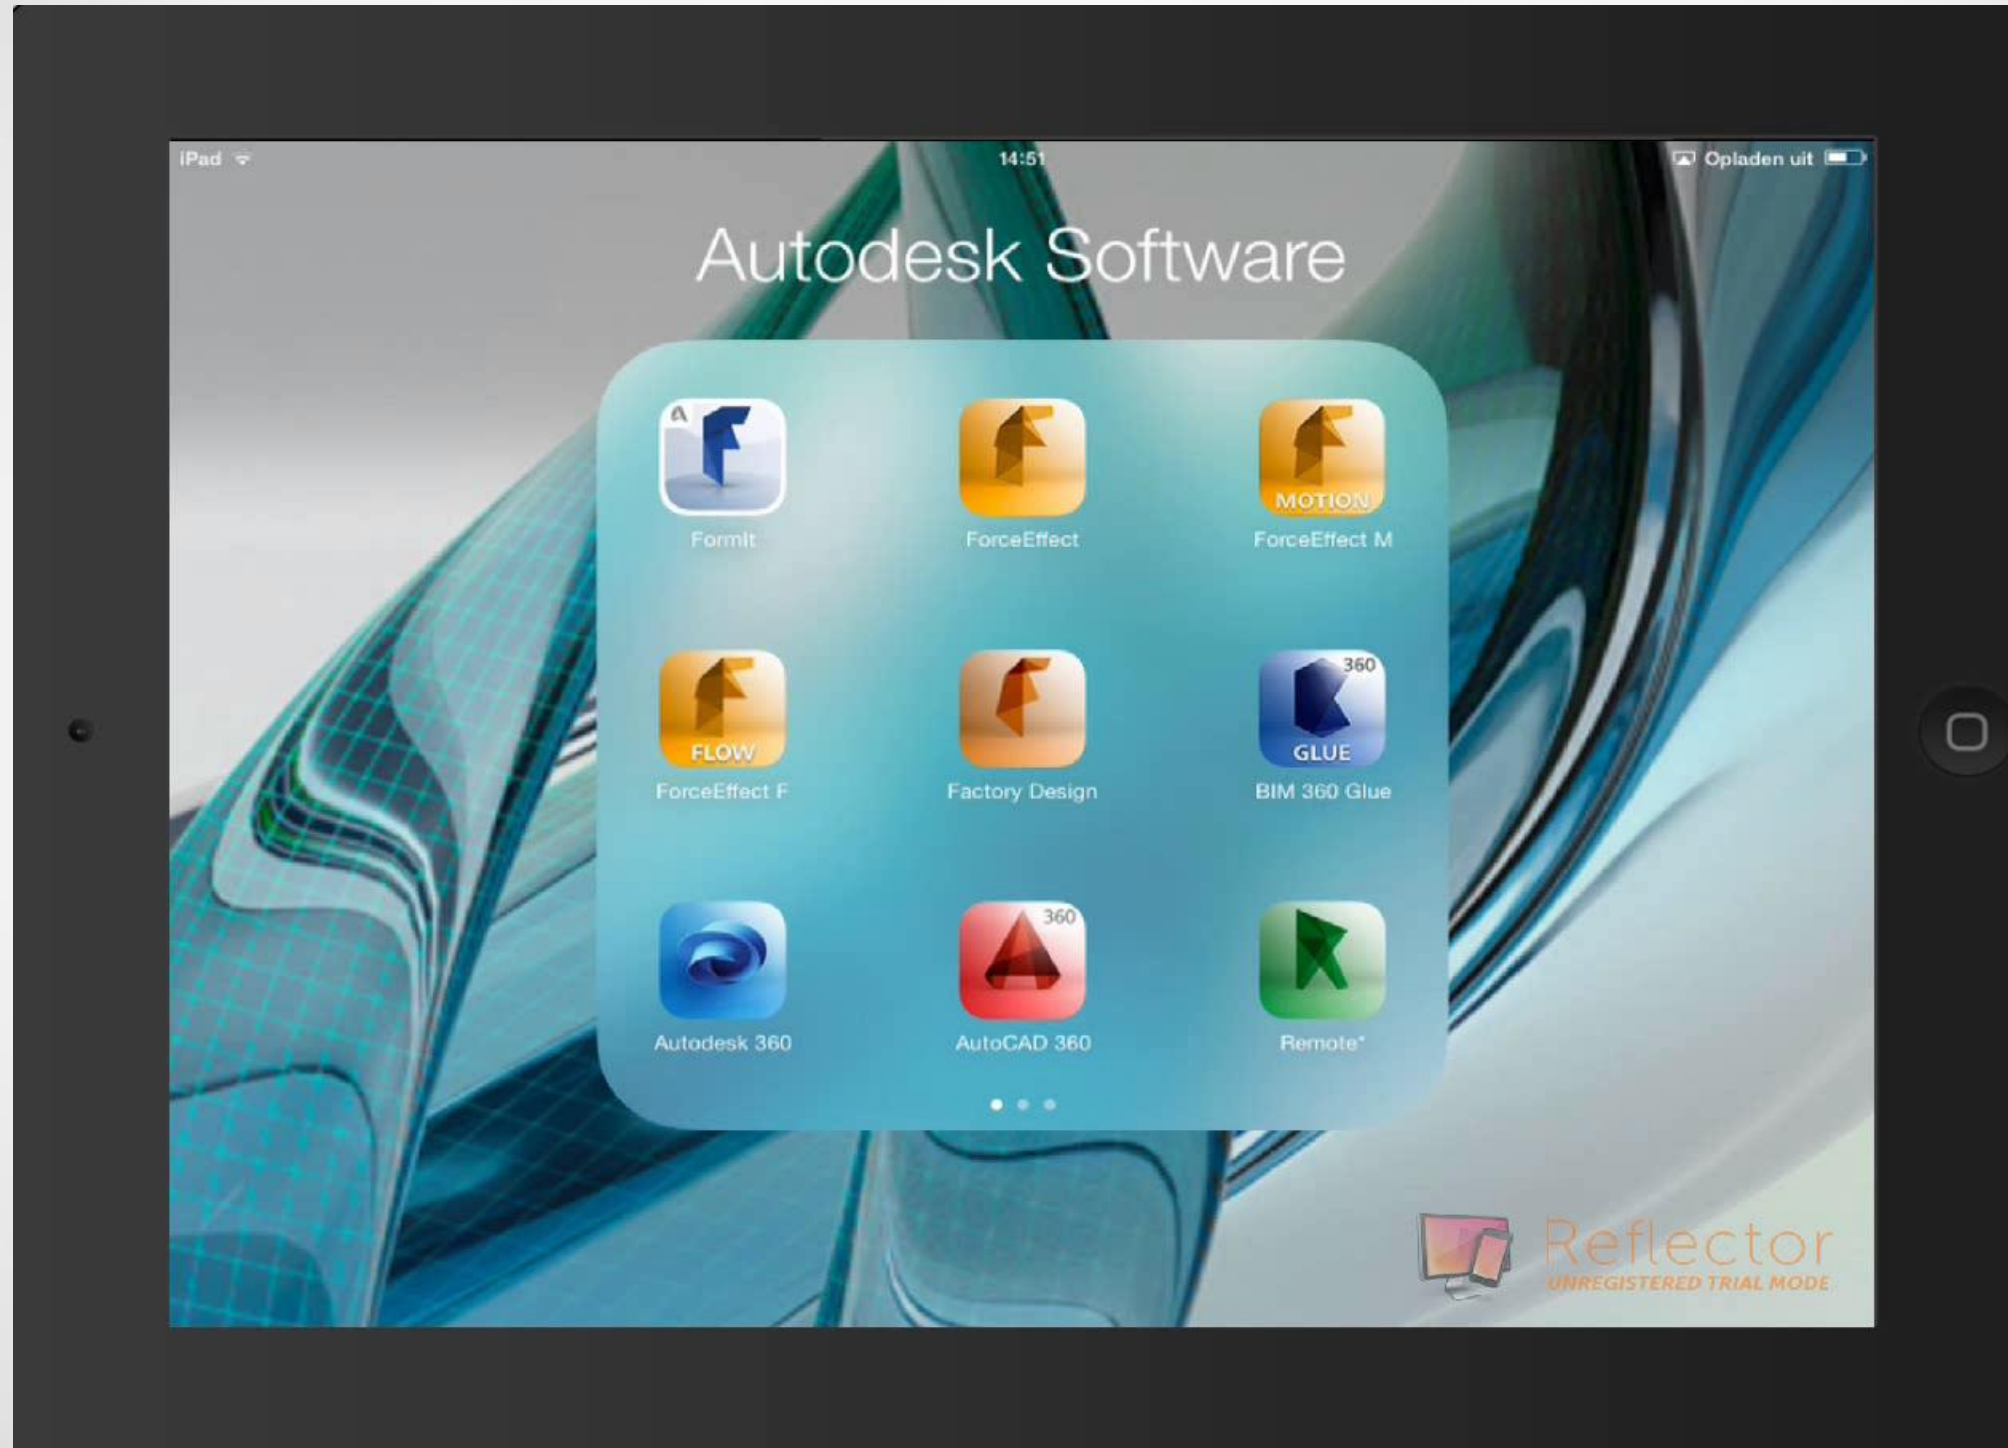

Engineering review & analysis

- Multi-CAD & point cloud support
- Communicate design intent with Visual fly-through and walk-through
- **Clash detection and clearance analysis**
- **4D simulation of factory floor equipment installation sequence**
- Collaboration tools for stakeholders without CAD software

Live

Layouts on mobile device

Virtual Reality Factory

Virtual Reality Factory

Session Feedback

- Via the Survey Stations, email or mobile device
- AU 2015 passes given out each day!
- Best to do it right after the session
- Instructors see results in real-time
